## Plastic surgery not for all

United Press International NEW YORK — A Harvard plastic surgeon has alerted colleagues to watch out for certain types of patients - including one he calls "plasti-surgiholics."

The plasti-surgiholic is the seeker and bearer of multiple operations, Dr. Robert M. Goldyn said.

'She needs a psychiatrist, not a plastic surgeon," the clinical professor of surgery at Harvard Medical School, said at a seminar held at Rockefeller University and sponsored by the American Society of Plastic and Reconstructive

Surgeons.
Goldyn said fellow plastic surgeons should be on the lookout also for other behaviors that may signal a patient is not psychologically suited to undergo plastic or reconstructive surgery.
"Doctors like challenges,

but in certain cases, they should refuse to operate on patients who truly require no surgery, or on patients not otherwise healthy."

In addition to plastisurgiholics, surgeons were told to view as possibly poor candidates the following:

—The patient who writes a long, pleading letter to arrange the initial consultation. "The patient is revealing he or she is a neurotic, rigid person who wishes to control every item in life."

—The rude or pushy patient. "This patient wants to be treated as an exception and may, perhaps, not accept instructions later on, becoming hostile if the slightest thing

United Press International SAN ANTONIO — Call it the big armadillo roundup. If an enterprising furrier has his way, 20,000 Texas armadil-

los soon may sacrifice their

tough armored hides to become the latest cowboy fashion fad.

armadillos for clothing accessor-

working with armadillos for several years. Now, we've come up with the right formulas on tan-

ning. and we've decided to make hatbands, belt buckles, belts,

hatpins, bolo (string) ties and whatever else," he said.

The hide is not the only part of the odd-looking mammal that

will be used in cowboy clothing,

armadillo feet as an accessory on a hatband and also the tail as a
