

## The New Macintosh Plus Never Runs Short On Power.

Introducing Macintosh™ Plus, the faster more powerful business computer from Apple. Macintosh Plus offers several new features to provide the kind of performance business demands.

Features like a new keyboard, complete with numeric keypad; improved system speed that operates twice as fast; and a standard 1-megabyte memory—expandable up to 4-megabytes. And, with the new Apple® Hard Disk 20, you can store up to 20-megabytes of information and retrieve it up to three times quicker. That's important for fast performance of large-scale spreadsheets, longer documents, and massive databases.

We're in business with Macintosh Plus

## Designers Have More Flexibility

With Our New Macintosh Plus!

If you are responsible for designing comprehensive layouts for your company, then our Macintosh™ Plus Designers package is for you.

The core of the system is Macintosh Plus—the faster, more powerful business computer from Apple. Add the sophisticated graphics package and you can create illustrations, graphs and text—easily and freely. And, for organizing, altering and pasting-up your creations, there is a powerful page composition program that's an ideal time-saver for design work.

What's more you can store and retrieve your designs three times faster with Apple's new Hard Disk 20. Then print them in near-typeset quality with Apple's new LaserWriter™ Plus printer.
