Trees

(Continued from page 1)

to the northeastern part of the MSC.
• Add 26,545 square feet to enclose the upper bridge connecting Rudder Tower and the MSC.

• Build a parking garage in Lot 60 (across from Rudder Tower) that would have two, two-story buildings connected to the garage (114,436 total square feet), which would house offices, classrooms, the athletic department, the placement center and meeting rooms.

"Changes have to be made — it's inevitable," Peel said.
"I wish it didn't have to be this way, but when building you can only go up, down or out," he said.

"We can't go up because the building was not originally built to accommodate such a change and we can't go down because we would have to gut out the building, so the only other option was to go out and around."

Before the expansion can take place, 13 trees must be demolished, the same number of trees must be moved and new trees will be added.

In a letter William McLaughlin, Class of '58, sent to the Board of Regents June 14, he appealed to their

"good judgment as the ultimate decision makers at the University," by reminding them "the famed Texas architect Oneal Ford always worked around the topography."

"There is always another way when the project is still a drawing and not a piece of machinery pushing the earth," McLaughlin said.

One of the oak trees that has to be removed when the plans materialize

"Changes have to be made — it's inevitable."

— Gen. Wesley Peel

is Live Rudder Oak, which is about 165 years old and 33 inches in diameter.

Peel said Rudder Oak is on the 'save and move' list, as it will be moved 30-40 feet away, costing \$35,000-\$40,000.

Dr. Fred Klatt, a landscape architecture professor, said the mortality rate of the tree is 20 to 30 percent.

"With trees," Klatt said, "the only

consistent thing about them is their inconsistency."

"We're dealing with gray areas when we work with uprooting and replanting trees because we don't know exactly what we've got until we get down and start digging."

The usual process for moving a tree, Klatt said, is to dig a trench, put down a canvas, then wrap hog-wire fence around the ball of the tree and slide it down to its destination.

Klatt said he's had success with the process in the past.

"But I wouldn't agree with cutting down a tree unless it was absolutely necessary," Klatt said. "And in this case, for some of the trees it seems there is no other choice — either cut the tree or move it."

Klatt said survival chances are higher if the team moving the tree is composed of experts, and Peel said those moving the tree will be specialists in the field.

A&M hasn't yet bid on a contract for the expansion, Peel said, but they will do so in November and the contract should be awarded in December.

Peel said the construction should take around two years from this November.

Heat

(Continued from page 3)

chronic diseases can also affect the ability of blood vessels to dilate and get rid of heat.

Price said the combination of heat and humidity is dangerous and interferes with the body's cooling mechanism.

"The dangers have to do with the way our bodies get rid of heat," he said. "When we generate heat in the muscles, the blood carries the heat to the heart and lungs and then exits

through the blood vessels in the skin."

When the weather is hot, these vessels dilate. This allows the heat and sweat to evaporate.

"Humidity interferes with the evaporation process," he said. "The wetter the environment is around us, the harder the body has to work to get rid of heat through the sweat mechanism."

One way to improve this is by conditioning, Price said.

"When you get out and exercise in the heat, your body's blood vessels and skin gets used to the climate," he

said. "After a week to 10 days, your body adjusts so you can perspire more efficiently and get rid of heat more efficiently."

Price suggests wearing loose-fitting and light-colored clothing as an aid to avoid heat problems.

"The main thing is to remember to drink water," he said. "If you're exercising hard in the heat, it's best to replenish your water supply every half hour. Don't wait until you get thirsty. By then, you've already lost quite a bit of water. It's a good idea to drink a couple of glasses of water before you go out exercising."

Women

(Continued from page 3)

the victimizer, the last beating is the only one taken into account," Calk said. "We think the victim should be able to use evidence of all past beatings."

Stock agrees that more than the last case should be taken into account.

"It doesn't make sense for the last beating to be the only case looked at

because these women are usually systematically beaten," she said. "They should be able to bring charges to offset the torture that they went through while suffering from the battered women's syndrome where they are always on eggshells trying not to upset their husbands and always worried about whether they are going to get beat up or not."

Kathleen Colson, co-president of A&M's NOW, said students should stay informed about these bills be-

cause they will play an important role in the future.

"These are probably the most important bills concerning women to be discussed in a long time," Colson said. "Women need the help that these bills would provide because the world is becoming less concerned with the welfare of women."

Other bills vetoed by Clements that concern women are HB 2280 and HCR 119, both of which deal with battered women.

POLICE BEAT

The following incidents were reported to the University Police Department from June 19 through Wednesday:

FELONY THEFT:

• A student reported that someone stole her car from campus. The vehicle was recovered in College Station the next day.

BURGLARY:
• A set of watercolors was stolen from an office in Langford Architecture Center.

• Candy was taken from the machine in Dorm 9.

• A Dunn Hall resident reported that someone stole a diamond ring, a gold chain and a pair of diamond earrings from her room.

• Several items of audio equipment were stolen from an office in the Academic Building.

• Four Cain Hall residents reported that their rooms were burglarized. Two portable televisions and \$67 were reported missing.

MISDEMEANOR THEFT:

• Four bicycles and several bicycle parts were reported stolen from various locations around campus. One bicycle previously reported stolen was found in a different bike rack.

• A student reported that someone stole the beauty rim from his car.

• A student reported that someone tried to steal her moped.

• About 25 gallons of gasoline were taken from a dump truck in the Grounds Maintenance Building.

• A video cassette recorder was stolen from the Placement Center in Rudder Tower.

CRIMINAL MISCHIEF:
• A student reported that someone broke out the passenger window of his car.

• An officer caught a student breaking a wooden gate arm. Another student there was able to escape the officer.

• An officer caught a student scratching the side of a vehicle.

FALSE ALARM:

• Someone activated the fire and second-floor fire alarms at the New Chemistry Annex when there wasn't really a fire.

HARASSMENT:
• A woman reported that she has been receiving obscene and annoying phone calls at work.

• A student reported receiving annoying phone calls at home.

CRIMINAL TRESPASS:

• Four people, including two students, were caught leaving the steam tunnel at the MSC.

WHAT'S UP

Thursday

NARCOTICS ANONYMOUS: will meet at 8:30 p.m. For more information contact the C.D.P.E. at 845-0280.

ADULT CHILDREN OF ALCOHOLICS: will meet at 6 p.m. For more information contact the C.D.P.E. at 845-0280.

ALCOHOLICS ANONYMOUS: will meet at noon. For more information contact the C.D.P.E. at 845-0280.

Friday

AFRICAN STUDENT ASSOCIATION: will meet at 7:30 p.m. in 402 Rudder Tower.

Items for What's Up should be submitted to The Battalion, 216 Reed McDonald, no later than three business days before the desired run date. We only publish the name and phone number of the contact if you ask us to do so. What's Up is a Battalion service that lists non-profit events and activities. Submissions are on a first-come, first-served basis. There is no guarantee an entry will run. If you have questions, call the newsroom at 845-3315.

Attention A&M Students, Faculty & Staff:

GET OFF TO A RUNNING START

this summer with a little help from IBM. Buy one of the machines below BY JUNE 30th and receive

\$50 off a pair of Nikes at Oshman's!

IBM and the Texas A&M Micro Computer Center are offering immediate delivery (while supplies last) of 3 IBM PS/2 configurations:

	List Price	Your Price
BUNDLE #1: PS/2 Model 30 286. The 8530-E21 includes 1Mb memory, an 80286 (10Mhz) processor, one 3.5" diskette drive (1.44Mb), 20Mb fixed disk drive, IBM Mouse, 8513 Color Display, DOS 4.0, Microsoft® Windows/286, Word and hDC Windows Express™. Software is loaded and ready to go!	\$4,437	\$2,666
BUNDLE #2: PS/2 Model 50 Z. The 8550-E31 includes 1Mb memory, an 80286 (10Mhz) processor, one 3.5" diskette drive (1.44Mb), 30Mb fixed disk drive, IBM Mouse, IBM Micro Channel Architecture™, 8513 Color Display, DOS 4.0, Microsoft® Windows/286, Word, Excel and hDC Windows Express. Software is loaded and ready to go!	\$6,117	\$3,110
BUNDLE #3: PS/2 Model 70 386. The 8570-E61 includes 2Mb memory, an 80386 (16Mhz) processor, one 3.5" diskette drive (1.44Mb), 60Mb fixed disk drive, IBM Mouse, IBM Micro Channel Architecture, 8513 Color Display, DOS 4.0, Microsoft® Windows/386, Word, Excel and hDC Windows Express. Software is loaded and ready to go!	\$8,912	\$4,943

Prices quoted include the Micro Center Handling fee. IBM may withdraw the promotion at any time without notice. Sponsored by the Texas A&M MicroComputer Center

MICROCOMPUTERCENTER
