Dr. Joyce S. Davis displays a morning making her an honorary plaque she received Tuesday member of Phi Eta Sigma.

Department head presented honorary membership award by freshman honor society

by Pat Allen
Battalion Reporter

The freshman honor society, Phi Eta Sigma, presented an honorary membership certificate Tuesday to Dr. Joyce Davis, head of the Department of Pathology and Laboratory Medicine.

Dennis Akins, a sophomore agricultural engineering major and president of Phi Eta Sigma, presented the certificate to Davis in appreciation of her serving as guest speaker at the society's induction banquet in March.

"Freshmen with a 3.5 grade-point ratio and 15 credit hours are eligible for membership," Akins said. "We'll contact the freshmen next semester who meet the requirements for membership and they'll be inducted in April."

The society's main project is its freshman tutoring service. The society keeps a card catalog in its cubicle in the Pavilion with names and phone numbers of tutors for all freshmen level courses.

"The tutors are here for the

freshmen," Akins said. "If you need help, call a tutor and they will find a time convenient for both to meet. Call or come by anytime."

Dr. Curtis Lard, Phi Eta Sigma faculty adviser, said the society also sponsors service projects like Christmas caroling and visiting nursing homes. The organization now is planning a Halloween party for local children.

"They certainly have a heart," Lard said. "The thing that's unique about it is they not only have

unique academic ability but they have an unselfish dedication to helping others. They've achieved well so they're encouraged to help others do well."

The society is planning a program to work with guidance counselors at local high schools to discuss ways for college students to counsel college-bound seniors.

Phi Eta Sigma inducted 364 freshmen last March and the society hopes membership will continue to rise.

Kilgore deaths were unplanned

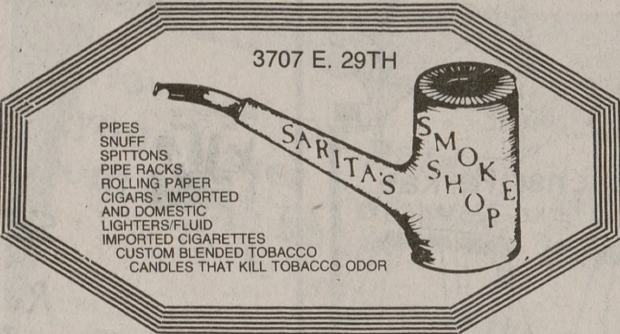

United Press International
KILGORE — It's unlikely the people who robbed a Kentucky Fried Chicken restaurant of \$2,000 planned ahead of time to abduct five people and shoot them to death on a dirt road south of town, a Texas Ranger said Tuesday.

In Louisville, Ky., where the restaurant chain's headquarters are located, spokesman George Reynolds said the \$2,000 reported missing from the east Texas franchise was more than would normally be kept in the till.

"Normally the employees are required to deposit the receipts in the bank more than once a day," Reynolds said "But we don't know whether any deposit was made that day."

Reynolds said he could not comment on whether the killers might have been tipped off about the undeposited cash in the restaurant.

Texas Ranger Glenn Elliott, participating in the two-county investigation, said although robbery appeared to be the main motive in the slayings Friday night, he felt the killers "knew at least one of the employees (victims)." Officials said more than \$50,000 in reward money had been collected for information leading to the arrest of the killers.

Police beat

The following incidents were reported to the University Police Department through Tuesday:

THEFTS:

• A blue Sears 10-speed bicycle from the Sbsia Dining Hall bike rack.

• A blue Puch 10-speed bicycle from the Davis-Gary Hall bike rack.

• A red Spartan 10-speed bicycle from the Hotard Hall bike rack.

BURGLARY:

• An Alpine stereo cassette player and an Alpine amplifier were stolen from a 1979 Chevrolet Caprice. The vehicle was parked in the student lot south of Mosher Hall.

• A five band Clarion equalizer was stolen from a 1979 GMC pickup. The vehicle was parked in the student lot southwest of Wofford Cain Pool.

• A Remington shotgun, Pioneer AM/FM cassette player, two Jensen speakers, shotgun shells, green tool box, assorted tools and a flashlight were stolen from a 1975 GMC pickup. The vehicle was parked in the student lot south of Mosher Hall.

OTHER:

• University Police found that the gate arm was broken to the reserved staff lot south of the YMCA Building.

E-Systems continues the tradition of the world's great problem solvers.

Even given the benefit of historical perspective, it is difficult to fully comprehend the enormous contributions to man's knowledge made by Sir Isaac Newton. His *Philosophiae Naturalis Principia Mathematica* is termed by many authorities to be one of the most important single works in the history of modern science. His studies of light are the foundation of physical optics and his laws of motion provided a quantitative description of all principal phenomena in our solar system.

Today, scientists and engineers at E-Systems employ Newtonian principles to develop products and systems for satellite communications, exploring

space and the development of solar energy, systems which are the first-of-a-kind.

E-Systems engineers are recognized worldwide for their ability to solve problems in the areas of antennas, communications, data acquisition, processing, storage and retrieval systems and other systems applications for intelligence and reconnaissance.

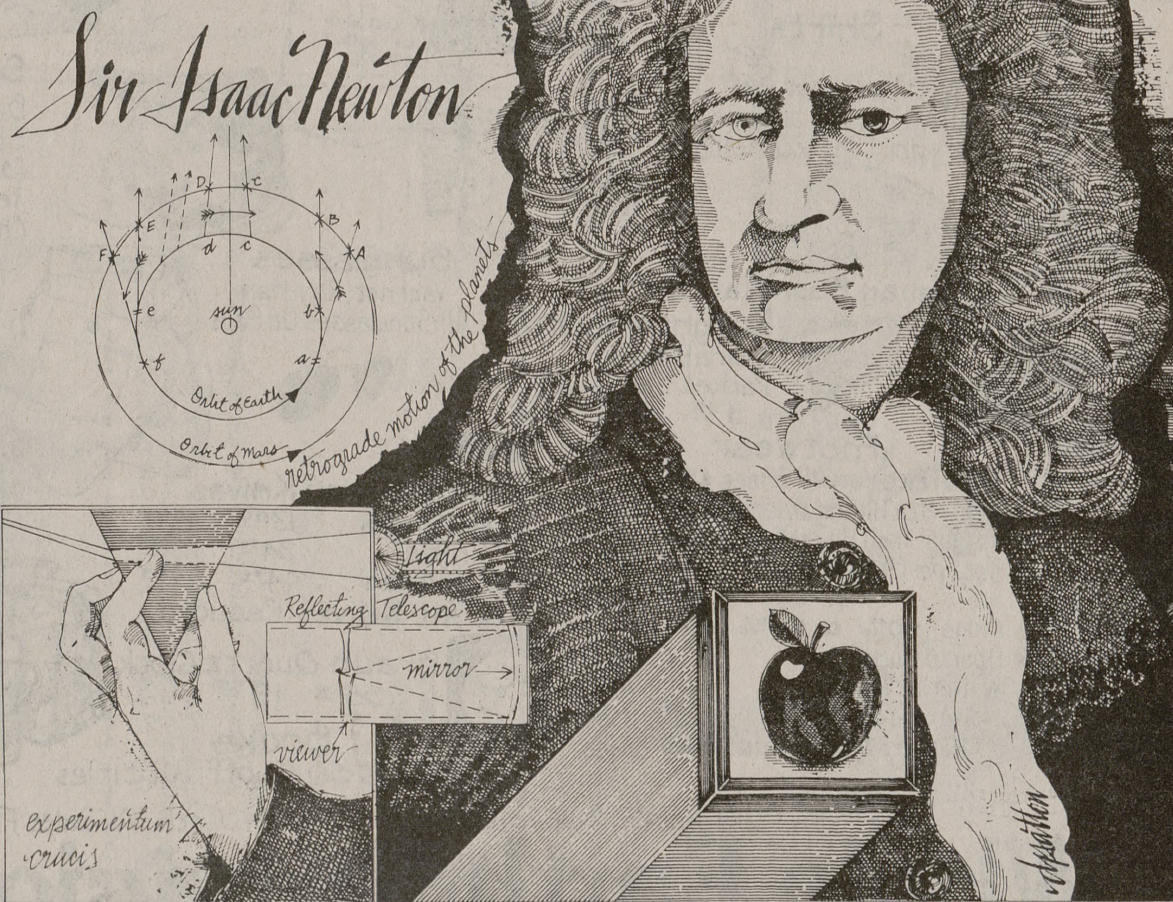

For a reprint of the Newton illustration and information on career opportunities with E-Systems in Texas, Florida, Indiana, Utah

and Virginia, write: Dr. Lloyd K. Lauderdale, Vice President Research and Engineering, E-Systems, Inc., Corporate Headquarters, P. O. Box 226030, Dallas, Texas 75266.
