### 'Pochismo' polluting Spanish language

United Press International

MATAMOROS, Mexico — City officials in this border town say "pochismo" is polluting their native tongue and they have begun an intense campaign to wipe out the epidemic of what they call a disease of the Spanish language.

"Pochismo" is a mixture of English words and phrases.

"We want to take out those words that are foreign to the Spanish language," Jose Hernandez, Matamoros director of education, said Tuesday.

He said that especially in border towns like Matamoros,

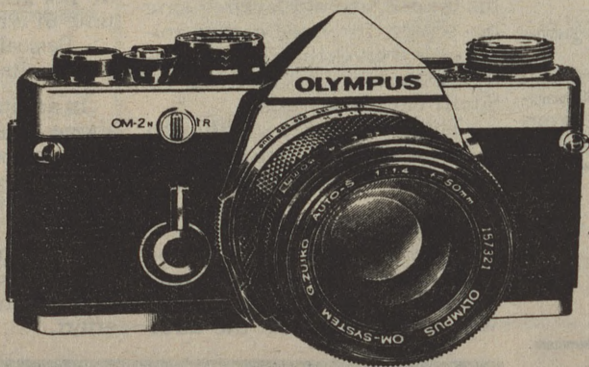

which is across the Rio Grande River from Brownsville, Texas, children "grow up half and half," speaking a mix of English and Spanish, but neither language properly.

Mayor Jorge Cardenas attended a conference on "pochismo" in Mexico City last week, and this week sponsored three seminars on correct Spanish on the city-run radio station.

Hernandez said he would meet this week with directors of Matamoros public schools to stress the importance of teaching children proper Spanish.

**OLYMPUS OM-2**  
is acclaimed  
**"ONE OF A KIND"**

...and a bigger SLR buy than ever.

The ultimate 35mm SLR compact with "off-the-film" (OTF) exposure control, OM-2 automatically sets precise exposures from 2 full minutes to 1/1000 second while the photographs are being taken instead of before. The result is the greatest exposure accuracy ever achieved in any SLR at any price.

OM-2 can also be set manually giving you full exposure control. No wonder so many serious photographers are making it their new choice!

Flash exposures with the OM-2 are perfect each

shot because OTF automation shuts the flash off when just enough light reaches the film. Even with its 5-frames-a-second motor drive each frame is individually measured for perfect exposures.

The bigger and brighter viewfinder tells what exposure the OM-2 is selecting. And an LED lights when the flash is fully charged, then blinks to confirm correct flash exposure.

It's all part of the total OM System of over 300 components!
