## Alamo walls flaking; water may be cause be drilled and instruments will

**United Press International** SAN ANTONIO - An engibe inserted in each hole to measure the flow of underground neering firm will drill wells at water beneath the Alamo, he Alamo to determine if said. It is known that sub-surground water is the cause of face water exists beneath the crumbling and chipping discovbuilding, but Reid said the in-struments will determine just how much water is there. ered on the monument's walls. Charles Reid, marketing director for Dabney-Byrn Associates Inc., said Tuesday that drilling will begin today at each corner of the 250-year-old Alamo, whose defenders were killed by Mexican troops in 1836. monitored regularly.

Four 30-foot-deep holes will

no immediate danger of crumbling.

"Those walls are 3 feet thick, so we're talking about only a fraction of surface coming off," he said

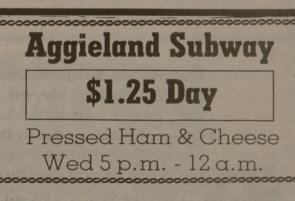

The Alamo Committee of the Daughters of the Republic of Texas, which manages the Further tests will be made on cores drilled from the walls themselves, and temperature in the server will be made on the server of the server and humidity readings will be months to a year, engineers will be able to recommend a course Reid insists the Alamo is in of action to the DTR, Reid said.

**ATTENTION MAY GRADUATES** 

# with Texas Instruments

**Career** Opportunities

Find out about exceptional business careers with Texas Instruments, the company that invented the integrated circuit, the microprocessor, and the microcomputer. Talk with Texas Instruments April 9 & 10 on campus. Appointments will be scheduled through the placement office.

You'll work with the Bipolar Digital Logic Project Customer Center, a large worldwide supplier of integrated circuits for computer, peripheral, telecommunication, industrial and customer markets. Activities will range from technology development, computer aided design, automated assembly and test and quality assurance to coordination of international production.

Financial Planner You'll consolidate, analyze, prepare and present financial data for monthly forecast reviews for a large integrated circuit division. Use of computer systems; reviewing impact of business decisions, developing intermediate and long range business plans, performing market or production analysis and other management studies will be involved.

Systems Analyst Position requires performing management systems development, modeling, financial analysis and computer programming for an integrated circuit production department. You'll design, develop and implement customer systems and act as an interface with department and corporate management systems activities.

Cost Engineer You'll prepare monthly P&L statements, management reports and presentations. Responsibilities include preparation of analysis of product line cost information for a broad range of integrated circuit products, using a standard cost system. You must establish labor, overhead, material usage and yield factors to develop standard costs. Production Planner You'll be responsible for monitoring sales backlog and developing production schedules for integrated circuit products. Defining, implementing and interfacing with computer systems will also be involved. Activities will include support of customer requirements, scheduling worldwide production facilities, inventory control, cost control and interface with engineering, manufacturing and marketing.

To qualify for all positions, you must have a BS/MS in finance, accounting, MIS, computer science/business, industrial engineering, or MBA. A grade point of 3.0 (4.0 scale) is preferred.

All openings are for our Sherman facility, where home is five minutes from work and Dallas is less than an hours drive. You'll enjoy a qualify of lifestyle in a city where culture, community activities and recreation abound.

If you are unable to attend our Texas A&M University interviews or would like more information about career opportunities with Texas Instruments. send your complete resume to: Staffing Manager/Texas Instruments/P.O. Box 84, M.S. 806/Dept. B/Sherman, Texas 75090.
