Published report says DEAW built laboratory for dealer DP

HOUSTON (AP) — The U.S. Drug Enforcement Administration gave suspected drug dealers the required chemicals and even built a drug laboratory for one target, according to a published report Monday.

Houston attorney Philip Greene told the Houston Post that DEA agents watched a suspected dealer in Dallas make and deliver methamphetamines and Quaaludes but did not intercept the drugs. The dealer, however, was arrested, according to

"If the point of the DEA is to get drugs off the street, they violated policy," said Greene, who specializes in drug cases.

"I'm saying our basic goal is to infiltrate drug dealers," Marion Hambrick, the DEA chief in Houston, said. "We can't expose what we do

AUSTIN (AP) — A special task force studying rural health care

problems has suggested in a draft re-port that the Legislature should cre-ate a state office to act as an advocate

for financially struggling rural health care providers. Such an office would be a central

point for information and technical assistance and a liaison for rural

health interests with state and national government agencies, Sam Gorena, executive director of the

Special Task Force on Rural Health Care Delivery, said.

"The task force found a fragile system of health care in rural

Texas," the preliminary report said. A final report is to be issued before the Legislature convenes in January.

of a weekend report in the *Houston* Chronicle that the DEA has directed local law enforcement agencies throughout the country to stage phony drug seizures and generate false news reports to help agents gain the confidence of drug lords.

At least two large cocaine seizures in Houston actually were staged by DEA officials working in concert with local police agencies, the news-

paper reported.

In August 1984 and again in September this year, newspapers and broadcasters reported authorities had made large drug seizures in the Houston area. Unknown to reporters, however, the events were staged, according to the Chronicle.

"They certainly go over the ethical

"They certainly go over the ethical line and come close to the line of le-gality," Houston attorney Dick De-Guerin said. "What I see is a trend.

Cat instinct can be New hard habit to fix high

The Brazos Animal Shelter, the Student Chapter of the American Veterinary Medical Association and The Battalion are

sociation and *The Battalion* are combining their efforts to promote responsible pet ownership.

The goal is to promote knowledgeable pet care, kindness, public health and civic responsibilities by publishing weekly articles.

The following article was written by Professor Bonnie V. Beaver of A&M's Department of Small Animal Medicine and Surgery in the College of Veterinary Medicine.

One of the hardest things to do is to convince a cat that certain spaces are off limits and that certain behaviors are not appropri-ate. The problem behavior often is one which is normal for a cat but unappreciated by their owners. The variety is endless and will range from jumping on tables and counters to climbing the owner's leg as if it were a tree.

Throwing a shoe or yelling "No" works occasionally to control the behavior, but the undesired behavior may occur when also tends to make the cat learn to avoid the owner, and most people really want a well-behaved but friendly cat, not one that runs when it sees them.

The solution to the misbehaving cat is to find a punishment that will be associated with the behavior, not with the owner. In other words, the environment should punish the cat. It is also important to understand that normal behaviors will continue to occur, so they must be appropriately directed.

Cats like high places and will tend to jump onto shelves, sofas, counters and tables. The owner should choose those which are
