Brat to beauty

Gigi undergoes transformation in Rudder

By SARAH OATES

"She's a scamp, she's a brat, she's completely undesirable to men..."

Those three lines are nearly correct, at least for the first half of "Gi-

However, by the second half of this Lerner and Loewe musical, it is the grand coquette. Gigi's grandobvious that Gigi has changed from a brat to a beauty.

"Gigi" is a lovely 16-year-old Parisian girl who unfortunately is "backward for her age" — much to the frustration of her ambitious aunt and grandmother. They are grooming her to become a kept woman, one of the most desirable stations in life for a woman in turn-of-the-cen-

However, innocent as she is, Gigi has her own ideas about love, and stalwartly refuses to settle for anything less than marriage to the man Aside from being an old family friend, Gaston also is one of the most jaded and notorious playboys in David-Michael Benson also was

The characters in this charming play learn important lessons about love as they attempt to mold Gigi gi,"presented by MSC Town Hall Broadway to a full house in Rudder Auditorium Thursday night.

Into something she is not. By the end of the play, Gaston has realized he can only be happy if he is married to Gigi, the real, rough-edged Gigi, not mother and aunt have learned that perhaps they needn't have worked so hard training her to play at sophistication.

Canadian actress Lisa Howard was well-received by the audience in the title role. As Gigi, she was both poignant and funny, especially when singing "Say a Prayer for Me To-night," after she has just consented to be Gaston's mistress.

Taina Elg and Betsy Palmer gave humorous performances as Gigi's scheming grandmother, Mamita, and her aunt, Alicia. They each of her dreams, Gaston Lachailles. managed to convey great love for cal.

believable as the ultimately bored Gaston, who has Paris at his feet, but doesn't know what to do with it.

But the most enthusiastically received performance of the show was by Louis Jourdan as Gaston's de-lightful, rakish Uncle Honore Lachailles, who narrates the play. He also is a former lover of Gigi's grand-

Jourdan originally starred as Gaston in the 1958 movie version of "Gi-

The music was one of the highlights of the play. Jourdan's rendi-tion of "I'm Glad I'm Not Young Anymore," and "I Remember it Well," his duet with Elg, drew tremendous applause.

The entire cast received a standing ovation during their curtain call, during which they reprised "Thank Heaven for Little Girls," one of the most famous songs from this musi-

ATTENTION

August and December Grads in Electrical Engineering, Computer Science, Mathematics, and Slavic, **Near Eastern or Asian Languages**

The **National Security Agency** has professiona career opportunities for you.

Electrical Engineers: Work with a team of dedicated professionals developing advanced communication security and foreign signals intelligence collection and processing systems. From antenna and receiver under computer control through sophisticated software demodulation and worldwide intercomputer networks into advanced analytic data bases. Specialize in-depth, or span the complete range of exotic electronic information technology from propagation medium to target analyst. RF, microwave, millimeter wave, and optical system development; complete microelectronic design, febrication, packaging, and test facilities. Opportunities ranging from fundamental research through advanced development, small to large system design and prototype development, developmental test and evaluation, field installation, and operational support. Unparalleled variety, challenge, and internal mobility for

maximum professional development and satisfaction. Candidates with a 2.5 or above GPA are preferred.

Computer Scientists: Our computer scientists work with electrical engineers and mathematicians across the frontier of finite state machine development and applications. Microprocessor applications, massively parallel architecture development, hyperfast numeric algorithm development, unique bit-slice based subsystem applications, knowledge-based systems, and every language from microprocessor machine code through Ada.

Candidates with a 3.0 or above GPA are preferred. Mathematicians: Mathematicians at NSA use advanced concepts to solve cryptologic problems and to help develop and evaluate code and cipher systems. The unique nature of our cryptologic mission gives vitally important practical applications to mathematical concepts usually considered purely theoretical.

Candidates with a 3.0 or above GPA are preferred.

Language Specialists: If you are proficient in a modern Slavic, Near Eastern or Asian language, we can provide career challenges that make full use of your language skills. You will be using the language constantly, exploring its nuances in depth. Few careers, even in academia, put your language skills to more steady and demanding use.

Candidates with a 2.5 or above GPA are preferred.

Salaries are competitive with private industry and for most of these positions, start in the mid-to-upper, 20's for qualified candidates. Full federal fringe benefits apply. Entry positions are located in suburban Maryland, midway between Baltimore and Washington, D.C.

For additional information, contact your Career Development Center.

Interested individuals should send a detailed resume to: National Security Agency ATTN: M322 (AD)

Fort Meade, MD 20755-6000

An Equal Opportunity Employer U.S. Citizenship Is Required.
