#### **Associated Press**

HOUSTON — Texaco Inc., try-ing to invalidate a record \$10.53 billion judgment, argued Thursday that Pennzoil Co. was not entitled to a penny but should get no more than a allempt to

Pennzoil attorney Joe Jamail, referring to recent comments by Texaco that the award threatens its exis-tence, asked that the Houston-based company be given the entire amount "based on the evidence and not contract and impose a heavy judgment."

Whatever size Texaco is or is not, an amount like that is not just large, it is not just massive," added Texaco attorney Richard Keaton. "It is dan-gerous and irrational and not supnot sup

## Opposition may support widow Aquino

MANILA, Philippines - The long-divided political opposition ap-peared Thursday to be uniting be-hind the presidential candidacy of Corazon Aquino, the widow of assas-sinated opposition leader Benigno

Aquino. Meanwhile, the Supreme Court agreed to hear nine separate petitions appealing for cancellation of the Feb. 7 special election called by President Ferdinand E. Marcos.

Marcos indicated he might agree to participate in a nationally tele-vised debate requested by Mrs. Aquino: "My conversations with ladies have always been pleasant, and I presume I will survive this encounter," he said.

Aquino blames Marcos for the Aug. 21, 1983, assassination of her husband and for the acquittal Mon-day of 26 men accused of complicity in the killing.

Until Aquino was gunned down at Manila airport when he returned from three years of self-exile in the United States, many thought he might be able to defeat Marcos in an

Most observers said if more than one opposition candidate split the anti-Marcos vote in the election Marcos vote in the election scheduled for February, Marcos' victory would be assured. Presidential aspirant Salvador H.

Laurel said he and Aquino will jointly announce the name of the single opposition candidate Sunday.

We will make a very important announcement as to who will be the official candidate of the united opposition . . . to topple this unwanted and repugnant regime," Laurel said. Aquino, expressing surprise at Laurel's statement, declined to say if

she would join him. "Let's wait until Sunday," she said. But Aquino said she would only run for the presidency. She said ear-lier she had offered the vice presi-dence to Loured

dency to Laurel.

"I have been perceived as the uni-fier, and many have indicated they would only give way to me," she said, referring to other presidential aspi-rants who now support her. "I don't think it would solve anything in this country for me to run as (a candi-

date for) vice president." Aquino said Wednesday she did not expect it would be easy to oppose Marcos in an election. She also said that she would try to solve a growing communist insurgency by negotia-tion "so that all of this fighting and killing will stop." The government says an average of 10 people are killed each day from fighting. Aquino said she eventually wants

to remove U.S. bases from the Philippines, but she said no other foreign power should be allowed to have bases in the islands.

## NASA's Beggs claims he'd do it all again

#### **Associated Press**

SPACE CENTER -Administrator James M. Beggs, on the first day of a leave of absence, told agency employees Thursday that federal fraud

charges against him "are baseless'

and that he expects to be cleared. "There is nothing that I did in

the case involved that I would not

do again if I had to do it over

again," Beggs said in a closed-cir-

cuit television appearance beamed to all centers of the Na-

tional Aeronautics and Space Ad-

Beggs, who was executive vice president of General Dynamics

Corp. before he took the top post at NASA, was indicted Monday

with the company and three of its

officials on charges they de-

Il do anything take over Getty Oil Co.

Visiting State District Judge Solomon Casseb Jr. must decide whether to accept, reverse or reduce the award, the highest civil judgment in U.S. history. The hearing was to continue Friday, and it was uncertain whether Casseb would rule from the bench immediately upon conclusion or take the matter under advisement

A jury ruled Nov. 19 that Texaco illegally persuaded Getty Oil to break a previous merger agreement with Pennzoil. Texaco purchased Getty Oil for \$10.1 billion early last year

Jurors recommended Texaco pay Pennzoil \$7.53 billion in actual damages and \$3 billion in punitive dam-

"They didn't like what the jury

did, so now they've launched a media blitz, a propaganda campaign to try to strike fear in the nation's judi-cial system," Jamail said.

"If justice depends on the amount of damages, then we're doomed," Jamail said

But Texaco attorneys argued that "astronomical" judgment, if the upheld, would hamper American free enterprise and destroy the na-tion's third-largest oil company.

"When you have big, public com-panies being sold, you should have as much competition as possible," Texaco attorney David Boies said. "But some may not want to compete because some jury may conclude that despite all the evidence, all the research, the assurances, will find a ported by the law.

Texaco argued Pennzoil is entitled to "damages of zero" but insisted the maximum award should be about \$500 million, the differ-ence between the \$112.50 a share price Pennzoil offered for Getty stock and the \$128 a share Texaco paid.

If the judge upholds the \$10.53 billion award, Texaco can seek another jury trial and appeal the verdict.

But Texas law requires that if defendants appeal a damage judgment, they must post a bond in cash or liquid assets equal to an award, plus attorneys' fees and interest.

Texaco's appeal bond would total See Testimony, page 12

## Credit easing holiday shopping

#### **By PAGE PATTON** Reporter

People sometimes have a tenncy to overindulge during the hol-ay season in food, drink — and

"Before you start charging nristmas items, it's a good idea to st an eye on your budget," says Dr. larjorie Smith, a family economics cialist with the Texas Agricultu-Extension Service.

"See how much you can afford to end, and then decide on how uch you want to spend," she says. Smith says that if people can arge less than 20 percent of their onthly take-home pay, they can ay out of danger with consumer

"People tend to look at one purase independently and say 'I can ford that,' and they run over the percent," she adds.

nother hint Smith gives consumis to establish an emergency

Classified "The emergency fund should be equal to three months living expen-

ses," Smith says, "and this should be established before you commit yourself any further.'

She adds that with the emergency fund people can pay any unexpected charges that come up, and they can anticipate during the year the sum they will need for Christmas gifts.

Smith reminds consumers that they don't have to buy the most expensive gifts, and they can make some presents.

"There is a lot of influence on people today from advertising and society for them to buy material goods," Smith says. "It has not been determined whether you buy more if you have a credit card, but it may influence when you buy something."

If people have no money when entering a store, but see something they want, it is easier to buy it on credit than wait until the money is available, she says.

'Credit cards have definitely made impulse buying easier," Smith says. "And society has the attitude of 'If I buy it now, I'll be so much happier

Dan Hagan, operating vice presi-

dent of Foley's in College Station, says 70 percent of the purchases kept. made at Foley's are made with

credit. According to Clark Petty, operational manager of Dillard's in Col-lege Station, Dillard's also has 70 percent of its purchases made on credit.

Hagan adds that the average transaction at Foley's is between \$35 and \$40.

Smith recommends that, when shopping around town, make sure carbons are torn up or destroyed.

"This is an easy safeguard people can do to protect themselves," she says

Smith also suggests that consumers watch their large purchases made on credit.

"With most cards you can pay a minimum balance," she says. "If you have a large total, you end up paying interest for awhile before you pay off the major part of the principal."

Smith says she thinks credit is helpful and convenient, but adds that it's easy to get in debt or other

difficulties if proper records are not

"It's a better habit to try to save money and pay cash for things," Smith says. "It will at least save on interest charges."

## Clayton Act revisions proposed

#### **Associated Press**

WASHINGTON - President Reagan's Cabinet has recommended an overhaul of one of the nation's basic antitrust laws - the Clayton Act - to ease standards on corporate mergers, particuarly for imort-injured industries, administration officials said Thursday.

Under the proposal, firms able to demonstrate heavy losses from overseas competition could apply for an exemption of up to five years from merger-restricting provisions of the 71-year-old act, the officials said.

The package of proposed amend-ments, initiated by Commerce Secretary Malcolm Baldrige, also would relax standards on mergers in gen-

eral, as well as sharply scale back penalties for some antitrust violations.

Baldridge claimed the current law - which bans certain proposed mergers in advance - hinders U.S. firms in foreign competition.

He said the thrust of the proposed changes would be to allow mergers that would increase an industry's competitiveness.

Baldrige said that under current law, the government has only two options for dealing with an industry that pleads injury from imports: give it assistance in the form of tariffs or quotas, or turn down its petition.

The package before the president is a slightly toned down version of an

pletely exonerated of the charges.'

Beggs contended that suits against defense contractors are creating a climate that will blight the work of NASA and of the defense community.

'The very adversarial relationship that is being created by the suits against the contrac-tors, the very bad kind of statements that are being made in the press, and elsewhere, is going to make our job in the future much more difficult," he said. Not just here, but in the Defense Department as well.

In what he called "a message for the press," Beggs said, "I surely hope that when I am exonerated, they will pay the same attention to that story that they

have paid to this story." Beggs said he has full confidence in William R. Graham, who

will be acting administrator while Beggs takes a leave of absence. He said Philip E. Culbertson, an associate administrator in charge of the space station development, will assume the additional title of general manager to assist Graham.

earlier Baldrige proposal which would have flatly repealed the sec-tion of the Clayton Act — section seven - requiring advance Justice Department review and approval of mergers.

The final version, endorsed by Attorney General Edwin Meese III, will be submitted to Congress as a legislative package with the Justice Department's blessings if approved by the president, said Mark Sheehan, a Justice Department spokes-

The proposed revisions would not exempt industries from price-fixing provisions of antitrust law, according to B.J. Cooper, a Baldrige aide.
