Americans enjoy '85 income gain of more than 5%

WASHINGTON (AP) — Ameri-ns' personal income rose 5.3 per-nt last year with residents in Necans' personal income rose 5.3 percent last year with residents in Nebraska and New England making the biggest gains while Western engrowth, the government said Mon-day. ergy states suffered the slowest

The nationwide gain pushed the income level to \$13,451 for every person in the country, but it was substantially below the 9.3 percent increase in 1984.

The slowdown was blamed on the general sluggishness in the economy last year. Still, the increase kept income growth ahead of the inflation rate, which was 3.8 percent last year. The New England region out-per-

formed the rest of the country with a 6.6 percent jump in incomes, which pushed per capita earnings there to \$15,387 — 14 percent above the na-

The healthy New England income growth was explained by the lowest unemployment rates in the country

shortages for high-skilled workers.'

The biggest income growth for a single state was in Nebraska, but analysts attributed most of the 9 percent increase to large government purchases of surplus farm commodities. Without the increase in farm in-comes, Nebraska's income growth

comes, Nebraska's income grown, would have been 5.6 percent. Nebraska was followed by the New England states of Vermont, up 7.1 percent; Massachusetts, up 7 percent, and New Hampshire, up 6.9 percent. Also in the top 10 were Virginia, Connecticut, Minnesota, Jersey, Maryland and New York

The Rocky Mountain region had the slowest income growth of any area last year, up 4.1 percent, because slumping energy prices have forced many petroleum companies to cut back on drilling and explora-

industries. Commerce Department analyst Rudolph DePass said, "Many New cent gain.

Agencies concerned with Galveston Bay pollution threa

AUSTIN (AP) — Five state agencies Monday asked the U.S. Army Corps of Engineers to delay development around Galveston Bay until a complete study can be made on possible environmental damage such work might bring

Paul Hopkins, chairman of the Texas Water Commission, said, "Galveston Bay is one of the most incredible and irreplaceable natural resources of our state. It has been abused in the past and has suffered as a result.

Richard Morrison, a member of the Parks and Wildlife Commission, said, "The state of Texas is entitled to a full disclosure of the effects these projects may have on Galveston Bay before, rather than after, the projects are finalized."

Senate

other without speaking to each senate can be different.

Also asking for the environmental impact study were the Texas Department of Agricul-ture, General Land Office and the attorney general's office.

The bay — which accommodates both commercial fishing and tourism — supports \$3 bil-lion annual in business activity for the Houston-Galveston area, Agriculture Commissioner Jim Hightower said.

According to the Department of Parks and Wildlife, several projects are being proposed for the bay area.

In a letter to Col. Gordon Clarke, commander of the Corps' Galveston district, Parks and Wildlife chairman Edwin L. Cox Jr. raised concern

about possible damage from several proper holding reservoirs, enlargements of the Houston, Tea hander + City and Galveston ship channels, dredging biesbrou-the Gulf Intracoastal Waterway and other may development work that would disturb weight or the bay.

Also signing that letter were Hopkins Land Commissioner Garry Mauro. The it cited four major areas of concern: habitat salinity increases, contamination from toxic. stances in the sediments which would be st up by dredging, and disturbance to fishery sources accompanied by a decline in recreation use of the bay.

(launch managers) or anybody else sent a signal to those receivers.

The three-stage, 116-foot rocket, NASA's most used and most dependent vehicle, abruptly lost main-en-gine power 71 seconds after launch from Cape Canaveral.

It shuddered out of control so violently that its upper stage, con-taining a \$57.5 million weather satel-lite, blew off. Launch officials ordered a range safety officer to send a ground signal that destroyed it 91 seconds into the flight.

Russell said, "Everything was nor-mal...just like clockwork, until all of a sudden it looks like bam! somebody just commanded the engines off.'

The two officials generally agreed with earlier remarks made to report-

porting procedures for nuclear emergencies and accidents and expressed sympathy for the Chernobyl victims while endorsing the continued use of nuclear power "properly managed.

Although non-economic items have tended to capture most of the attention at this year's economic summit, the leaders did launch the first major revision in world monetry policy in 13 years.

and the lack of paper towels at two handsinks and lack of soap at one handsink. Another two points were subtracted from the report because some empty cans needed to be removed from the rear of the building. Three onepoint deductions were made because some walls and floors needed cleaning, a vent hood needed cleaning, there were some exposed pipes and conduits in the kitchen and a steam table needed cleaning. The report said a follow-up inspection will be conducted in 14 days.

David Jefferson, a registered sanitarian at the department, says restau-rants with scores of 95 or above generally have excellent operations and facilities. Jefferson says restaurants with scores in the 70s or low 80s usually have serious violations on the health report.

Scores can be misleading, Jefferson says, because restaurants can achieve the same score by having several major violations or an abundance of mi-

nor violations. He says the majorvi lations might close an estab. down while some minor violations a be corrected while the health inspe tor is still in the building during the inspection.

Jefferson says the depart might close a restaurant if the sc below 60, the personnel has infect diseases, the restaurant lacks equate refrigeration, a sewage bac exists in the building, or the res rant has a complete lack of sar tion for the food equipment. Point deductions, or violation

the report form range from a or point (minor violation) to five point (major violation). The department spects each restaurant about every six

Sometimes a follow-up inspectio must be made, usually within 10 day Jefferson says a restaurant might quire a follow-up inspection if it has four- or five-point violation that car not be corrected while the inspec still there or there are num
