

# Restaurant Report

(continued from page 1)

## SCORED BETWEEN 80 AND 84:

● Youngblood's Restaurant at 3410 S. College Ave. in Bryan was inspected by David Plett. Score — 80. A five-point violation in the report was given because some food was being served at the wrong temperature. The report showed a four-point violation for improper handwashing facilities. Another four-point violation in the report was given for outer openings that needed to be sealed. The report said a two-point violation was given for "filthy" stove grills and other kitchen equipment. Five one-point violations in the report were given for a lack of thermometers in refrigerators, floors and walls that needed repairing, a ceiling that needed a shield and some dirty vent stacks. The report said a follow-up inspection will be made.

## SCORED BETWEEN 75 AND 79:

● Pizza Inn at 413 S. Texas Ave. in College Station was in-

spected by Mike Lester. Score — 77. A five-point violation in the report was given for an outside faucet that needed a back siphonage preventer. The report said a four-point violation was given because a rear door was not self-closing. Three two-point violations were given for food items stored on a floor, a dishwasher and a sink that needed cleaning and a lack of paper towels in a bathroom. Eight one-point violations were given because a cooler and shelves needed cleaning; some floors, walls and floor drains needed cleaning; some floor tiles needed repairing; the tops of some ovens and a freezer needed cleaning; some dish towels were being used improperly; a ceiling and some walls needed repairing; the outside premises needed cleaning; a freezer needed a thermometer and floor drain needed repairing. The report said a follow-up inspection in 14 days will decide whether the restaurant's license will be suspended.

# Blacks settling more in central areas

# Study: Racial polarization up in cities

WASHINGTON (AP) — White people's preference for suburbs, coupled with the growth of minorities in central cities, has increased racial polarization in metropolitan areas, a newly published study concludes.

Between 1960 and 1980, the share of minorities in the largest metropolitan areas has risen, with blacks, Asians and Hispanics settling more and more in the central cities, said the report by geographer Morton D. Winsberg of Florida State University.

During this period, it said, the overall proportion of whites living in metropolitan areas has slipped, and those who did live in metropolitan areas were concentrated in the suburbs.

Detroit saw the largest increase in racial and ethnic polarization, while a new index indicates that the rate of polarization may have declined in Los Angeles.

Winsberg's report was carried in the periodical Population Today, published by the private, non-profit Population Reference Bureau.

Currently, Asians are scaling the economic ladder, and many are heading for the suburbs, he said, although Winsberg said that movement could be balanced by

Detroit saw the largest increase in racial and ethnic polarization, while a new index indicates that the rate of polarization may have declined in Los Angeles.

— A study by geographer Morton D. Winsberg of Florida State University.

newly arriving Asians settling in central cities.

Hispanics also are moving to the suburbs, but at a slower rate than Asians, he said.

The movement of blacks to the suburbs is slower than that of the other two groups, Winsberg said, adding that "given the obstacles this group has faced when scaling the economic ladder, it is doubtful their suburbanization will be much more advanced in 1990 from what it was in 1980."

"It is also hard to imagine conditions in the central city of most large (metropolitan areas) becoming so desirable as to stimulate non-Hispanic whites to move inward from the suburbs," he concluded.

Winsberg examined the share of non-Hispanic whites in the central cities and the suburbs of metropolitan areas with 1 million or more

people as of 1980 and compared the population figures with those for 1960.

By comparing the difference between center-city and suburbs in 1960 and again in 1980 he was able to calculate the shift among various groups.

"A geographical polarization has resulted, with non-Hispanic whites concentrating in the suburbs and the minorities concentrating in the central cities," Winsberg said. While this concentration has been widely noted, Winsberg provided a statistical measurement of the change.

"The most extreme case is the Detroit (metropolitan area) where the non-Hispanic white population grew 5 percent during the 20 year period, while the black population grew by over 80 percent, due largely to immigration from the South," Winsberg reported.

He calculated that Detroit had a 34-point increase in polarization. In 1960, whites made up 96 percent of the suburban residents and 29 percent in the central city, for a 67-point difference.

But by 1980 that difference had jumped by 34, to 60 points, as whites making up 93 percent of suburban residents but only 53 percent in the central city.

"Chicago, Miami, New York, Newark and San Antonio experienced similar increases in polarization," Winsberg added.

On the other hand, little polarization change was reported among cities where minorities constituted a relatively small proportion of the population, such as Minneapolis, Seattle or Portland, Ore.

In addition, little increased polarization was noted in cities such as Washington, D.C., which already had considerably high city-wide polarization in 1960.

The only central city where the share of non-Hispanic whites increased in the central city was Fort Lauderdale, Fla., edging from 64 percent to 81 percent. Whites increased from 83 percent to 85 percent in the suburbs, to give Fort Lauderdale a slight, 1-point polarization increase.

# Judge

(continued from page 1)

ceed with its investigation. "I think it is clear that we can (subpoena the justices)," he told the Austin American-Statesman.

The committee also voted to subpoena Ann Dees — a former employee of the Office of Court Administration — Scott Ozmun, Jennifer Bruch and Henry J. L. Taub as witnesses.

Taub was identified in a San Antonio Light story Sunday as a Houston businessman. The newspaper said Ray drew Taub aside at an October 1984 fund-raiser to discuss an oil lease case pending before the court.

Taub was a party to the suit, the Light said, and judicial ethics prohibit a judge from discussing privately a pending case with individuals from either side.

The Light also said Ray solicited funds for his re-election campaign from both sides of the oil lease case and received a total of \$9,000 from them.

Ray's attorney, Buck Wood of

Austin, was out of town Monday, his wife said, and was unavailable for immediate comment.

The Dallas Times Herald earlier reported that Hill had lectured all of the court's briefing attorneys after learning that Ozmun and Bruch apparently had accepted a free weekend in Las Vegas from Pat Maloney Jr., who had a case pending. Maloney is the son of Pat Maloney Sr.

Hill, or another appropriate officer of the court, was asked to produce phone records relating to calls between the court and Maloney's office or home.

Hill said he doesn't believe those records are public.

Books or records of phone calls between the Supreme Court or Office of Court Administration and Maloney also were sought from Lias "Bubba" Steen, executive director of the State Purchasing and General Services Commission; C. Raymond Justice, administrative director of the Office of Court Administration; and a representative of Southwestern Bell Telephone Co.

McLaughlan, who helped Anderson during the fire, said they carried two loads out of the apartment before the fire reached it. The firemen

# Energy

(continued from page 1)

viewed a thermogram of their home on April 2. The electronic photograph showed that their home is well-insulated except for one corner in the front atrium.

# Relief

(continued from page 1)

and with a little help from John McLaughlan, a sophomore environmental design major, he was able to move into his new one at Sundance Monday.

McLaughlan, who helped Anderson during the fire, said they carried two loads out of the apartment before the fire reached it. The firemen

The Ryans said their energy bills are very reasonable, but they will try to reduce them further by following some of the recommendations on their computer analysis.

Resident Tomi Fry said the thermogram of her house looked "pretty good."

She said that she had already taken steps to improve her home's energy efficiency.

"There's really been a difference in bills and the way the house feels," she said. "If people would follow these recommendations, it would help them a lot."

coming around to see if we need anything," he said.

Eric Calvert, a senior mechanical engineering major, lived upstairs where most of the damage occurred.

Calvert said he saved some clothes but lost several larger items.

"But," he said, "school's the worst part. One professor who was at the fire said not to worry about it. I hope the other professors feel the same."

Participation in the program free to all College Station residents.

The program is funded by the City of College Station from interest earned on rebates given to city by Gulf State Utilities in 1985 and 1983, Shear said.

Elizabeth Hudson, a freshman speech communications major, also relocated to Sundance Apartments.

Hudson said she went to campus Monday and still plans to continue her research and take a test Wednesday.

"This has never happened before — I guess I'm just doing what I'm supposed to be doing," she said.

# Free U.S. Treasury Bonds

For each \$1,000 you spend at Texas Coin Exchange on a loose diamond, Texas Coin Exchange will give you a \$1,000 U.S. Treasury bond. This offer does not apply on any other merchandise. Lay-a-way not included. This offer ends Saturday, April 19, 1986!
