

ENGINEERS— A CAREER FOR YOU IN PATENT EXAMINING

The Patent and Trademark Office offers unique career opportunities for engineers as Patent Examiners.

CHALLENGE AND RESPONSIBILITY

Patents represent the most advanced practical thinking in scientific development. You are constantly exposed to the newest innovations in the field. As a patent examiner, you are essential to the rapid development of technology.

You are independent and work alone on a large variety of cases. Responsibility is the foundation of all your authoritative decisions since fortunes may turn on any one determination. You are a professional.

CAREER GROWTH

Advancement is rapid. You will receive in-house training courses. If you would like to attend one of the many area law schools, part of the cost may be paid for you. You will be exposed to other professionals in the fields through meetings with attorneys and clients. Salaries improve as you improve. Avoid stagnation in the mid-20Ks.

OUTSTANDING BENEFITS

The Patent and Trademark Office offers stability of employment and location.

A stone's throw across the Potomac from the Washington Monument, the location in Arlington, Virginia offers an exciting variety of cultural and recreational events.

Of course, you have career federal government service benefits—one of the best retirement systems around, in addition to health and life insurance plans.
