St. Louis takes 2-0 lead in World Series

Associated Press

KANSAS CITY, Mo. - Terry Pendleton turned from defensive hero to offensive hero Sunday night with a three-run double in the ninth inning that gave St. Louis a 4-2 victory over the Kansas City Royals and a 2-0 lead in baseball's 82nd World Series.

Pendleton's two-out double capped a four-run inning off Royals' left-hander Charlie Leibrandt, who carried a two-hitter into the inning

It put the Cardinals in commanding position to win their second Series in four years.

Thirty-five times, teams have won the first two games in a Series, and 27 times, they have gone on to win.

Game 3 will match Cardinals right-hander Joaquin Andujar, 121-12 during the season but largely ineffective the past month, against the Royals' ace, 21-year-old right-hander Bret Sa-

berhagen, 20-6. Willie McGee started the rally with a double down the left field line, only the third hit off Leibrandt. But McGee had to wait at second while Ozzie Smith grounded out and Tommy Herr flew out to shallow right.

Jack Clark, whose two-out, three-run homer in the ninth inning beat the Los Angeles Dodgers on Wednesday and gave the Cardinals the National League pennant, took three balls before he finally found one he could hit. He pulled it into left field between third and shortstop, scoring McGee with the first run of the night for St. Louis

Tito Landrum followed with a bloop double just fair down the right field line, sending Clark to third, and Ceasar Cedeno was

Cards win Bears show Aggies they're 100% Cotton

By BRANDON BERRY

Sports Writer The green and gold motto located directly beneath the press box in Baylor Stadium said, "This Is Bear

Country The Baylor defense believed it BU quarterbacks Cody Carlson and Tom Muecke believed it. And, in the final moments of the Bears' 20-15 victory over Texas A&M, the officials believed it.

"You have to congratulate Baylor," A&M Coach Jackie Sherrillsaid. "They played very well. They hung in there when they fell behind and came back and won the game. But this game was lost in as many

ways as it was won. The Aggies were penalized four times for 40 yards, threw three interceptions and lost two fumbles.

The record-setting A&M offense. which led the Southwest Conference with an average of 460 yards per game, sputtered through the first three quarters, coughed its way to three points at the beginning of the fourth quarter and died from neglect in the closing moments of the

"We didn't produce," A&M offen-sive guard Doug Williams said. "We can't kick field goals. We have to score touchdowns.

In recent weeks, that statement could have been pertaining to the in-consistencies in the A&M kicking game. If the offense didn't score touchdowns, the offense didn't SCOTE

However, junior kicker Eric Franklin enjoyed his most productive game of the season by hitting all three of his field goal attempts.

The problem with Franklin's ac-curacy Saturday night was that the Aggies had no other functional weapons.

A&M quarterback Kevin Murray suffered through his worst statistical performance in an Aggie uniform. He completed only 13 of 35 passes for 132 yards and was intercepted three times

Craig Stump, who replaced Murray with 2:35 remaining in the third

fared almost as poorly against the Bears as his predecessor, misfiring on all three of his pass at-

In fact, the only touchdown on the Ags side of the ledger came on a 40-yard interception return by A&M safety Kip Corrington.

Despite all the duds in the usually "firecrackery" A&M offense, the Ag-gies actually took a 15-14 lead with 13 minutes remaining in the game on a 40 yard Franklin field goal. The score consummated a 57 yard drive, highlighted by a 16 yard scramble by Stump on third down and nine.

But then the Bears began a 75 yard, 16 play odyssey that wound through the Aggie defense and ended on the scoreboard over seven minutes later.

Baylor converted two third downs on the drive, one of which was of "Mission Impossible" yardage, and scored the go-ahead TD on a fourthdown-and-inches play.

But facing an earlier third down and 25, it seemed Ralph Stockemer, the Bears' short yardage running specialist who scored the game-winner, would have been sitting safely on the bench with the rest of the Baylor offense, contemplating what should have been a Terry Siler field goal.

Someone forgot to tell the B'J's Muecke, however.

Baylor's senior signal-caller passed complete down the right sideline to wingback Glen Pruitt, who had worked his way open behind Corrington.

Six plays later, the Bears were in the endzone and the driver's seat.

"That was a big turning point in the game," Corrington said, "but Baylor made the big plays and it was a hell of a big break for them. But you kind of make your own breaks.

BU's Carlson said, "I know this sounds corny, but even when we needed 25 yards, we knew that somehow we would get it. A team of destiny makes its own breaks and that's what you saw tonight.'

Some of the other breaks that

went the Baylor's way included a questionable pass interference call in the first quarter, a Jimmie Hawkins fumbled punt in the third quarter and a Roger Vick fumble on the Bears' 3-yard-line, when it appeared the Aggies were finally ready to cross the goal line instead of the goal posts.

Miraculously, the Aggies could have actually made the Baylor road a little bumpier in the closing mo-ments, but the most controversial call in a game of controversial calls came on a roughing-the-kicker penalty against A&M with less than two minutes left.

A&M's Matt Gurley raced through the Baylor line and at-tempted to block Buzzy Sawyer's punt, but instead fell into Sawyer's leg. The Aggies claimed Gurley was blocked into the kicker by a Baylor player, but the Bears received a first down and were able to run out the clock without running any more plays.

And the Bears knew they were out of the woods and able to start talking Cotton Bowl.

"We can't hide it anymore," Teaff said. "We've got the kind of team that will rise to the occasion. We're a long ways yet, but this is one step closer than we were last week when we defeated SMU.

Sherrill reduced the game to its most essential elements.

"The big plays — they made them and we didn't," Sherrill said. "we just didn't throw and catch the ball and that's something you have to do in a game like this. We finally got it going in the third quarter but our offense didn't do anything to take the pressure off our defense.

We will bounce back from this and hopefully be ready to play next week

And the Bears?

"We're a hundred percent Cot-ton," taunted a Baylor player to the Aggies after the game. " 'Cause we believe." And that seems to be doing the

trick - in "Bear Country," at least

ENGINEERS & SCIENTISTS

Work with experts in your field. Continue your education. Travel. And contribute to vital national and international efforts while you advance your career in a state-of-the-art environment.

CIA . . . your formula for a career that makes a difference

- Military technology
 Nuclear energy and weapons
- Nuclear proliferation

purpose weapons

- Offensive and defensive strategic weapons systems Tactical and general
- Antisubmarine warfare
- Space systems
- Technology transfer

NC)

Join our efforts at the CIA and find out what it's like to have a career that really makes a difference. Salaries are competitive and we provide complete benefits.

CAMPUS INTERVIEWS

Wednesday & Thursday, November 6 & 7 Sign up in the Placement Office now.

> If an interview is inconvenient at this time, send your resume to:

> > **Recruitment Activity Officer** Department S (M72) P.O. Box 50611 Dallas, TX 75250

Where can you find an organization that builds all these opportunities into your professional life? Only at the CIA. We are seeking Mechanical Engineers interested in aerodynamics and weapon system analysis, Aeronautical Engineers, Electrical Engineers, Computer Scientists, and Physicists at all degree levels to join in our effort to provide senior U.S. policymakers with assessments of foreign high-technology and TELLIGENCE military systems.

This is a challenge that demands the right individuals. If you measure up, we'd like you to conduct research and analysis of foreign capabilities in the following areas:

Scientific policy
Physical and life sciences

The CIA is an equal opportunity employer. U.S. citizenship is required.
