

Hardly studir

To get your

How many times have you sat in class doodling on the edge of your notebook, thinking to yourself that what the prof says sounds familiar? Then you realize that you **have** had it before, and didn't learn it the first time either.

Don't let this happen again. Certain odd bits of knowledge just tend to crop up time and time again during the college years, so it behooves you to learn such tidbits once and for all.

Or maybe you haven't had time during your academic career to take all the courses you wanted to take. We have also assembled summaries of some subjects which may help you in the future.

So here it is, the **Focus** crash college education.

You may not want to study over spring break, but this isn't so bad. Take it along. You can always use it to wipe your feet on.

LIBERAL ARTS

Languages: All you need to know is how to say "Where is the bathroom?" in four different languages.

Spanish: Donde esta el bano?

Russian: Gdye tualyet?

French: Ou est la toilette?

Latin: They didn't have bathrooms back then.

Communications: During four years, you should learn to spell acomodate, recieve and the Battallion. Sidelines include reporting Truth, making the world safe for democracy and existing on poverty-level wages. We hear it builds character.

English: Practice saying things like "I are a student at Texas A&M" like you know what you're talking about. Technical writing is the process of writing articles for stupid people about what peo-
