High Sierra shaking with aftershocks

BISHOP, Calif. (AP) — Hundreds of aftershocks rattled the High Sierra on Tuesday, one day after a severe earthquake rumbled across the land, and scientists said more big quakes are possible soon in the same area.

The largest of Tuesday's aftershocks measured 4.7 on the Richter scale at 6:34 a.m., seismologists at the University of California-Berkeley said.

More destructive earthquakes are possible during the next few days, experts said, although they pegged the probability of such tremors at about 2 percent to 5 percent.

The earthquake at 7:42 a.m. Monday left 50 people homeless, swayed buildings as far away as Salt Lake City and Las Vegas, caused rock slides and briefly stranded hundreds of campers. Authorities reported just two minor injuries.

It was estimated at 6.1 on the Richter scale, centered in the High Sierra 240 miles north of Los Angeles and five miles from the 300-resident community of Chalfant Valley, which sustained the heaviest damage.

U.S. economy growth slowest since 1982

WASHINGTON (AP) — The U.S. economy grew last spring at the slowest pace since the end of the last recession, the government said Tuesday in a report that cast doubt on administration predictions that a substantial pickup is just ahead.

The Commerce Department said the gross national product, the broadest measure of economic health, expanded at an annual rate of 1.1 percent from April through June, less than one-third the 3.8 percent growth during the first three months of the year.

The president's chief economist said the weakness in the second quarter reflected temporary adjustments rather than a signal that the 44-month old recovery is about to end.

However, private economists were not as confident, expressing concern that near-recession conditions in manufacturing, oil drilling and

World and Nation

Israeli prime minister Peres meets with Moroccan king

RABAT, Morocco (AP) — King Hassan II met with Israel's prime minister Tuesday behind a heavy guard at the his forest-fringed summer palace. Militant Arabs accused him of treason and Syria broke relations with Morocco.

The controlled news media kept silent on the visit by Shimon Peres, the first by a serving Israeli prime minister to any Arab nation other than Egypt, with which Israel signed a peace treaty in 1979.

Troops and police ringed the pro-Western monarch's mountain palace at Ifrane, 125 miles east of Rabat, and access was barred to outsiders.

Israeli reporters who arrived with Peres on the surprise trip to this North African nation on Monday night were in a luxury hotel within the security belt, apparently unable to communicate with the outside world.

Moroccan officials acknowledged privately that the talks were in progress, for the first time since the Is-

raeli leader came here to discuss Middle East issues with Hassan. They would say little more, however, and spoke on condition of anonymity.

One senior Moroccan source said Rafi Edri, parliamentary whip for the prime minister's Labor Party, was with Peres. Edri, born in Morocco, has made several visits here recently.

"I have no information about anyone else taking part," the official said.

Western diplomats, also speaking on condition of anonymity, said the meeting was carefully prepared, with "friendly leaders" informed in advance, including President Reagan and King Fahd of Saudi Arabia.

President Hosni Mubarak of Egypt said of the talks: "If they are going to present us with new initiatives for a solution, I support this with everything in my power and I believe the whole nation agrees with

me, because we want to live in peace."

Arab militants raised an outcry accusing Hassan of "a betrayal of the Arab cause."

President Hafez Assad of Syria said he was breaking relations with Morocco.

Moammar Gadhafi of Libya, whose country is linked to Hassan by a 2-year-old treaty of union, said receiving Peres was a "grave violation" of that agreement but stopped short of breaking formal ties.

Iraq said the meeting was a "deviationist and strange" move by Hassan. An Algerian government spokesman branded the visit an outrage against the entire Arab nation and an unspeakable violation of its most sacred cause, the liberation of Palestine.

Algeria and Morocco, struggling over the Western Sahara, have not had diplomatic relations for nearly 11 years.

World Briefs

Stock prices experience healthy gain

NEW YORK (AP) — Stock prices gained Tuesday as the market gave one of its best performances this month.

The Dow Jones average of 30 industrial stocks closed up 16.02 at 1,795.13. Broader market barometers rose, too.

Advancing issues outnumbered declines by about 3 to 2 on the New York Stock Exchange as

volume expanded to 138.47 million shares from 106.28 million on Monday. The Big Board's composite index rose 1.13 to 137.38.

Some of the buying may have been inspired by prospects for better corporate profits.

Investors found some comforting details in the latest government appraisal of the economy's health.

President of Playboy criticizes report

DALLAS (AP) — Christie Hefner, president of Playboy Enterprises Inc., said Tuesday that a federal commission's report on pornography is leading to a repressive society, misses reality and exceeds the government's proper role.

Appearing before a group of Dallas attorneys, Hefner cross-examined the findings of the At-

orney General's Commission on Pornography.

"The Meese Commission is not only wrong... but at odds with the mandate given by the voters to President Reagan to get the government out of people's lives," she said, adding: "For what is more intrusive than to govern what people read, believe, see and practice in the privacy of their own homes?"

Light showers give little relief to farmers

(AP) — Cloudy skies and scattered rain brought temporary relief Tuesday from the Southeast's heat wave but did little for its drought. And more farmers with withered crops told a federal task force they need help.

The death toll from the heat reached 38 Tuesday.

Increased cloud cover kept temperatures in the upper 80s and mid 90s instead of 100 Tues-

day across much of the Carolinas and Georgia, although Macon, Ga., reached 99.

Before the scattered thunderstorms, Columbia had a record string of 15 consecutive days of highs at or above 100 degrees.

Crop losses have been estimated at up to \$700 million for farmers already hard-hit by rising costs and falling prices in Virginia, the Carolinas and Georgia.

'Captain Midnight' enters plea bargain

WASHINGTON (AP) — A man who sells backyard satellite television dishes admitted in federal court Tuesday that he is the "Captain Midnight" who aimed a TV signal at HBO's satellite last April and blew it off the air for 4 1/2 minutes.

His transmission protested the scrambling of some of the most popular satellite TV signals. Scrambling caused customers to stop buying dishes.

Federal Communications Commission investigators said

they used a process of elimination to pinpoint John R. MacDougall of Ocala, Fla., as the one who interrupted a movie on the HBO channel on April 27.

MacDougall entered into a plea bargaining agreement in U.S. District Court in Jacksonville, Fla.

U.S. Attorney Larry Gentile said the deal calls for the government to recommend a \$5,000 fine and one year's probation. The maximum penalty for illegal transmission of a satellite signal is \$10,000 and a year in jail.

Regents

(continued from page 1)

The System branch will include programs such as biotechnology, comparative veterinary medicine, human nutrition and biomedical engineering.

The completion deadline for the office building is two years, Board Chairman David Eller said. In the meantime system employees will encourage new research between System and medical center scientists, he said.

Eller proposed July 7 that the System establish a medical research center at the medical complex. Medical Center officials said they would be in favor of such a facility and offered four acres of land near the now-closed Shamrock Hotel.

A&M officials envision a \$30 million facility that will house a variety of special medical research programs.

Eller said the "Commitment to Texas" is designed to broaden

Texas' economic base. The program will emphasize research and development in high-technology fields and could create thousands of new jobs for Texans, he said.

The \$53.3 million commitment, according to the regent's agenda, will concentrate on programs in Texas and the people of Texas.

The regents voted to commit \$35.4 million to programs such as high-technology research, engineering initiatives and research support (library enhancement and computer upgrading).

They committed \$17.8 million to the "people phase" of the program. These monies will be used to protect the present status of the system's faculty, attract and retain new scholars, and match private contributions for endowed faculty positions.

The thresholds of the future are in research and education, he said. If Texas ignores higher education and again asks state universities to consolidate and cut back it will hamper the growth of the entire state, Eller said.

In other action, the Board:

• Gave final approval for a detailed design of the multi-level parking garage.

• Gave final approval for the establishment of an extension of the Texas Engineering Experiment Station at the University of Texas at San Antonio. The station will serve the engineering research needs of all of San Antonio, not just the college campus.

For 25 years, our people have endured long hours and tough working conditions for virtually no pay.

And 9 out of 10 would do it again.

Peace Corps offers you the opportunity to completely immerse yourself in a totally different culture while helping to make an important difference in other people's lives.

And... educational institutions, international firms and government agencies value Peace Corps experience.

Call Jerry Namken at 845-4722 or come by Room 103, Ag Bldg. for more information.
