Police try to kill fear of crime

United Press International

HARTFORD, Conn. - Trial programs by police departments in Houston and in Newark, N.J., appear to have reduced fear of crime in even high-crime neighborhoods, officials at the National Sheriffs Association said Monday

Fear of crime and what to do about it was among 25 seminars for 1,500 sheriffs attending a five-day conference of the nation's largest law enforcement organization. President Reagan will deliver a

major law enforcement address Wednesday, the first president to appear before the 45,000-member association.

Fear of crime destroys the social life of cities and hurts business, said Sheriff James R. Metts of Lexington, S.C., but police can do something about it.

Police in the voluntary one-year programs in Houston and Newark succeeded in reducing community fears in four trial areas by knocking on doors, talking to residents, get-ting criminals off street corners and buses and getting other government agencies to help where possible, Metts said.

The National Institute for Justice spent \$74,000 to send two teams of sheriffs to the cities several times during the year to check on the progress.

Another \$1.8 million Police Foundation grant will be used to measure the programs' success with beforeand-after comparisons of crime rates and community fears in the target and control neighborhoods.

cember.

Newark evaluation team. "They took criminal prevention techniques and used them in the inner city where

effort on "public order enforce-ment," clearing loiterers from street corners, using radar to check speeding and using undercover police to reduce drug sales and purse snatch-ings on buses. They set up criminal detection road blocks in the neighborhoods and "mini precincts"

Gyms were opened for teenagers and juvenile offenders were diverted to community clean-up rather than detention. Police went door-to-

"increase the quality and quantity" of their contact with the public by opening police community centers, distributing neighborhood newsletters and organizing a neighborhood cleanup. They used off-duty police officers for the "direct citizen contact program.'

Around town

Defensive driving course begins today

The Brazos Valley Safety Agency will conduct a **defensive driv** ing course today and Saturday at the Ramada 1nn. The eight-hou course will be from 6 to 10 p.m. today and tomorrow. Students must attend both sessions. Registration begins at 5 p.m. at the Ramada lm or students can pre-register by calling 693-8178. Cost for the cours is \$20

The course can be used to have certain traffic violations dismissed or to get a 10 percent reduction in automobile rates.

Volleyball, basketball registration starts

The College Station Parks and Recreation Department is spo-soring an outdoor **Co-Rec Volleyball and Three on Three Bask-ball** program. Entries close Friday. The entry fee for volleyball is \$150 and for basketball it is \$90. Both seasons will begin July 9. For further information contact the College Station Parks and Rem-ation Department at 764-3773.

Students awarded Gulf Oil Scholarships

Two Texas A&M University students have been awarded Gul Oil Honor Scholarships. **Paula D. McCann**, a junior, petroleum en gineering major and **Christian J. Corley**, a junior, geophysics major were awarded the scholarships based on academic achievement and extracurricular activity.

The two-year scholarship provides for 80 percent of all tuition and room and board; provides an opportunity for summer employ-ment with Gulf between the junior and senior year and gives an unrestricted grant of \$1,000 to the school.

Embryos still frozen

United Press International

MELBOURNE, Australia — An Australian legal official recom-mended Monday that two "orembryos. phaned" test-tube embryos should remain frozen pending passage of legislation to determine if they to destroy the embryos or im them in the womb of a surro mother and let them develop to turity.

The embryos, conceived by the "in-vitro" fertilization method then They must also determ whether children who develop frozen in liquid nitrogen three years from the embryos could inherit ago, have stirred a legal and ethical Rios' estate. debate since it was revealed the couple that produced them, Mario and Elsa Rios, both of Los Angeles, had embryos was unclear. "They may died belong to anyone," he said.
