## Opportunities for Engineers

The M.W. Kellogg Company, an international leader in the engineering and construction of process facilities for the chemical, petrochemical, refining, gas processing, fertilizer, and related industries, is seeking entry-level chemical, mechanical, civil, and electrical engineers to join our Houston world headquarters and technology center.

At M.W. Kellogg, you'll have the chance to work with the most advanced technologies available in the areas of ammonia/urea, methanol, olefins/ethylene, environmental, organic chemicals, and catalytic cracking. We're also strong in such areas as advanced manufacturing technology, where management information systems, automatic guided vehicles, robotics, and advanced control technology play an important role in the facilities we design and build.

Through our Graduate Development Program, you'll be exposed to multiple projects and disciplines. We also have in-house classroom training programs that will increase your proficiency in

computer-aided engineering and design.

M.W. Kellogg's Houston office offers growth potential that can only be found in a world headquarters environment. The city, which is ideal for people with varied interests, is highly rated for its cultural centers, professional sporting events, year-round outdoor activities, and number of restaurants and entertainment facilities. Rice University, the University of Houston, and other local campuses offer easy access for continued education. And the cost of living is low.

Kellogg has been a part of many "firsts" in process engineering. If you'd like to join in that spirit of innovation, start your career with M.W. Kellogg.

We will be on campus 11 Oct. '89 to answer questions about opportunities with our organization. For additional information, send your resume or a letter of inquiry to our college recruiting coordinator:

Box 1MWK  
4913 Weeping Willow  
Houston, Texas 77092-3599.
