ENGINEERING AND TECHNICAL GRADUATES

DISCOVER INTEL'S TECHNOLOGY LEADERSHIP

Intel. The microelectronics leader. Responsible for such technological "firsts" as RAM's (Random Access Memories), EPROM's (Erasable Programmable Read-Only Memories), microprocessors, single-board computers, microcomputer development systems and million-bit bubble memories. Intel's formula for success combines resources, objectives, people and a company philosophy that inspires and rewards excellence.

We know you've worked hard to make yourself the best you can be... So have we. You deserve nothing less than the best... We accept nothing less than the best. We have a lot in common... If you're looking for a chance to achieve "firsts" of your own, invest your education at Intel... the leader in microelectronics and careers.

If you are unable to meet with us, please contact Intel College Relations at the location of your choice:

- Arizona: 5000 West Williams Field Road, Chandler, AZ 85224
- Santa Clara, California: P.O. Box 3747, Santa Clara, CA 95051
- Sacramento/Folsom, California: 151 Ravine Road, Folsom, CA 95630
- New Mexico: 4100 Sara Road, Rio Rancho, NM 87124
- Oregon: 5200 N.E. Elam Young Parkway, Hillsboro, OR 97124.

B-CS police investigate surge in sunroof thefts

By TRENT LEOPOLD
Staff Writer

Both Bryan and College Station police said Monday they are continuing their investigation into recent T-top thefts, and they are encouraging car owners with T-tops to make stealing them more difficult.

The best advice police can offer now is to secure the sun roof panels with locks to make it harder for thieves to steal them.

More than 20 of the sun roof panels were reported stolen in College Station and Bryan in January, and three more sets were reported stolen early last week.

Bryan Police Sgt. Choya Walling recommends owners of T-tops adequately secure the panels to prevent theft.

"The best thing to do is get a lock for the panels," Walling said. "After they get a lock they should then get an alarm to supplement the lock."

Walling said too many people use alarms and don't have a lock.

"The alarm may go off when someone breaks in to steal the T-top, but that person can be gone in a matter of minutes," he said.

The first thefts, reported during the week of Jan. 14, came from cars parked on or near Spring Loop in College Station. Police patrols were increased in that area to prevent further thefts.

Twelve more of the sun roofs, valued at \$7,250, were reported stolen a week later.

Three of the cars were parked in the 400 block of Anderson Street,

two on Southwest Parkway, on Longmire Drive and one on House Drive, police said. Two cars also were taken from a parking lot in Bryan.

Then, early last week, three of the T-tops were reported stolen. The T-top panels were stolen from a 1984 Chevrolet Z-28 parked at Holleman Drive, a Chevrolet Corvette parked in the 400 block Glade Street and a car at Jim Williams Motors, 2100 S. Texas Ave., Bryan.

The window nearest the driver's seat was broken in all three cars and the panels could be taken.

Walling said the panels are sold somewhere, but investigators have been unable to pin down the location of the illegal market.

Miss Texas A&M will speak at next Sully's Symposium

By REBECCA ADAIR
Reporter

1984 Miss Texas A&M Kim Walters will join the ranks of Sully's Symposium speakers Wednesday at noon.

Walters will answer questions about her experiences as Miss Texas A&M and attempt to correct many misconceptions about pageants and participants.

Walters will also pinpoint the functions of the MSC Hospitality Committee, the pageant's sponsor. The committee is considering the effect of the pageant on the University

as a whole, and whether the \$24,000 or so spent on the pageant is worth it.

Walters said she intends to make several points in favor of pageant participants, including the fact that no winner has ever had a grade-point ratio of less than 3.2 overall, including recent winner Sherri Ryman who posted around a 3.8.

Talent accounts for 50 percent of the judging. Beauty is not as significant as popular opinion holds, and judging is based more on poise and appearance, not facial beauty. Walters said the swimsuit competition is

mainly used to judge physical fitness.

"You don't have to be 36-34," she said. Walters said the winner is ideally the all-American girl: intelligent, talented and proud enough to be physically fit.

Walters emphasized the importance of the interview in judging. Mock interview helps determine finalists, and finalists are interviewed the morning of the pageant.

Miss Texas A&M 1985 will be crowned February 23.

Festival of avant-garde film, video starts tonight in Blocker Building

By JENS KOEPKE
Reporter

Avant-garde film and video arrive at Texas A&M today during the Sixth Annual Aggie Independent Film and Video Festival at 7:30 p.m. in 158 Blocker Building.

"I want to see a wider exposure of independent films and videos to students, faculty and staff at Texas A&M and to the community," said Larry Hickman, A&M philosophy professor and organizer of the festival.

"There's a lot of nice and interesting works that people don't get to see because they're not commercial," he said.

Hickman said the festival is an attempt to develop the public's understanding of the effects of different types of media, especially film.

"Interface" by A.C. Anderson, "Go For It Mike" and "It Starts At Home" by Michael Smith, "Music For BBs" by Michael Galbraith, and "Made For TV" by Ann

Magnuson and Tom Rubnita will be shown at the festival. The works will be introduced by Marian Luma, director of exhibition for the Southwest Alternative Media Project.

A program of seven videos and films will be shown followed by a question and answer session with Steve Segal, director of one of the films shown, "Futurepolis."

The festival is sponsored by the Department of Philosophy, University Art Exhibits, the Department of Environmental Design and the College of Liberal Arts.

The Aggie festival is the first stop on the seven-day Southwest Film/Video Tour, a series organized by the Southwest Alternative Media Project under the Texas Commission on the Arts' Touring Arts Program.

The Southwest Alternative Media Project, located in Houston, is a nonprofit media arts center funded by the National Endowment for the Arts, the Texas Commission on the Arts, and the Cultural Arts Council of Houston.

Regents

(continued from page 1)

firm, was picked to fill the seat left vacant by retiring Regent Norman Moser.

White also chose 49-year-old L. Lowry Mays to take the place of Regent Clyde Wells, who served on the board for four terms, a total of 24 years.

Royce Wisenbaker, 67, senior partner in a Tyler engineering firm, will serve his second six-year term as a regent. The terms of all three men will expire in 1991.

Mobley, class of '51, said Monday he did not expect to be appointed to the board, and that he has no "agenda of my own for the regents."

"I haven't been thinking about specific changes I would want to make as a regent," he said. "I want to work for the good of all the constituents of the University."

Mobley said he is devoted to A&M.

"There are many things about it that are special to me," he said. "The thing that always impressed me most about A&M was that it provides students with an opportunity for as fine an education as possible."

Mobley has served on the board of directors for the Association of Former Students, and also is a member of the Target 2000 committee.

Wisenbaker said Monday he was a "little surprised at being nominated, but I wasn't having a fit about it."

He said he will continue to work at trimming the Texas A&M University System's budget.

"That's going to be our biggest problem," Wisenbaker said. "We

can't spend more money than we have."

Wisenbaker said he thinks Mays is a good choice for the board.

"He's a very fine, intelligent man," he said. "I think he'll make a good regent."

Wisenbaker said he did not know Mays, who was unavailable for comment Monday.

Mays, 49, graduated from Texas A&M in 1957 with a degree in petroleum engineering. He is president of Clear Channel Communications, which owns San Antonio radio station WOAL. Mays has served on the University's visual arts committee and the Memorial Student Center Council.

Mayors oppose new billboard legislation

Associated Press

AUSTIN — Mayors of several Texas cities said Monday they oppose any state billboard legislation because they say the signs create vi-

sual pollution.

Bryan Mayor Ron Blatchley called some billboard ordinances "ridiculous."

"I don't disagree with the visual pollution but I'm afraid it's gone in the opposite direction in some cases," Blatchley said.
