**SNOW SKI CLUB:** Meeting to discuss trip details and a film at 7:30 p.m. in 350 MSC.

**AMERICAN FOUNDRYMEN'S SOCIETY:** Discussion of production and workshop in J.S. Thompson Hall (old ME shops).

## Cancer society and FTC would rather fight than quit

**United Press International**  
**NEW YORK** — The American Cancer Society board voted Saturday to join the Federal Trade Commission in a search for bigger, better and more numerous health hazard warnings on cigarette packages.

The new attack on the reservoir of ignorance about the dangers of smoking was proposed during closing sessions of the four-day ACS annual meeting. The 117-member board voted in the proposal.

— "The ACS recognizes that the size of warning labels is too modest, that the current message is much too imprecise, and certainly too familiar — as the FTC report shows. It is, indeed, worn out."

— "The ACS believes that a stronger design is required to make a warning label visible and effective, that it should be made larger than at present, and that multiple specific warnings rotated

in sequence or at random would probably be more effective than any single warning, no matter how detailed the latter might be."

— "It is shocking to learn from the FTC report that about 20 percent of the American public, or 30 million adults, do not even know that smoking causes cancer. Forty percent, 60 million people, do not know that smoking causes most lung cancer."

**ATTENTION**  
**ALL COLLEGE OF AGRICULTURE MAJORS**

If you are interested in teacher certification in agriculture while pursuing your current degree, meet with us on November 9 or 10 at 7 p.m. in room 101 of Scoates Hall. This 30 minute meeting will answer your questions. For advance information — call Dr. Herman Brown or Dr. Gary Briers at 845-2951.

8 a.m.-9 p.m.  
Sun.  
12-9 p.m.

## Inflation causes high jobless rate

**United Press International**  
**WASHINGTON** — An unemployment rate of 8 percent. More than 8.5 million Americans unable to find work with another 1 million discouraged to look.

The White House calls the dismal figures a "natural short-term consequence of unwinding the deeply rooted inflation that is imbedded in the American economy."

Sen. Edward Kennedy, D-Massachusetts, says they indicate the worst economic mess since the Great Depression — the result of a "schizophrenic economic policy" of combining a tax cut with a tight money policy.

AFL-CIO President Lane Kirkland also blames President Reagan's economic policies. He calls those on the unemployed "victims of this engineered recession."

The October unemployment figures released Friday by the Labor Department were expected to be higher than September, but not many observers expected the rate to jump from 7.5 percent to 8 percent.

The number of unemployed was the highest since the department began its current method of obtaining data in 1947, eclipsing the previous high of 8,398,000 in May 1975.

It meant that 1 million workers became unemployed since July, pushing the jobless rate higher than any time during President Carter's administration and well above 7.4 percent when Reagan took office.

Unemployment rose in all major categories, particularly among blue-collar workers. In the hard-hit construction industry, 18 percent of workers were out of a job in October.

Teenage unemployment also increased to 20.6 percent, up 1.3 percentage points — highest in six years. Among black teenagers aged 16 to 19, 46.3 percent were out of work.

Nevertheless, the White House announced that the "administration will not adopt quick fix measures to deal with short-run movements in the unemployment rate."

The statement said: "Elements of the president's economic program already in place are sufficient to provide the basis for a strong and lasting economic recovery which we anticipate will be evident in 1982."

On Capitol Hill, Labor Secretary Raymond Donovan refused to appear before a Joint Economic Committee hearing to discuss the matter, saying he did not want to make any "snap judgments, which instant analysis would necessitate."

Rep. Parren Mitchell, D-Maryland, who chaired the hearing, forecast a 9 percent unemployment rate before the current recession ends.

### Tuck School at Dartmouth College

Where graduate education in management began.

The Amos Tuck School of Business Administration is the oldest graduate school of business in the United States. It was founded at Dartmouth College in 1900 and continues to be a leader in the business of educating managers. From its inception, Tuck School has offered only the Masters Degree. This exclusive focus, combined with its small size, offers a personalized approach to professional management education which is distinctive among the leading business schools. The residential nature of the program and close student-faculty interaction further enhance the quality of the learning experience.

Tuck School is living proof that a leading business school need not be located in a big city. While Executives-in-Residence and other representatives of the business community form a steady stream of visitors to the School, Tuck students enjoy the fine facilities of Dartmouth College in the beautiful New England setting of Hanover, NH. The problems of city life can be put aside—at least temporarily—in favor of academic concerns.

During the past year, more than 190 companies sent representatives to Tuck to recruit from its 140 graduating students. (A Placement Report is included in the Tuck Bulletin.) And each year, 25 managers from industry come to Career Expo, a two-day symposium, to share their knowledge and experience in their respective fields. Numerous guest speakers participate in the classroom throughout the year, and distinguished overseers contribute their expertise to the direction of the School.

Access to Boston and New York is easy. Both cities are served by interstate highways and bus. Amtrak provides service to and from New York and a scheduled airline flies to Boston from Lebanon, NH, a few miles from Hanover.

If you are interested in learning more about the Tuck MBA Program, make plans to speak on campus with the following Tuck School admissions representative:

### Huber impacts on America!

Join us...for a meaningful career.

Millions of pounds of Huber

Carbon Black are used each year in the manufacture of rubber products and tires. Huber Oil Field Equipment manufactures equipment for drilling, pipeline and petrochemical storage industries worldwide. Huber also produces oil & gas...inks utilized by newspaper and magazine publishers...clay for the paper industry...chemicals...timber and minerals...and calcium carbonate used in making paper, plastics, and paints. Total annual sales approach a half-billion dollars, and are moving up fast. You can make a real contribution—and benefit accordingly.

We'll be interviewing on campus  
Friday, November 13, 1981

Our representative will be on campus to interview Mechanical and Chemical Engineering graduates for fulltime positions in West Texas and Gulf Coast locations—the heart of the Sunbelt. If selected, you'll enjoy the widest possible range of responsibilities within a short time...and you'll enjoy competitive salary and top benefits that include almost immediate profit-sharing.

• Company literature and details are available at the Placement Office right now. For your interview, please register soon at the Placement Office. • We're an equal opportunity employer M/F.
