Iran-Iraq war escalates on day before peace mission to begin

MANAMA, Bahrain (AP) — Iraqi warplanes bombed industrial centers and an Iranian speedboat rocketed a supertanker Thursday. These most recent events took place the day before the U.N. secretary-general begins a peace mission to both nations.

Javier Perez de Cuellar left New York on Thursday and, after an overnight stop in Paris, is due in Tehran on Friday. He said he remained hopeful that his week-long mission will bring a truce in the 7-year-old Persian Gulf war.

On Wednesday, Perez de Cuellar said he hoped for an "early comprehensive settlement which will satisfy the demands of justice and honor."

Iraq said its air raids would continue until Iran complies with the July 20 cease-fire resolution passed unanimously by the U.N. Security Council. The Iraqis have said they will accept the truce if the Iraqis do, but Iran has not given a definitive answer.

Salvage executives based in the gulf said Iranian commandos in one, or perhaps two, speedboats attacked the Cypriot-flag supertanker Haven with rocket-propelled grenades.

Some minor damage was done to the supertanker, but there were no fatalities and no reportable casualties.

A six-week lull in the "tanker war" on commercial shipping in the Persian Gulf followed the Security

Council action, but attacks resumed two weeks ago.

The official Iraqi News Agency said a six-week lull in the "tanker war" on commercial shipping in the Persian Gulf followed the Security

"Iraq will continue striking further blows until the Iranian regime finds that its only option that can be accepted and conforms with the interests of the region's people is peace."

—Iraqi News Agency, quoting a war communique

Council action, but attacks resumed two weeks ago.

The official Iraqi News Agency quoted a war communique Thursday as saying: "Iraq will continue striking further blows until the Iranian regime finds that its only option that can be accepted and conforms with the interests of the region's people is peace." It called the air raids "legitimate deterrence."

It said all aircraft returned safely from the attacks in western Iran on Shahabad, Garand, Maragha, Do-

Thursday. Although no one is giving details on the numbers of the dead or wounded, it is speculated that the attack had adverse effects in those areas.

Reports from the salvage executives said the 232,164-ton Haven was hit by grenade and machine-gun fire shortly after midnight in the southern Persian Gulf, off the United Arab Emirates.

Lloyd's Shipping Intelligence Unit in London said the attack may have come from an Iranian frigate

firing a 4.5-inch gun that have missed," followed by

An officer on the Haven associated Press photographer English when the ship anchored Dubai, however, that attack "gunboat" used shoulder-fired grenades and machine guns. The speedboats are manned by Revolutionary Guards.

Attacks by Iranian speedboats were expected since Iraq's three-day recess in the war ended with attacks Tuesday near Iran's Kharg Island oil terminal in the northern gulf.

The Security Council has requested a suspension of oil from the gulf during Perez de Cuellar's visit.

He is to spend two days in a meeting with President Ali Akbar Hashemi Rafsanjani, Foreign Minister Ali Akbar Velayati and Hashemi Rafsanjani's speaker of Iran's parliament, flying to Baghdad.

There are no plans for a meeting with Ayatollah Ruhollah Khomeini, according to Iranian officials, headquarters in New York.

LESSON 3
FX 300

LESSON 2
FX 115M

LESSON 1
FX 451M

Before you decide which scientific to buy, take this short course in economics.

Casio solar scientific calculators.

With these three calculators, Casio continues to give students and professionals the most features and functions for the fewest dollars.

Lesson 1: Our FX-451M gives you 132 total functions, including binary, octal and hexadecimal calculations and conversions. At the touch of a key, it provides you with 13 commonly used physical constants like the speed of light, Planck's constant and atomic mass. It gives you 16 metric conversion functions too, as well as a 10 digit display with 10 digit mantissa plus 2 digit exponent for greater accuracy.

And because the fruits of your hard work are worth saving, we've added a feature called Solar Plus™. Not only does it let you work in low—or no—light situations, it keeps the memory functioning, even with the power off.

Lesson 2: Our less expensive FX-115M also features Solar Plus and a 10 digit display with 10 digit mantissa plus 2 digit exponent. It offers you 105 functions, including statistics and computer math calculations, and it even calculates fractions.

Both our FX-451M and FX-115M come with a handy, comprehensive application book.

Lesson 3: Our most economical solar scientific, the FX-300, boasts 71 functions, an accurate 8 digit display, with 6 digit mantissa plus 2 digit exponent. It features statistics, permutations, combinations and convenient engineering notation.

Before you take Science 1 or 1001, take a lesson in economics from Casio's FX-451M, FX-115M, and FX-300. You'll be amazed, not just by how much they can do, but by how little they'll do it for.
