Landry to showdown with Ditka

United Press International
 DALLAS — If Tom Landry happened to be a betting man, which by all accounts he is not, he would, no doubt, have been willing to place a wager several years ago that this Sunday's coaching matchup in Chicago would never have taken place. And, of course, he would have lost the bet.

"When Mike Ditka first came to us I wouldn't have thought he could be a head coach," Landry said Tuesday. "He had a hard enough time being an assistant coach."

Ditka finished his playing career with the Dallas Cowboys and then became an assistant under Landry for nine years before becoming the head coach of the Chicago Bears.

Dallas and Chicago face off Sunday in what will be the first coaching meeting of Ditka and Landry, both bringing 3-1 records into the game.

"I have lots of respect for Mike," Landry said. "I may not have thought he would have been a head coach when he came to the Cowboys, but when he left us I knew he would be a good one."

"He has matured a lot as a person. His temper was the thing that caused him problems now and then."

"After we got through playing tennis his racket always looked like somebody had beat it up. But the players in Chicago understand him now. You can see that in some of the statements I see them making."

"They have learned to live with his temper and they are playing his kind of football."

Stories of Ditka's temper fill several volumes of underground Cowboys' folklore. During his days in Dallas he would prowling the sidelines, clipboard in hand, having his say early and often with the officials.

"There are a lot of things about my personality I don't want to rub off on my football team," Ditka said in a telephone conversation to members of the Dallas media Tuesday.

"But I want them to follow my approach to football and I think they have. They don't ask for any quarter and they don't give any. They are willing to lay it on the line."

"They have paid a price to get where we are. And that is not to say we are anything special. We got our rear beaten by Seattle last week. The Seahawks are a good team, but they are not on the level of the Cowboys. We are going to have to reach a new plateau to beat Dallas."

"I've Got It!"
 Members of the Texas A&M Rugby Football Club leap for control of a line-out during a practice last week. The team was practicing for last weekend's game against the Houston Heathens. The A&M's first side advanced their record to 2-0-1 beating the Heathens 28-6.

Gymnasts are not forgotten

United Press International
 NEW YORK — At the very height of their exhilarating triumph, while the sweat still was dripping down their bodies and Olympic medals shone brightly around their necks, members of the American gymnastics team issued an impassioned plea. "Don't forget us now," was the essence of the message that echoed from such as Bart Conner, Peter Vidmar and Mitch Gaylord. "We worked long and hard to achieve this success for America, and now we need the public to support us."

Almost two months following that plea in Los Angeles, the support has been overwhelming. "We've been on quite a whirlwind since the Olympics," Conner said Tuesday. "People are very much excited about gymnastics and they're keeping that Olympic fever on a real hot roll."

and people just grab me and say, 'You should have seen me sitting at home watching the TV and jumping up and down at what you were doing.'"

So supportive has the public been that an original Tour of America's Gymnastics Champions, a sellout at all four cities on the original schedule, has been expanded to include 10 more sites.

The gymnasts participating include Conner, Vidmar, Gaylord, Julianne McNamara, Kathy Johnson, Jim Hartung, Tracee Talavera, Tim Daggett and Scott Johnson from a United States team that won 17 medals at the 1984 Summer Olympics.

"We're happy to have the opportunity to go around the country and help promote gymnastics," said McNamara, who won a gold medal on the uneven bars and a silver in floor exercise. "There's been a tremendous excitement generated by this

tour, and this has provided a great feeling for those of us who have been involved in gymnastics a long time."

Vidmar, also a winner of an individual gold (pommel horse) and silver (all-around), added, "With the success we enjoyed in the Olympics we have the opportunity to promote this sport on a major level. The cities around the country have been doubling and tripling in size, and we couldn't be happier."

Although the gymnasts do not get paid from the proceeds of this tour, the money instead going to the United States Gymnastics Federation, the financial support they asked for in Los Angeles has been coming their way.

"A medal opens a couple of doors for you," reasoned Conner, a gold medalist on the parallel bars. "If you see you on television one time, it gives you that one good chance."

#1
Being tomorrow means being first today.

LH Research has attained its technological edge through a consistently impressive array of "firsts" in switching regulated power supplies. We've assembled a dedicated team of professionals who produce the innovations necessary to continue our unmatched record of "firsts."

As we've grown, so has our need for talented professionals. To maintain our position as first in the field, we rely solely on the commitment of our people. If you are bright, ambitious and have a true commitment to achievement, your BS degree in EE/ME/Physics and our 6 month to 1 year Training Program will qualify you for a challenging position as a Technical Sales Associate.

You'll be based in Dallas and work independently as you travel within the Southern region. And, we'll reward you with incentives as you achieve your own list of "firsts."

Go with the company that's first in power technology and opportunity... LH Research. We offer a competitive compensation and benefits package. Interviews will be held on campus on **Thursday, Oct. 18**. To arrange for an interview, please contact your Placement Office.
