

Texas Instruments Job Fair

Tuesday, November 18, 1986

Texas A & M
Memorial Student Center
Rooms 212-224

Interviews Scheduled

TALK TO TI'S MAJOR PRODUCT & SERVICE GROUPS.

TI's technical managers want to see you. They want to tell you about the job opportunities in the many technologies which make Texas Instruments a leader in electronics.

That's why TI is having a Job Fair on the Texas A & M campus November 18 through 20. It gives the company three days to bring in key engineers and managers to meet you. They'll come from TI labs and sites to describe programs, answer questions, and schedule interviews.

If you're a top student, particularly in EE or Computer Science, this is an event you won't want to miss.

SIGN UP FOR INTERVIEWS IF YOU ARE GRADUATING WITH THESE DEGREES:

Bachelor's, Master's or PhD
degrees in:

- Electrical Engineering
- Computer Science
- Mechanical Engineering
- Industrial Engineering

- Physics (Engineering and Solid-State)
- MBA with technical undergraduate degree
- Electrical Engineering Technology
- Industrial Production Management Technology

Briefings and sign-ups for interviews: 10 a.m. to 5 p.m., November 18, The Pavillion.
Interviews (by appointment): November 19 and 20.

Reagan task force urges incentives for child-rearing

WASHINGTON (AP) — A Reagan administration study group, charging that the "fabric of family life has been frayed by the abrasive experiments of two liberal decades," on Thursday called for tax breaks and government policies to encourage child rearing.

The report, entitled "The Family: Preserving America's Future," said, "Intact families are good. Families who choose to have children are making a desirable decision."

"Mothers and fathers who then decide to spend a good deal of time raising those children themselves rather than leaving it to others are demonstrably doing a good thing for those children."

Education Undersecretary Gary Bauer, who headed the 22-member task force, denied that the report implied any criticism of couples who decided not to have children or who put their youngsters in day care.

"All this report does is praise fam-

ilies who decide to have children," Bauer said.

But he said child rearing should be encouraged to reverse population trends that eventually will result in a shortage of young people.

Accusing courts, schools and government programs of undermining family programs, the report recommended that welfare benefits be given to teen-age mothers only if they live at home with their parents. "Government should not provide incentives — or make things easier — for teen-agers tempted to promiscuity," the report said.

While acknowledging that there was no statistical evidence to support the view that welfare encourages teen-age motherhood, the report said single mothers under age 21 should not be allowed to collect benefits under the Aid to Families with Dependent Children (AFDC) program or live in subsidized housing unless they reside with their parents.

53% of lone mothers get no child support

WASHINGTON (AP) — More than half the mothers raising children on their own do so without financial help from the fathers, a new Census Bureau report says.

Of the nearly 8.7 million divorced and separated American women raising children, 53 percent were receiving no help from the fathers, according to the study, "Child Support and Alimony: 1983."

Some 3.7 million had not been awarded child support, and another 958,000 were unable to collect their award, according to the study.

Of the women without a court award, about one-fourth said they didn't want the help.

Most women said they didn't receive awards because they couldn't

establish paternity or find fathers.

Of the 958,000 women unable to collect their payments, the largest share, 51.5 percent, said the child's father simply had refused to pay.

Of the women who were awarded payments, 76 percent were able to collect at least part of their awards, an improvement over 1981, the last time figures were compiled. In that year, 72 percent collected at least part of the money.

The federal government has launched efforts in the last few years to help mothers collect the support they are due, including a 1984 law aimed at getting states to use such techniques as wage withholding from fathers who fall behind.
