ami said the carrier flew a special Boeing 727 charter to the Dominican resort of Puerto Plata Monday and returned to Miami with about 135 vacationers.

Bands of people, mostly youths, looted storm-damaged shops in San Juan and police patrols were returned to Miami with about 135 vacationers. and shopping areas.

In a boutique on the ground floor of the two-story building housing the Associated Press bureau in San Juan, young looters defied winds hitting 100 mph at the peak of the storm and carried out armloads of women's clothing.

The storm blew out the windows in the AP office on a There was widespread damage in San Juan's Con-dado Beach area, the site of many of the island's large stroying its computers and office equipment. One

Students raise money for Hugo relief

The Puerto Rican Student Association has organized an emergency relief fund for the victims of Hurricane Hugo, one of the worst hurricanes ever to hit

In cooperation with the American Red Cross, the association will be collecting donations to be sent directly to Puerto Rico. To expedite aid to the victims of the hurricane, the American Red Cross has advised the association to collect only monetary aid at this

The PRSA has set up a table on the first floor of the MSC to receive donations. Donors are asked to make checks payable to the American Red Cross, Hurri-

Donations also may be collected from home or office.

For more information, contact the American Red Cross at 822-2157 or members of the PRSA at 764-1748 or 845-4634 (daytime) or at 846-1228 or 696-1818 (nighttime).

staffer said his furniture was blown out the windows of

his apartment on the 20th story of his building. At 3 p.m. EDT, Hugo's center was about 70 miles northwest of San Juan, said the National Hurricane Center in Coral Gables, Fla. Hugo was moving at 15 mph to the west-northwest. Hurricane-force winds extended up to 75 miles from its center.

Meteorologist Jesse Moore at the National Hurricane Center said it was too early to tell whether Hugo would strike the U.S. mainland. He said the storm was expected to be off southeastern Bahamas by Wednesday and "after that, it's anybody's guess.

Five people were reportedly killed, 80 injured and more than 10,000 homeless Sunday on the French island of Guadeloupe, relief officials said. Two people were killed in Antigua, according to Beacon Radio in Anguilla, and there were reports of six deaths in Mont-

Richard Weening of Milwaukee, Wis., chairman of Caribbean Communications Co., which operates the GEM Radio Network from its headquarters on Montserrat, said ham operators linked to the network said the storm killed six people on the British island.

Architecture department 'visualizes' new M.S. plan

By Todd Connelley

Of The Battalion Staff

Texas A&M University may soon nd itself on the cutting edge of vial technology

A proposed degree plan, master's of science in visualization, could become a reality by 1990 in the Departent of Architecture and Environental Design. The visualization program would-

merge computer technology with raditional media, including photogaphy and videotape, to produce three-dimensional images that can be altered on the screen for experiation before the idea becomes a

"Basically, you can generate an mage that will give you an idea of that the final product will look like," Karen Hillier-Woodfin, A&M

ofessor of architecture, said. Visualization can be used for any bthat requires visual application.
"It is widely employed in urban and regional planning and land-scape architecture," she said.

however, to designing skyscrapers and golf courses, she said. Industries as diverse as NASA and Paramount are using visualization to improve space technology and create dazzling special effects, she said.

The proposed degree should attract applicants with degrees in fine

arts and computer science.

"Those applying should have two characteristics," Hillier-Woodfin

"One is to be visually oriented, in order to master the graphics. The other is to think analytically, in order to deal with the demands of the tech-

nology."
The director of A&M's \$2 million
Tom visualization laboratory, Dr. Tom Linehan, said applicants for the new

program must be highly qualified.

"We will be interested in people with film backgrounds, if they are good and highly committed," he

"From my experience at other in-stitutions that have such programs, the demand will be very high," said

The technology is not limited, Ohio State University's computer-assisted design program. Some of his students went on to work at Walt Disney and Lucasfilm Limited.

If the new program is approved, Texas A&M will take a slight lead over other Southwest Conference schools in the technology race, he

"This program is unique to this region," Linehan said.

He said visualization takes advantage of a culture accustomed to a constant media blitz.

"I think this program is a necessity because we are dealing with such vast amounts of information all the time," Linehan said.

The receiver can understand so much more using a visual presenta-tion than a numerical one," he said. Linehan said he believes the

greatest advantage to visualization is ease of revision.

"We can consider a large number of cases on computer before we ever commit ourselves to concrete," he

Teen-ager takes class hostage, releases students for pizza, soda

McKEE, Ky. (AP) — An armed teen-ager stalked into high school classroom, fired a shot into the ceiling and ook 11 classmates hostage Monday, police and witesses said. He later released all but one hostage and police said his only request was to speak to his father. Although several shots were fired, including one at a elevision news helicopter, no injuries were reported in

the incident, which began at about 9:50 a.m. The youth "said he wasn't going to hurt nobody," cording to Craig Eversole, a classmate who was the ast to be released. "He said he wasn't going to shoot no-

"He never said nothing," Eversole said. "He shot the ceiling and told the teacher to leave and let two rows of students leave. . . . He didn't say nothing rike.

Robinson also said the teen-ager apparently had held one hostage overnight — the son of school Principal Betty Bond. He said the two boys arrived at school in the armed youth had been holding the principal's son cigarettes, pizza and soda. since the night before.

It was not clear why the youth took over the class-room at Jackson County High School. Authorities described him as a newcomer to the school who was living with his grandparents, but some students said they had known him for years.

Robinson said his only request was to speak with his father in Florida. Police contacted the father through a friend in Delray Beach, Fla., but did not say whether the boy was allowed to speak to him.

Eversole, a 15-year-old junior, said he was in the classroom when the armed youth came through the

door after reportedly firing a shot in the school parking

Eversole was released at about 1:30 p.m. after soda was delivered to the room — apparently as part of a deal with police.

Robinson said the youth released one hostage in exhe younger Bond's red pickup, and it appeared that change for a police radio, then others in exchange for

Cow Hop closes Annex; bands may lease space

By Bob Krenek

Of The Battalion Staff

The Cow Hop Annex at Northgate will be closing at the end of the month, but there is a possibility the space will still be used to host area bands, Stuart King, manager of the Cow Hop,

The annex is being closed because it is no longer needed, King

"We're not making any money and it's just not worth it anymore," King said.

Local bands were featured at the annex several times each

Members of the local band the Kerouacs are discussing the possibility of sub-leasing the property

from John Raney so that Northgate will still have live music and local bands will not lose a place to perform. The property is owned by the O.H. Boyett estate.

Had Binion, guitarist and vo-calist for the Kerouacs, said he has discussed the possibility but nothing has proceeded beyond

"It's totally up in the air right now," Binion said. "The closing will mean the loss of a venue, but I'm sure there will be more to

Raney said he has received inquiries from two restaurants in addition to Binion's

The annex was formerly occupied by the Sunset Grill and became a part of the Cow Hop more than a year ago when the Grill

Cheney orders chiefs of staff to plan for drug war

WASHINGTON (AP) — Defense Secretary Dick Cheney told the Joint Chiefs of Staff on Monday to draw up plans for using their planes, ships, radar and troops to help stem the flow of drugs into the United States.

Cheney said he could not say how many peo ple will be involved in the effort or what it will cost until the chiefs report back to him Oct. 15 on what they can do to cut the flow of illegal drugs from Mexico and the Caribbean nations.

"I believe that our military forces have the capability to make a substantial contribution toward drug interdiction, and I am asking them to make the necessary preparations to carry out that responsibility," the secretary told reporters.

In helping fight President Bush's war on illicit drugs, Cheney said the Defense Department will emphasize stopping drugs from entering the country, but will also help fight drug abuse and aid other nations in attacking drugs at their

The Joint Chiefs are working out the details of the program, which will include beefed-up border radar, additional ships and planes for surveillance along the eastern and southern coasts, and improved coordination among agencies involved in the drug battle, sources said.

"The worker bees have got it, and they're under pressure to come up with some answers," said an anonymous high-level military source.

Until now, the Pentagon's role has been to support efforts of state National Guard units, which have been used for such duties as inspecting cargo at ports of entry, taking part in aerial searches for marijuana crops and helping trans-

port law enforcement officials or contraband. Those efforts have varied from state to state. Chaney insisted that in no case would the Pen-

tagon be drawn into a law enforcement role. Nor, he said, will U.S. forces overseas be sent gling.

into combat. "There's a clear line out there," that

the military will not cross, Cheney said. The secretary conceded, however, that using U.S. military personnel to train other nations' forces, as is being done now in Colombia, can put

U.S. military personnel at risk.
"It's a dangerous business. I hope nobody's hurt in the process, but I can't guarantee it, Cheney said, adding that U.S. personnel are acting under rules of engagement that allow them

to defend themselves.

Asked whether he backed shooting down planes that refuse to identify themselves and are suspected of smuggling drugs, as some in Congress have suggested, Cheney said the department has no such authority.

'We have to be very careful," the secretary

Cheney said the department intends to deploy appropriate elements of the Armed Forces" to help reduce the flow of drugs into the country, but cited no specific numbers or types of military

personnel. The goal, Cheney said, is to "complicate the challenge of getting illegal drugs into America, increasing the cost and the risk of drug smug-
