Radio Cuba fills U.S. airwaves

United Press International
WASHINGTON — The State Department says Cuba's increased broadcasting to the United States on frequencies assigned to major American AM radio stations is "assuming national proportions" and requires attention.

Although the Cuban broadcasting on frequencies assigned under international agreement to American stations has been

going on for nearly 15 years, there has been a recent increase.

It coincides with the U.S. administration's decision to go ahead with Radio Marti, a Florida-based U.S. government station that will broadcast in Spanish to Cuba. Radio Marti is not yet authorized and is not on the air.

According to State Department monitoring, the Cubans are broadcasting on 570, 650,

670, 1040, 1160 and 1380 kHz. Those frequencies are on or close to so-called "clear channels," on which certain radio stations can broadcast around the clock.

In St. Petersburg, Fla., a country-western station was flooded with calls from listeners angered by Radio Cuba broadcasts heard on the station's frequencies, authorities said

Tuesday. Hundreds of calls came to WSUN-AM when Moe B. "She's Not Cheating" Eades a tirade of pro-Soviet propaganda Monday night, said program director Bill Gamble.

"I don't like the fact that America and some Cubans cutting down my country, plained one woman who identifies herself.

Swiss agree to help SEC

United Press International
WASHINGTON — The United States and Switzerland

announced Wednesday they have signed a memorandum to allow Swiss Banks to honor U.S. Securities and Exchange Commission requests for information from Swiss banks in cases of insider trading of stock.

Insider trading involves use of information unavailable to the general public in making decisions regarding buying and selling of securities.

The countries said the special measure will cover transactions that violate U.S. law but may not be covered by bilateral treaty.

The focus is on cases of insider trading that might result in significant fluctuations in price or trading volume of stock and will be in effect when the Swiss government enacts law on insider trading.

Cadillacs for call at Elite Cab Co.

United Press International
TULSA, Okla. — Five days before Christmas last year, Jesse Thompson, 52, raised eyebrows among his fellow drivers at Service Cab Co. by putting a Cadillac on the street.

The other cabbies scoffed at Thompson's idea but soon his Cadillac Car 262 became the hottest item in the Service fleet. "People started to call (Service) and say, 'Send me your Cadillac,'" Thompson said. "I couldn't keep up with the business. I said, 'Hey, this is an idea. What if a man put out a fleet of Cadillacs?'"

Thompson left Service and with a daughter operating a dispatch radio from a converted northside gas station, launched the Elite Cab Co. on June 1.

Today Elite has 36 gray black cabs on the street with more coming. Only 10 are Cadillacs but the other cabs are immaculate even the old. In 18 months Thompson hopes to have a fleet of 200 luxury model cars.

"If a man gets off a jet at an airport, he wants to get a premium car," says Thompson. "A spy man who favors straw hats and diamond stays. 'I used to be a chauffeur and I know what kind of people like. Luxury living what people want,'" he said.

Thompson, a Baptist minister and part-time chaplain at a hospital, opened Elite's family operation, giving responsibilities to his children.

Jesse Jr., 29, is president of the cab company; Travis, president of their 24-hour vice station and Demetrius, president of Elite's limousine service. Daughters Kathy Erma are dispatchers while Barbara and Beverly are corporate secretary and treasurer.

Elite had eight cars by the end of June and 22 by the end of July. In August, Thompson obtained a license for 100 cars from the City Commission. Competitors Yellow and Checker are licensed for 125 cabs. Service, his former employer, is licensed for 70.
