Lisa Keyes addresses TAPSS group

By Catherine Zudak Reporter

KBTX-TV Channel 3 anchor Lisa Keyes shared her development as a broadcast journalist with about 30 women of the Texas A&M University System Association of Professional Support Staff Tuesday in Rudder Tower.

TAPSS was organized several months ago in an attempt to improve communication and increase awareness among A&M support staff.

"It's a means of networking," Yvonneke Beelby, a public relations committee member for TAPSS, said. "Our goals include enhancing service, teaching and research within the University system."

Keyes said her career in broadcast journalism began with administrative support positions.

"I called the radio station in town," she said. "They needed someone to work on log books, afternoons and weekends. It was perfect for someone in (high) school and the whole feeling of being in a radio station was good enough for me."

After graduating from Loyola University in New Orleans, Keyes spent several years recruiting for its admissions office. When she returned to broadcasting, it was again through a support staff position.

"There was an opening at Channel 4 (New Orleans) — basic entry level, answering phones, etc.," she said. "Within three months they needed a producer for PM Magazine and they wanted it filled in-house. Luckily I had been there three months."

TAPSS invites speakers like Keyes to give informational talks on topics that interest its members. Beelby said many topics like stress management, relations with management and efficiency in the work place have been addressed.

Radar system to aid A&M in early tornado detection

By Gina Rumore Reporter

A Doppler radar to be installed in the fall at Texas A&M will make earlier detection of tornadoes possible.

Dr. James Scoggins, head of meteorology at A&M, said early detection will provide people with 30 to 40 minutes of preparation time before a storm instead of the current 20 to 30 minutes.

He said the radar's detection of early tornado formation in thunderstorms before they reach the ground will provide the 10 extra minutes.

"It might give them (people) time to run to a neighbor's house or a central location where there's better shelter," Scoggins said. "Even 20 minutes could give time to take shelter and secure things to help minimize damage and prevent loss of life."

Scoggins said the Doppler radar will be compatible with and give information comparable to the Next-Generation Weather Radar (NEXRAD).

The Doppler radar will be installed to be used with the standard radar currently being used by the meteorology department.

A builder working for UNYSIS, a company that will

manufacture the NEXRAD, said it is under construction in Norman, Okla. He said the radar will be able to identify rotating wind patterns within storms and improve flash flood warnings.

The builder said more than 175 radars across the country will be under construction and the \$450 million dollar project should be fully operating by the 1990s.

Scoggins said the Doppler radar currently determines true wind speed and updrafts but has not been used for long-term observations.

The radar uses algorithms, which were developed by graduate students at A&M to help interpret data from the radar.

Scoggins said six Texas A&M theses on the subject have been used in the NEXRAD program.

"One of the things we'll be looking at with our new installed Doppler this fall is the possibility of detecting storm signature," Scoggins said. "There may be rotational aspects of a storm that we don't even know about."

The NEXRAD radar system is a joint project of the National Weather Service, Naval Oceanographic Office, Air Force Air Weather Service and the Federal Aviation Administration.

Volunteer saves disabled parking spaces

BEAUMONT (AP) — A special watchman is on the lookout for able-bodied drivers who pull into parking spaces designated for disabled drivers.

Bill Echenhofer, the city's new disabled parking space advocate, has volunteered to stake out parking lots and note unauthorized vehicles parked in parking spaces set aside for the handicapped.

As a civilian, Echenhofer, 64, a disabled retiree from Gulf States Utilities Co., lacks the authority to issue citations, but he submits to the

city traffic engineer the license numbers and descriptions of cars that do not have the special handicapped symbol on their license plates or a portable tag issued by the county tax assessor-collector to disabled people.

The traffic engineer reports to the municipal court, which issues the summonses, and Echenhofer is available as the witness in court. Unauthorized parking in a handicapped space can bring a fine of \$50 to \$200. Echenhofer turned in 35 cars in his first six weeks on the prowl.

Don Kelly, chairman of the Beaumont Mayor's Committee for Employment of Disabled Persons, said there apparently has been little prosecution of unauthorized parking disabled spots until Echenhofer stepped forward and the committee designated him as its parking space advocate May 10.

"I just got fed up with the general public parking in handicapped zones," Echenhofer said. "I just wanted the mayor and the city attorney to make them aware of the problem and they would let me do this. I make \$1,000 a day for the city."

What's Up

Wednesday

DEPT. OF HUMAN NUTRITION: Will have a free cholesterol screening from 11 a.m. to 145 MSC. For more information call Suzy Clay at 845-0955.
EUROPE CLUB: Will meet at 10 p.m. at the Flying Tomato.
CATHOLIC STUDENT ASSOCIATION: Will meet at 7:30 p.m. in the Student Center at St. Mary's Catholic Church. For more information call Rose Kennebrew at 846-5717.
NARCOTICS ANONYMOUS: Will meet at 8:30 p.m. in 145 MSC. For more information call the Drug Prevention and Education Center at 845-0280.

Items for What's Up should be submitted to The Battalion, 216 Reed McDonald, no later than three business days before the desired run date. We only publish the name and phone number of the contact if you ask us to do so. What's Up is a Battalion service that lists non-profit events and activities. Submissions are on a first-come, first-served basis. There is no guarantee an entry will run. If you have questions, call the newsroom at 845-3315.

Police Beat

The following incidents were reported to the University Police Department from July 6 through Tuesday:

MISDEMEANOR THEFT:

Six bicycles were stolen from various locations around campus. Two other bicycles that were stolen earlier from campus were found in Bryan.

Two people were arrested for stealing bicycles after being identified by witnesses.

Seventeen sprinkler heads were stolen from three areas on campus.

Four toolboxes were stolen from the Biophysics/Biosciences construction site.

An air compressor was stolen another construction site on campus.

A student reported that someone stole her scooter while it was parked on campus.

Another student reported that her scooter was stolen from a campus parking lot in May.

A student reported that someone stole a wallet from her backpack, which she left near the entrance to the Commons Dining Hall.

A man reported that someone stole his stock trailer from the Freeman Arena.

CRIMINAL MISCHIEF:

Someone damaged four RV hookups and a park bench in Olsen Park.

The lawn and several plants in the Horticulture Forestry Sciences Mall were damaged.

Someone damaged a campus street sign.

A man reported that someone broke the valve stems off two of the tires on his van.

Someone damaged a newspaper machine in the Memorial Student Center.

Someone forced the gate open at the golf cart compound. Two carts were hot-wired and driven into the mud, where one got stuck.

CRIMINAL TRESPASS: An officer caught two students in the steam tunnel between Bizell Hall and the MSC.

FLEEING A POLICE OFFICER: A student on a motorcycle tried to flee when an officer attempted to stop him for driving on the sidewalk. The matter was referred to Student Affairs.

MINOR IN POSSESSION: An officer found that two students carrying beer bottle on campus were minors. The case was referred to Student Affairs.
