

## Theft nets pull of \$8 million

**United Press International**  
NEW YORK — Two shotgun-toting bandits wearing ski masks broke into a building housing an armored car service, overpowered a guard and stole \$8 million, police said Monday.

A police spokesman said the robbers apparently gained entry to Sentry Armored Car-Courier through the roof of the building around 11:15 p.m. Sunday.

The bandits overpowered the guard, who was on duty alone inside the building, handcuffed him and stole \$8

million in \$50 and \$100 bills from a vault before escaping, the spokesman said. The guard was not injured, police said.

An FBI spokesman said the bureau had joined the investigation.

Company officials did not discover the robbery until about 7 a.m., when they unlocked the building. The identity of the guard was not immediately available.

The \$8 million figure made the robbery the largest cash holdup in U.S. history, a police spokesman said.

## Chrysler proposal accepted

**United Press International**  
DETROIT — The overwhelming approval by striking Canadian workers of a new contract with Chrysler Corp. cleared the way for the first of some 4,600 U.S. workers to return to their jobs Monday.

The contract, ratified Sunday, will give the Chrysler Canada Ltd. workers their first pay raise in three years and compensates for Canadian inflation. Six Chrysler Canadian plants closed by the walkout reopened Monday.

The U.S. workers were laid off as a result of parts shortages caused by the five-week strike by 9,600 Canadian workers.

U.S. Chrysler employees will vote Friday on their contract, which was approved by union leaders Saturday. It is expected to be approved.

"It looks like over 90 percent in favor," United Auto Workers Canadian Director Robert White said after the last of three ratification votes in Windsor, Ontario.

UAW spokeswoman Wendy Cuthbertson said final results show the contract was approved by 91 percent of hourly paid

workers, 85 percent of skilled trade workers and 97 percent of salaried workers.

White said about 7,000 of the 7,400 workers at Local 444 jammed the Windsor Raceway for the morning vote. The turnout showed, "tremendous solidarity. They were extremely satisfied. They wanted to go back to work before Christmas," he said.

The crippling strike began Nov. 5 with warnings from Chrysler Corp. Chairman Lee Iacocca that the militant Canadian UAW would bankrupt the automaker.

"It took a strike either in Canada or the U.S. before January so that we could get this," UAW President Douglass Fraser said.

The new contract offers Canadian workers an immediate wage boost of \$1.15 an hour in wages and cost-of-living money. Quarterly cost-of-living adjustments add another 12 percent increase by the contract's expiration, Jan. 14, 1984.

The total hike would raise the hourly wage of assemblers from \$9.07 to \$10.85, reducing from \$3 to \$2 the wage gap between Chrysler's Canadian workers

and their counterparts at Ford Canada and General Motors of Canada.

Chrysler originally offered

U.S. and Canadian workers a 30 cents-an-hour increase.

The U.S. pact would give

workers a 75 cent up front increase and promises further increases in cost of living allowances over the next year.

## Reagan, Dane discuss NATO

**United Press International**  
WASHINGTON — President Reagan arranged to meet with Danish Prime Minister Poul Schluter Monday, hoping to overcome a threat to planned deployment of medium-range missiles in Europe.

Schluter arrived Sunday for the three-day working visit that will include talks with Reagan and other top administration officials. It marks the first official U.S. visit by a Danish prime minister since World War II.

Defense and economic issues topped the agenda of the meeting, which one senior U.S. official characterized as "intense consultations" aimed at showing that the troubled Atlantic alliance is strong, stable and in good condition.

However, U.S. and Danish officials attached prime importance to a dispute triggered by Denmark's suspension of payments to NATO for deployment of intermediate-range nuclear missiles.
