

SCHLUMBERGER ENGINEERS DOWN TO EARTH

EE's, ME's Physics & Geophysics

We don't fly into the earth, but we do explore it.

Just as the crew aboard a shuttle orbiter combines the latest technology and engineering training to explore space, a Schlumberger engineer uses the latest technology to evaluate subsurface formations. Special devices are lowered into wells drilled miles into the earth's crust. These earth probes operate under extreme environmental conditions to provide answers to the petroleum industry. Shuttle Orbiter? No. We use a half million dollar computerized mobile laboratory.

To investigate the possibility of your taking command of an Earth Explorer, please write or call:
