

A calm in the wind

Photo by ANTHONY S. CASPER

Adjusting the supports used to hold the models being tested is all in a day's work for Kendall Ashmore, a senior aerospace major working at the Texas A&M Wind Tunnel. The wind

tunnel has recently been used to aerodynamically test new configurations for 18-wheelers and for safety in escapes from the space shuttle.

Porsche president speaks to finance, marketing classes

By KARI FLUEGEL
Staff Writer

Porsche President Peter Schutz will be visiting Texas A&M and talking to several business classes this week as part of the Visiting Executive Series.

Last year through the Visiting Executive Series, the College of Business Administration sponsored lectures by more than 80 executives. Schutz's visit also is sponsored by the finance and marketing departments.

Schutz, who has been president of Porsche since 1981, will speak to three business classes today and Friday.

Schutz presented two lectures today. First, he discussed "The Deci-

sion to Go Public" with a Finance 630 class at 9:30 a.m. in 156 Blocker. At 11 a.m. he discussed "The Marketing Philosophy at Porsche" with a Marketing 321 class in 102 Blocker.

On Friday, he will present one lecture to another marketing class at 10 a.m. in 102 Blocker. The topic for this lecture will be "Marketing the Porsche Image."

During his visit, Schutz will meet with business faculty and students. He also will present informal seminars to selected business faculty and doctoral students.

All students are invited to attend the lectures.

Guatemalan weaving to be exhibited in MSC

By ADA FAY WOOD
Reporter

The Memorial Student Center Arts Committee is sponsoring an exhibition entitled "Native Weavings of Guatemala." The showing is scheduled to run from Oct. 12 through Nov. 18 in the MSC Art Gallery.

A Guatemalan weaver will demonstrate backstrap looming on Oct. 10 and Oct. 11 from 11 a.m. to 1 p.m.

Also, lectures explaining the exhibition will be Oct. 11 from 7:30 p.m.

to 9:30 p.m. in Rudder Forum. A reception will follow in the MSC Art Gallery, located on the main floor of the MSC.

Speakers will be Joe Hutchinson from the Environmental Design Department, Dr. Norman Thomas from the Anthropology Department and Linda deBarrios from Museo Ixchel. Their lectures will focus on textiles, folk art and its influence on the art of Guatemala.

For information, call Theresa Chiang at 845-1515.

Professor new president of Texas parks society

By KIM JENSEN
Reporter

The Texas Recreation and Parks Society has a new president and Texas A&M professor John L. Crompton has another plaque to add to his already crowded wall. Crompton was elected last week as president of TRAPS for 1984-1985.

TRAPS is a state-wide professional organization of 1,200 leisure coordinators, program directors and middle management advisors in the recreation and parks field, Crompton said.

A student branch of TRAPS helps recreation and parks majors make job contacts and prepare for employment opportunities after graduation, he said.

Glen McDaniel, a senior RP major from Houston, is this year's state vice president of the 80-member student delegation.

Crompton and McDaniel were elected to their one-year terms at the TRAPS state convention in Fort Worth last week.

Crompton is a registered professional — a status only 10 percent of the TRAPS members achieve.

Only registered professionals are eligible for TRAPS state offices, Crompton said. The registration process includes passing research and objective exams and undergoing a series of interviews.

The University's RP program is

recognized as one of the finest in the state, he said. There are only eight RP departments in colleges and universities in Texas.

Crompton said his election as TRAPS president will bring further visibility and credibility to A&M and the RP program. As a result it will be much easier for the department to place graduates in top-paying jobs, he said.

Crompton, a businessman in England during the 1970s, came to the United States 10 years ago for graduate study work.

The Englishman kept his British accent, but not his homeland ties. He became a United States citizen in 1982.

NATO alliance to be subject of discussion

The Supreme Allied Command Atlantic will give a presentation to the Texas A&M Naval ROTC unit on Thursday at 5 p.m. in Rudder Auditorium.

A NROTC spokesman said the presentation will cover how the NATO alliance developed. Also discussed will be the organization and administration, the Soviet threat, and NATO's answer to that threat.

Students, faculty and staff are invited to attend.

Council to hear bids on office renovations

The College Station City Council will consider bids for renovation of the Municipal Building at its regular meeting in city hall at 7 tonight.

Office space in two older sections of the building will be redone to accommodate five city departments, City Manager North Bardell said.

The council also will consider a request for reimbursement for street construction by a developer in the Emerald Forest subdivision.

The city requests that streets in a subdivision meet its specifications, but College Station reimburses a developer for costs incurred by meet-

ing those specifications.

The council has not included in its agenda any discussion of railroad crossing at Luther Street, the site where two Texas A&M students were killed in two unrelated car-train collisions about two weeks ago.

Any discussion of the crossing would come up during the time the council has set aside to hear from visitors, Bardell said.

At the meeting, the council also will designate Oct. 12-13, 1984 as "Brazos Bohemianfest" in College Station, and it will consider two final plans.

OFF CAMPUS AGGIES Bonfire

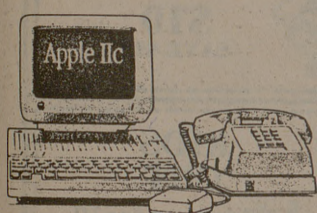

First Cut Sat., Sun Oct. 13 & 14

Meet at Duncan Field at 8:30. Leave at 9:00 am
Bring Lunch, Wear Boots
Equipment Provided
