Bush has already named two long-time friends, James A. Baker III and Nicholas F. Brady as the cornerstone members of his Cabinet, as secretaries of state and treasury, respec-tively. Brady replaced Baker at Treasury after Baker quit in August to become Bush's campaign chairman.

"John Sununu has the back- Farmers wait for insurance checks work not only with his former col-leagues in the nation's statehouses but also to build a constructive

WASHINGTON (AP) — Thousands of farm- Agriculture Committee, to investigate the situaers are waiting for government insurance checks to cover crops scorched by last summer's drought, as the agency that handles the program wrestles with its biggest caseload they've ever

seen. The government will end up making about \$1 billion in crop insurance payments for the 1988 season, an official said, but for a pair of South Texas farmers who have been waiting for their checks since summer, the delay has been tough on their cash flow.

"I'd be bankrupt if I didn't have a seed corn crop," said Edinburg farmer Gene Houts, who has been waiting since July for insurance payments on cotton and corn crops devastated by the drought. "It's the only thing that keeps me

Harlingen cotton and grain farmer Tommy Funk said,"There must be a tremendous backlog because we're not getting much satisfaction down here. I'm about ready to go to Washington on it."

Funk said he received a check for a withered grain crop early on, but has been waiting since late August for a check in the thousands of dollars on his cotton crop.

Houts said he was appealing to Sen. Phil Gramm, R-Texas, and Rep. Kika de la Garza, a Mission Democrat and chairman of the House

tion. He said he knows of several other Valley farmers in similar circumstances.

John Marshall, chief executive officer of the Federal Crop Insurance Corp., said the U.S. De-partment of Agriculture agency has received more than 53,000 claims and has processed and paid about 44,000 of them.

But that leaves 9,000 other farmers waiting for

'There must be a tremendous backlog because we're not getting much satisfaction down here. I'm about ready to go to Washington on it."

- Tommy Funk, Harlingen cotton and grain farmer

their checks, and Marshall said a few thousand of them have had delays of over 60 days, while a few hundred have had to wait more than the 90 required days.

'This is the heaviest workload we've ever had," Marshall said. "The unprecedented volume led to some of the delays.'

On top of that, the agency has been phasing in a new computer system and has had to work out the bugs.

"We've solved those problems and they are humming along now," Marshall said. In addition, overtime shifts were instituted to meet the crush of claims due to the drought.

The FCIC writes and pays directly on 20 percent of crop insurance claims, with the remaining 80 percent handled through private companies that are reinsured by the agency, Marshall said, meaning that thousands more claims have been filed.

But he said the private companies have on the whole been more efficient than the government in getting the checks out. Marshall expects \$1.3 billion to \$1.4 billion in

crop insurance payments will eventually be made for drought-devastated crops, with the government picking up about 90 percent of the total cost.

In an average year, he said, the entire system pays out \$1.40 for every \$1 in premiums taken in, but this year the ratio is more than \$3 for every \$1 in premiums.

A representative of two insurance companies that work through the office of FCIC said: "The horror stories are all over. I don't know if they're going to clean it up in 90 days. I think we've got a real horror story going. The poor farmer — the guy is getting short-shrifted and it's FCIC's fault."

Presidents-elect of U.S., Mexico plan Dec. 1 meeting in Houston

nobody home in Yturria, Texas, WASHINGTON (AP) — Presi-dent-elect George Bush said Thurs-day he will hold a pre-inaugural visit with Mexico's incoming president and promised not to take unilateral except maybe a few prairie dogs But it's on the map, along with 51 other obscure sites that have made the big time for the first time in the 1989 Rand McNally actions on issues affecting that coun-Road Atlas, due to appear this

Bush made the pledge in a letter he sent to the Bilateral Commission on the Future of United States-Mexican Relations, which issued a report containing a series of recommenda-tions on solving cross-border problems

Kentucky has highest rate of smoking

ATLANTA (AP) - On the day of the Great American Smokeout, a government report released Thursday shows Kentucky with the nation's highest smoking-related death

Kentucky reported 176 smoking-related deaths for every 100,000 res-idents in 1985, the U.S. Centers for Disease Control reported. Utah re-ported just 45 smoking-related deaths for every 100,000 people over the course of the year.

Nationwide, smoking killed December 1986. 314,574 Americans that year.

The worst states, after Kentucky, were West Virginia, with 172 smok-ing-related deaths per 100,000 people in 1985; Arkansas, 164; Rhode Island, 164; and Florida, 161.

Chemical company gets fine for contaminating Texas soil

ODESSA (AP) — The Texas Wa-ter Commission has fined an Odessa chemical company \$4,000 and ordered it to clean up soil contaminated in 1986 and 1987.

The penalty, imposed Monday, requires Rexene to submit a cleanup plan within 180 days. Rexene is then required to initiate the plan and clean up the contaminated ground.

Jon Wheeler, Rexene's vice president of administration, said Wednesday the company agreed to accept the fine and would begin to undertake further corrective actions to clean up the contaminated soil if the Texas Water Commission found it necessary to do so.

Wheeler said Rexene voluntarily notified the Texas Water Commission that it had discovered an unintentional discharge of limited industrial waste on Rexene property in curs

It is the second water pollution penalty imposed against Rexene this

The first occurrence resulted in a \$24,000 fine by the Texas Air Control Board in October for violations

of the state ACB rules and the Texas Clean Air Act. Kevin Hamby, assistant director

of public information for the TWC, said its investigation uncovered three violations:

• Dissolved-phase hydrocarbon contamination

• Xylene releases in product storage tanks.

• Solid waste sludge contamination from the facility's waste-water treatment plant.

The violations were discovered during a TWC investigation after Rexene, then El Paso Products Corp., reported free-floating hydro-carbons in shallow groundwater Dec. 15, 1986, and Feb. 23, 1987.

The TWC said it will continue to monitor the situation to make sure no further soil contamination oc-

"It appears that the contami-nation is all trapped within the prop-erty, but obviously we are concerned for the nearby aquifers that provide drinking water," Hamby told the Odessa American. Terry James, TWC District 10 bi-

Expires 11-30-88

ologist in Odessa, said Rexene is believed to have stored sludge in un-lined holes in the ground. The contaminants seeped through the soil into nearby groundwater. James said a plume of contami-nante lies underneath the Revene fa

nants lies underneath the Rexene facility. "It has been estimated there is in

excess of 500,000 gallons of this stuff sitting on top of the groundwa-ter zone," James said. "It has also been detected in the drinking-water aquifer."

The extent of the contamination in the aquifer has not been deter-mined, he said.

James said the TWC also is investigating possible petro-chemical pollution in Monahans Draw, a stream that runs through Odessa and nearby Midland.

In the first penalty, the ACB contended that Rexene was in violation of a permit condition for failing to operate and maintain a vapor-condensation control device, which is used to steam-clean tanks and rail-
