Mexicans go hungry to go free

United Press International
SAN ANTONIO — Bexar County Sheriff Joe Neaves said Tuesday five Mexican nationals being held by the U.S. Immigration and Naturalization Service staged a three-day hunger strike to encourage officials to release them.

Neaves said the men were among some 35 Mexicans being held by federal officials as material witnesses in cases against people accused of transporting illegal aliens from Mexico to the United States.

"They had been here since June, and they wanted Immigration to do something with them — get them out or send them back to Mexico or something," Neaves said.

College Station rezoning plan expected to draw opposition

By RANDY CLEMENTS
Battalion Staff

The rezoning of 103 acres, expected to be under close scrutiny by the College Station Planning and Zoning Commission, and the Woodson Village final installment development will be discussed in a public hearing scheduled for 7 p.m. Thursday.

The land is on the north side of Southwest Parkway between

Dartmouth Avenue and the East Bypass.

City Planner Al Mayo said he expects opposition from area residents because the overall rezoning is not in compliance with the city's comprehensive plan, which outlines the desired growth direction of the city.

The request would change a low-density residential district to medium- to high-density residen-

tial districts, a commercial district and an administrative professional district, he said.

The major problem with request, Mayo said, would be administrative-professional tract on Southwest Parkway cause it is "totally out of sync with what is planned for area."

The Planning and Zoning Commission and the College Station City Council, he said, must determine whether these changes vary from the comprehensive plan.

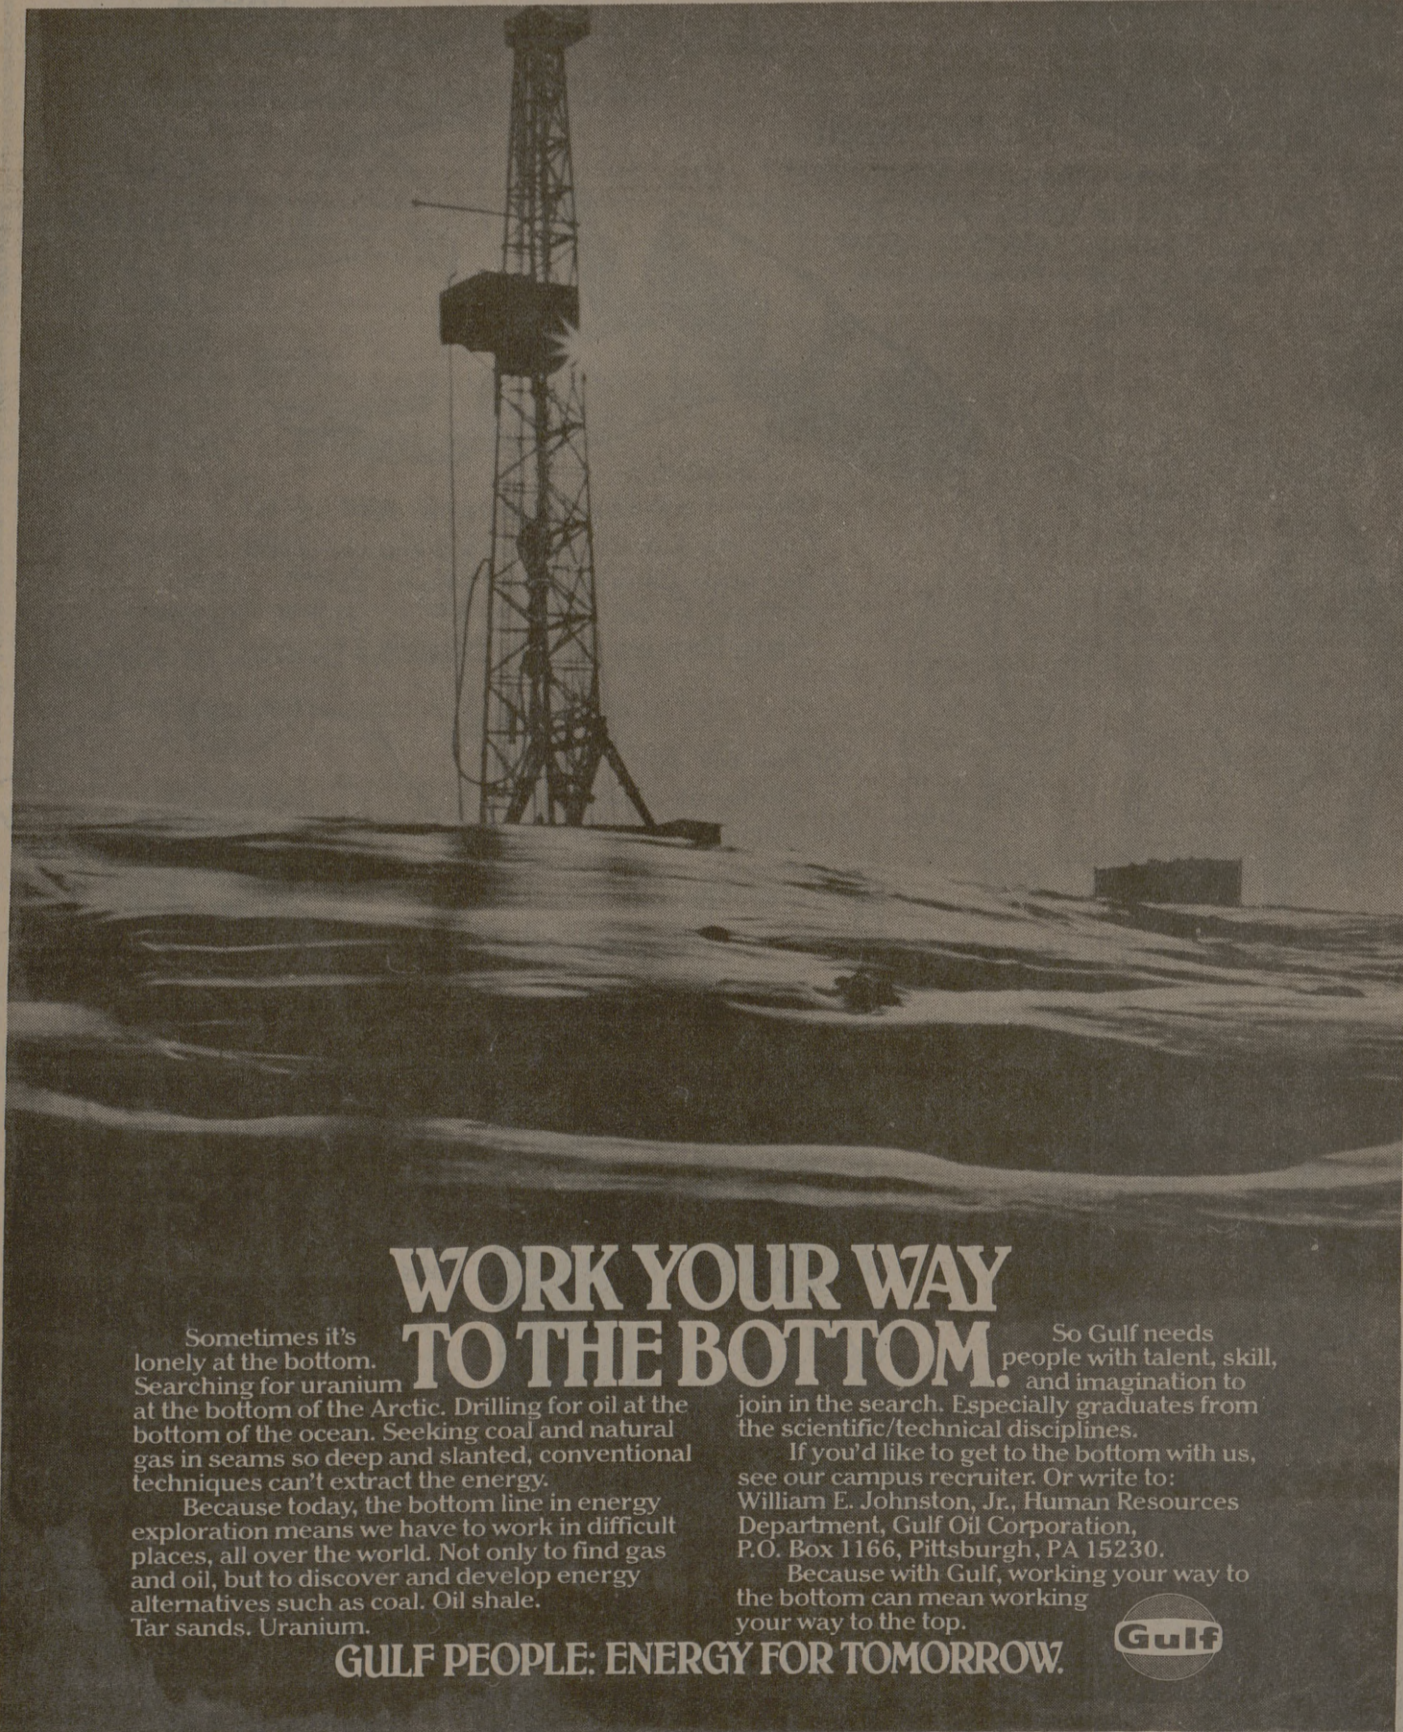

The commission is also scheduled to reconsider the Woodson Village development plan for the area between Haman Drive and Thomas Road.

The commission tabled plan Sept. 24 because area residents said the proposed 25 would place strain on the stressed sewer system.

Mayo said the addition of proposed 25 lots would not affect the sewer problem.

WORK YOUR WAY TO THE BOTTOM

Sometimes it's lonely at the bottom. Searching for uranium at the bottom of the Arctic. Drilling for oil at the bottom of the ocean. Seeking coal and natural gas in seams so deep and slanted, conventional techniques can't extract the energy.

Because today, the bottom line in energy exploration means we have to work in difficult places, all over the world. Not only to find gas and oil, but to discover and develop energy alternatives such as coal, oil shale, Tar sands, Uranium.

GULF PEOPLE: ENERGY FOR TOMORROW.

So Gulf needs people with talent, skill, and imagination to join the search. Especially graduates from the scientific/technical disciplines.

If you'd like to get to the bottom with us, see our campus recruiter. Or write to: William E. Johnston, Jr., Human Resources Department, Gulf Oil Corporation, P.O. Box 1166, Pittsburgh, PA 15230.

Because with Gulf, working your way to the bottom can mean working your way to the top.
