# Chapel repairs don't have enough funds

By KITTY FRALEY  
Battalion Reporter

With a leaky roof, worn furniture, and little money available for renovation, the future for the All Faiths Chapel looks bleak.

"We're trying to start a renovation program," Don Albrecht, assistant director of student activities, said.

But stipulations imposed by the state prohibit spending state funds on the chapel because it is used for religious purposes, he said.

If the building was also used as a classroom, state funds could be appropriated for upkeep and repairs, but given present uses of the chapel resources for repairs are limited.

Roof repairs alone are estimated to cost \$30,000.

"That's not considering the furniture and other things that should be replaced because of rain damage and constant use," Albrecht said.

Texas A&M University has some non-state and general maintenance fund money that may be designated for repairs, he said, but donations and wedding rental fees constitute the majority of the funds.

It costs \$35 to be married in the sanctuary and the couple must provide a minister for the ceremony.

Approximately \$2,000 was collected in 1980 from wedding fees and \$500 from private donations. But other than that, the chapel has no additional income.

"On a day-to-day basis the chapel doesn't need much maintenance and once the roof is fixed it will be really nice again," Albrecht said.

Twenty-five religious student organizations use the chapel for meetings, and memorial services are occasionally held there.

# Transit bill considered to be timely

AUSTIN — Rep. Bob Bush, D-Sherman, said today he has introduced a bill enabling Texas counties and cities to create a mass transit authority.

The legislation would require a county or city to obtain approval by a majority of the voters to implement the authority, Bush said. Only four Texas counties — Harris, Bexar, Tarrant and Dallas — have the statutory authority to establish a mass transit authority in their geographical region, he said.

With the Reagan administration's recent deregulation of the oil industry and the rising cost of operating automobiles, the timeliness of providing such a legal mechanism is of great importance, Bush said.

# At GTE, We Develop That, Too!

Our talented technical professionals develop futuristic telecommunications systems. Software to hardware, GTE Automatic Electric Labs is a leader in its field.

We're also a leader in developing career opportunities for engineers. That's because when you join us, you start as an integral part of a team. Your ideas and talents weigh heavily in the final design of our systems.

It's the value we attach to you and your future with GTE that leads to our excellent salary and benefits package.

Pleasant working environments in modern facilities, the latest in equipment in the telecommunications industry... and the security of knowing your value to us... help insure a bright future for talented engineers.

If you have a BS or MS degree in Computer Science, Electrical Engineering or a related discipline, positions are available in the following areas:

- ON-LINE SOFTWARE DEVELOPMENT**
  - Operating System Software
  - Call Processing and Administrative Software
  - On-Line Recovery & Diagnostic Software
- SUPPORT SOFTWARE**
  - Development Support Software
  - Test Utility Software
