Relay

(Continued from page 14)

lotte Dick," Barnes said.

enjoying a day off. "To get a class 3 privilege — there are three levels of privilege and 3 is still remember the people I used to the highest —one only needs contact the Master Relay Operator, Char-

"If you're reasonable, she'll more than likely give the privilege to you,'

he said.
"Usually it works on the idea that they'll let you do it if you ask for it and let you keep doing it as long as you don't abuse it.

It was Relay that got Barnes interested in computers, but he said he doesn't have much time for it any- Language isn't much of a barrier,

He made several friends through Relay when he was a regular user of

haven't been on Relay very

There were a couple of people from othe universities, one was at the University of Ottawa."

Although it is possible to build a strong friendship without meeting anyone face-to-face, Barnes knows of one person who traveled around the country from node to node, meeting and talking to the people he used to talk to over the computer.

Late at night, many Europeans are on the Relay lines, Barnes said. because most of the users speak En- can't log on.'

said. "Someone in France will be on Relay, and will be talking to someone

in Germany. "Often the French user won't speak German, and the German user won't speak French, so they'll both speak English."

Services

It doesn't cost anything to use the Relay services — that service is covered by the computer access fee. However, some "funny money," as Barnes called it, comes into play.

'You have a balance on your account, and if you don't have any ice. classes that require a computer, you

have \$10 a week (to spend)," he said. When you run out of money, you

Services that will run a balance

glish, he said.

"It's sort of universal," Barnes down include running heavily mathematical programs and printing.

Papers or program can be sent from home computers to any of several printers on campus. The work can be picked up later in a box at the

The boxes are all over campus and generally are shared by several people.

If one printer is closer to a particular class, Barnes says, you can send your document to that printer, changing locations at will.

Barnes also described a mail serv-

Unlike the CB-like Relay, in which the person you want to speak to must be in the system at the same

time, mail goes to a computer and is waiting for the user when he or she

That way you can leave a message, and the receiver can read it and respond at their leisure

Another service is the help desks. If you're having trouble with a COBOL, Fortran or almost any other program, you can call the helpdesk for assistance.

Barnes works at the VM (virtual machine) helpdesk in Blocker. His "address" is XO45CB at TAMV1, if

you're already in the system.

He enjoys his job, he said, but noted that it would help a lot if he could get an IBM PC in the office.

"There are a lot of different disk formats out there, and it's hard to transfer from one kind to another.

Setting Up An Account

To set up your own account counts, use your modem to dither 845-9411 or 845-9211 (the tem will tell you which number either of them).

When the A&M computer systems responds with a large ATM, it

ask the following: Enter Resource Name or (2)
which you reply VTAM.
Enter Terminal Type: If need a list of types, hit "Return'

Enter Application: To which reply CICS.

The computer will then ask to for your student ID, birthdate a last name, and it takes about a for your account to be set up. Once you've got an acc you're ready to Relay.
