Students seek funding reforms in letters to official we

AUSTIN (AP) — School children are among the scores of people who have filed briefs with the Texas Supreme Court, trying

to persuade the justices to change the way public education is funded.

"I think all schools should be equal in financial support," said Clinton Kasprzyk, a fifth-grader in the South Texas school district of Kendy in a letter to the court

"You see, Kenedy doesn't have enough money to get the supplies they need," he wrote. "Just like it says, 'All men are created equal,' all schools should be too."

A lawsuit by poor districts challenging the

A lawsuit by poor districts challenging the public school finance system is pending before the court, which last month heard arguments from attorneys.

The court has received about 400 pages of legal briefs from the lawyers, and about 70 friend-of-the-court briefs from interested parties. Those parties range from state offi-cials to school board members to students, the

Austin American-Statesman reported Tues-

Al Kauffman, an attorney with the Me can American Legal Defense and Education Fund, said the friend-of-the-court briefs he show the breadth of interest in the case.

Only one brief has been filed so far in su port of the state, which must defend them ing funding system, said Kauffman, who resents a number of the poor school district

That brief, by the Texas Farm Bure said, "... The practice of compelling legistion by judicial injunction violates the Texas Constitution and it should be stopped."

Coast Guard plucks thirteen from vessels capsized in Gulf during Hurricane Chantal

HOUSTON (AP) — Thirteen people were plucked from capsized fishing vessels Tuesday in the stormy Gulf of Mexico by Coast Guard helicopter crews as Hurricane Chantal moved to the

Also this morning, the Coast Guard sent a patrol boat and a jet into the storm to bring water pumps to two shrimp boats in trouble, one about a mile north of the Galveston jetty and the other

about 50 miles from shore.

Coast Guard spokesman Mark Kennedy said emergency crews received a call about 5 a.m. about a capsized boat off the West Sabine jetty. Two helicopters were launched in the severe weather and found five people clinging to a tire attached to the boat, which was lying on its side. "They were able to hoist two people and take those two to shore," Kennedy said. "Then they came back and took the other three."

The second chopper found two other people in the water about a quarter mile from the cap-

"Incredibly enough, we got all seven people," Kennedy said. "One reason is they all were wear-ing life jackets."

Another report came in about 9:30 a.m. today, Lt. Scott LaRochelle said. He said three people were lifted from the water by helicopter about an hour later. Their boat was capsized nearby.

LaRochelle said the distress call had not in-

Faggard said. "When they get up to 175-200 (mph), that's when I start worrying about it."

Faggard said he stayed when Hurricane Carla blew through in 1961 and caused a great deal of damage, He also waited out Hurricane Alicia

'With Carla in '61, we were com-

pletely surrounded by water and

were isolated for about five days, but I don't expect anything like that from this," he said about the time

cluded an accurate location, so rescuers had trouble finding the craft.

"It's lucky they found them," LaRochelle said. "Visibility out there is only about a half-mile, at best, and there's blowing rain and fog."

A third boat reported in trouble this morning was being escorted to shore by a Coast Guard patrol boat, which brought a water pump to keep the small vessel afloat, LaRochelle said.

Three people were rescued from a shrimp boat by helicopter about 10:45 p.m. Monday af-ter being blown into the Galveston jetty, LaRo-chelle said.

the hurricane's strength that would not be too threatening.
"You go through so many of the

The plan's primary goal is to increase the value of shrimp being landed, said Gary Matlock, director of fisheries for the department. For example, closing state waters at certain periods would allow shrimp to grow

From 1983 through 1987, shrimpers reported landing an annual average of 87 million pounds of shrimp.
While the average dockside value of the shrimp was \$186 million, it had a \$580 million annual economic impact, according to the proposed plan. That includes the purchase of goods and services by shrimpers and the distribution of wages through the economy.

The plan has been sent out for public comment. The Parks and Wildlife Commission will consider adopting it after any changes are made.

Lawmakers ordered development of the plan in 1985, when they gave the commission authority to regulate shrimp fishing in Texas. The Legislature in the past has managed the industry. The commission, which meets periodically through

the year, can react more quickly to changes than the Legislature, which meets in regular session every two years, Matlock said.

Proposed shrimp management plan would make industry more lucrative

> While economic considerations are an integral part of shrimp industry management, the department also must look at such other factors as preventing depletion of shrimp, the plan notes. "It is clear that the statute directs the department to recognize that shrimp are to be treated similarly to other natural resources managed by the state and coun-

try, like oil, gas, or timber," it says. An "increasingly important" problem in shrimping is the accidental capture of endangered sea turtles in nets, said the department in the plan. Shrimpers have protested federal rules that would require the use of devices to keep the turtles from getting tangled in the

Periodic closing of state waters can cut down on the capture of turtles, fish and other marine creatures,

The average amount of fish that is accidentally caught and discarded by shrimpers has ranged from 328 million pounds to 977 million pounds per year over the last 10 years, according to the plan.

The department proposes managing the shrimp in-dustry primarily through such periodic closings. It says individual shrimpers' catches should be managed by regulating shrimping methods.

Divers wait to search for crew of capsized rig

NEW ORLEANS (AP) - D vers waited Tuesday for the remains of Hurricane Chantal stop whipping up seas around capsized rig so they could sear for 10 crewmen missing since the accident Monday in the Gulf of Mexico.

Chevron hired the divers be search the rig it leased from

search the rig it leased from a Louisiana company.

"We understand the seas at still very high and conditions at very dangerous in the area," locathan Lifa, spokesman for Cheron, said. "The captain will make the decision about when it is safe to go to the area and began searching again."

Chantal hit land on the southeast Texas coast Tuesday more
