## Rubik's Cube playing havoc with the Chinese

by United Press International

PEKING — A Chinese newspaper reports Rubik's Cube is triggering insomnia, high blood pressure and even insanity in its

sweep of popularity across China.

"The magic cube disease has started tormenting people," the Peking Evening News said recently.

A solemn editor's note accompanying the article declared, "We would like to remind the readers here, that although the magic cube could

be good for the exercise of human intelligence, we should not forget its side effects could bring us harm."

The newspaper said some

people have become irritable and others could not sleep be-

cause they failed to solve the multi-colored block.

### THE PENTAX ME-F... IT DOESN'T HAVE AN ALARM CLOCK!

BUT IT WILL CONFIRM YOUR FOCUS WITH  
ALMOST ANY LENS

The new Pentax ME-F has Confirmed Focus, the world's first built-in, through-the-lens electronic focusing system.

Inside the ME-F's viewfinder, you'll find an LED display. When you're not in proper focus, red arrows show you which way to turn the lens to get in focus. And when you're there, the ME-F will show you with a green light and tell you with an optional audible signal.

Confirmed Focus is that simple and direct. Yet, it's an important aid to normal focusing—especially when you're after pictures that can't be recreated once they're gone.

MORE LENSES. Unlike auto focus in other cameras, Confirmed Focus works with more than thirty Pentax interchangeable lenses. Even with bellows and extension tubes, or on a microscope.

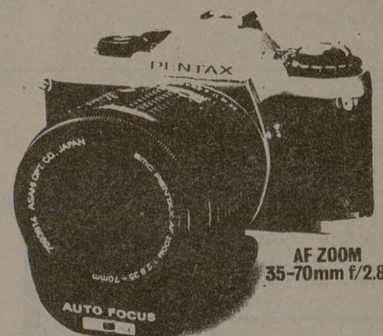

It's the only kind of focusing aid that makes sense on a system camera.

INSTANT AUTO FOCUS. For true auto focus, equip your ME-F with the new SMC-Pentax AF Zoom 35-70mm f/2.8 lens. It works with the electronics of the camera to focus itself, automatically, at the press of a button, at almost any focal length.

A SUPER CAMERA. It has push-button manual override, aperture-priority automation, a top speed of 1/2,000 of a second, and a host of high-performance accessories.

TRUST IT. If you're in the market for your first single-lens reflex camera, you should, literally, look into the Pentax ME-F before you buy. If you're an experienced SLR user, compare the ME-F's Confirmed Focus with the focusing in your present camera.

### OR FOCUSES FOR YOU, WITH THIS ONE.
