Reagan urges Central America aid

S

VASHINGTON President gan urged a skeptical Congress to race his arms and economic progfor Central America, claiming United States has "a vital interest, oral duty and a solemn responsi-"to save the region from the lefrevolution

narare address Wednesday night joint session of the House and te, Reagan said, "I say to you that ght there can be no question: The onal security of all the Americas is take in Central America.

Meanwhile at the Quad, below, the icnic ended in a water fight. reshman cadet Lynette romsky is drenched by a felw cadet.

"If we cannot defend ourselves there," Reagan said, "we cannot ex-pect to prevail elsewhere. Our credi-bility would collapse, our alliances would crumble, and the safety of our homeland would be put at jeopardy."

Reagan's nationally broadcast address was primarily an attempt to salvage a proposed \$110 million in U.S. aid for the besieged regime in El Salvador. Congress so far has balked over all but \$30 million of that.

But Reagan pressed Congress to approve his full request for aid for all

of Central America, totaling about \$600 million for 1984. "That is less than one-tenth of what Americans will spend this year on coin-operated video games," the president said.

He said the United States will support "democracy, reform and human freedom" in Central America, and called for open and fair elections in El Salvador and Nicaragua. He said the United States also sup-

ports economic development programs throughout the region.

'In response to the military chal-

lenge from Cuba and Nicaragua - to their deliberate use of force to spread tyranny — we will support the secur-ity of the regions' threatened nations," Reagan said.

Reagan noted the recent seizure in Brazil of four Libyan cargo planes loaded with arms en route to Nicar-agua, and said "violence has been Nicaragua's most important export to the world" the world.'

His speech in the House chamber marked the first time Reagan addres-sed legislators on a foreign policy

issue. Usually presidents address Congress only to deliver the annual State of the Union report.

The speech came one day after the House Appropriations subcommittee chopped in half his request to shift military aid worth \$60 million to El Salvador from amounts allocated for other countries.

On the matter of Nicaragua, the House Intelligence Committee plans to vote today on legislation to cut off all secret aid to rebels battling the leftist regime there.

In a Democratic response to Reagan, Sen. Christopher Dodd, of Connecticut, instead called for more emphasis on negotiation and said the administration's whole approach to Central America was ignorant.

Dodd, a member of the Senate Foreign Relations Committee and a Peace Corps volunteer in the Dominican Republic from 1966-68, said, 'The painful truth is that many of our highest officials seem to know as little about Central America in 1983 as we knew about Indochina in 1963."

Car bottle ban slowed

from wire services A House committee Wednesday night sent to subcommittee legislation that would prohibit alcoholic beverage containers in motor vehicles, despite urging from Speaker Gib Lewis,

legislators and witnesses. The decision which will slow action on the bill was made after the House Liquor Regulation Committee heard witnesses, including Mothers Against Drunk Drivers, testify for the legisla-

Lewis has not endorsed the open container proposal, but had asked the committee to approve the legislation so it could be voted on by the full House. Sending the bill back to the subcommittee delay that floor vote. The speaker also had asked that

the legislation to raise the drinking age to 21 be approved by the panel. The proposal has been in a subcom-

mittee for three weeks.

Jim Adams, Texas Department of Public Safety director, said Texans will never see any meaningful change in traffic fatality statistics unless attitudes about DWI change.

The only witness to speak against the legislation was Austin attorney Stephen Edwards, although lobbyists for the beer and liquor industries attended the committee meeting. Edwards said he did not oppose anti-DWI legislation, but added that

an open container prohibition could open a new area of potential abuse by law enforcement officers. Law enforcement officials may

currently stop a vehicle for a traffic violation or report of criminal offense, Edwards said: According to the proposal all officers would have to do is see a container at night to stop a car, he said.

State board to consider requests A&M asks for new programs

by Beverly Hamilton

Battalion Staff Requests for new degree programs within the Texas A&M System and approval of the construction of a \$1.2 million chancellor's residence will be considered at the quarterly meeting of the state Coordinating Board on Friday

The board will consider Texas A&M's request for a doctorate of philosophy in applied psychology with majors in industrial and organizational psychology and community clinical

Currently, the computer science divi-sion is included in the industrial engineering department within the College of Engineering. The proposed department would offer bachelor's, master's and doctoral degrees.

The board also will consider the request for construction of a 7,291-square-foot house for the System chancellor. The estimated cost of building and furnishing the house is \$1.2 million. The Texas A&M Development Foundation will provide initial funding for the project, but will

ethnic mix at public universities in Texas. The new criteria would require grant recipients to be members of an ethnic group that constitutes less than 40 percent of the population.

The revised guidelines are intended to increase enrollment of black and Hispanic students at institutions with relatively low percentages of minority students. White students also would be eligible for the awards for the first time if they enroll in universities with largely black or Hispa-

To help maintain the revolving status of the Hinson-Hazelwood College Student Loan Program, the board will consider the transfer of \$2.6 million in federal money into the state loan fund. The \$2.6 million is available through the Special Lender's Allo-wance Fund, which compensates len-ders for providing low-interest stu-dent loans dent loans

Other proposals within the System include:

• Consideration of a bachelor

AUSTIN — The Texas House of presentatives approved new rules will create an ethics committee to luct investigations of charges of makers' misconduct.

awmakers approved the creation an ethics committee, after opponts succeeded in changing the nel by indicating that the ethics lelines were being considered in ation of House rules.

The House leadership accepted a posal to form the ethics panel the House General Investigatommittee, instead of the House nistration Committee

e ethics panel would be prohifrom inquiring into lawmakers' ct 120 days before a primary or ral election.

he ethics committee was prop-by Rep. Jim Turner, D-Crockett, in late January was named to a special subcommittee created vestigate the spending of Rep. Wilson, D-Houston. Turner's el also planned an inquiry into se Speaker Gib Lewis' failure to disclose his financial dealings. he Senate also tentatively

approved a bill that would save the state \$220 million in 1984-85 by lowering the state's contribution to public

schoolteachers' retirement. The bill would not reduce teachers' retirement benefits because of salary hikes and an increase in the number of teachers contributing to the fund, Sen. Grant Jones, D-Abilene, said.

The Senate Finance Committee recommended lowering the state contribution from the current 8.5 per-cent to 7.1 percent in the appropria-tions bill currently pending before the Senate. Teachers contribute 6.65 percent to the retirement fund.

Other bills approved by the House: • Bill that would increase state re-venues by \$48 million in 1984-85 by hiking fees charged by 20 state agencies

• Bill that would require judges to dismiss charges of driving without automobile insurance against drivers who can prove they have insurance. The bill faces another House vote before going to the Senate. • Bill that would make it a third

degree felony for officers of a housing authority to have an interest in publicly funded housing projects. Bill was sent to the Senate

psychology

In its consideration of new doctoral programs, the board invites teams of out-of-state consultants to assess the quality of existing programs in the state and to determine whether additional programs are needed.

The University also has requested that the board consider establishing a Department of Computer Science.

donations.

The proposed house, to be located on a 13-acre site off Jersey Street, is scheduled for completion by December 1984.

In other action, the board will consider revising its eligibility guidelines for the Legislative Academic Scholarship Program to encourage a broader

be reimbursed through individual nic populations. Current criteria require only that recipients be members of an ethnic minority of the state population.

The revised guidelines would allocate \$4,000 to \$20,000 in scholarship funds to 30 public universities. The recommended allocations are based on past funding levels of \$250,000 per year.

program in computer science at Prairie View A&M. The proposed program would require legislative start-up funds of approximately \$800,000 over the next three years.

• Construction of a dormitory at an estimated cost of \$3,966 at Tarleton State University.

The board meets at 9 a.m. in the Bevington A. Reed Building, 200 East Riverside Drive in Austin.

Energy committee vote weakens part of Reagan's natural gas price bill

from wire services WASHINGTON — The Senate Energy Committee voted to weaken a key provision of President Reagan's natural gas price decontrol bill.

By a 12-4 margin Wednesday, the committee voted to give residential consumers and others a new way to block a change in the traditional flow of gas from producer to customer if it threatens consumers with unneces-

sarily higher prices. The change in the flow, called for by the Reagan decontrol legislation, is called contract carriage. It means that an end user of gas, such as a big fac-tory or wholesaler, could shop around for gas from a producer, buy it directly and contract with a pipeline to get the gas to the customer for a fee. Pipelines would have to carry the gas if they had the capacity. As it is now, pipelines buy gas from produc-

ers and decide which customers can buy it from them.

Benjamin A. Cooper of the Senate Energy Committee staff said the main contract carriage provision in current natural gas law applies only to emergencies: In times of shortage, a big customer can buy directly and the pipelin can be directed to carry the gas if it has the available space in the pipeline.

The Reagan contract carrier prop-

osal is seen as a way to soften opposition to his plan to free all gas from federal price controls by 1986. He would allow direct buying and selling of gas under certain circumstances, with the Federal Energy Regulatory Commission policing the process.

This is the most important provision of this bill," Energy Committee chief Counsel D. Michael Harvey said.

roductivity on upswing

from wire reports

Productivity in non-farm business e at an annual rate of 4.8 percent the first quarter, the best showing vo years and a fair sign of eventual rovement in the job market.

The Bureau of Labor Statistics reted Wednesday that productivity, ding agriculture, grew at its fasquarterly pace in two years. The mally adjusted indicator had 1 only 0.4 percent in the fourth the of 1982.

Private economists said the improproductivity performance could ually enhance job prospects for nationals 11.4 million unem-

Summer registration may double

by Karen Schrimsher

Battalion Staff The number of provisional students in summer school here this year may be double the number who attended last summer, the director of admissions and records says.

Provisional students are freshmen who begin classes in the summer because they are denied admission for the fall semester on the basis of their Scholastic Aptitude Test scores.

Dr. Billy G. Lay, director of admissions and records, said about 20 percent of all high school students who apply for enrollment here are not accepted because their SAT scores do not meet admissions requirements.

Last year, an estimated 350 people who applied at Texas A&M were offered provisional student status. So far this year, the program has been offered to about 700 appli-

As of April 1982, 152 high school seniors had expressed an interest in the provisional student program. This year, 433 students have said they are interested in the program.

In the first summer session last year, 176 students actually enrolled. More stringent admission re-quirements than last year are one reason for the increase in the number of provisional students, Lay said.

Under the new requirements, ap plicants in the fourth quarter of their high school class must have an SAT score of at least 1,200, applicants in the third must score 1,100.

those in the second quarter must score 950 and students in the top quarter must score 800. Students in the top 10 percent of their class have no minimum score requirement.

When applicants are rejected on the basis of SAT scores, they are offered two options for admission. They may try the provisional program in the summer or transfer after a semester at another university or junior college.

Provisional students can enroll for the summer sessions and stay for the fall semester if they meet the requirements set by the admissions

A provisional student is required to enroll in nine hours of assigned academic class work during the first and second summer sessions.

The courses include a study skills class and a writing lab.

The decision to allow a provision-al student to stay for the fall semester is based on summer school

To remain at the University for the fall semester, the provisional student must pass all courses and have a C average for the nine class hours.

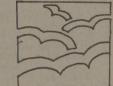

Lay said that during the past five years about 55 percent of the provisional students have remained at the University for the fall semester.

After a student passes the admission office requirements for provisional students, the student's per-manent record will not show the provisional status.
