(Continued from page 1)

Saturday morning that Metcalf would not be released but would be evaluated at the end of the season. "Metcalf deserved more respect than he got."

Ron Novak, a junior marketing major, said he thought that Crow was not entirely the villain in the situation.

"What Shelby did was wrong," he said, referring to the press conference Saturday where Metcalf told reporters of his problems with Crow. That conference was cited by Crow as the reason for the reassignment.

"The situation as a whole was handled wrong," Novak said. Several students seemed to expect and even welcome the coaching change.

"He's a good guy, but he's been around too long and a change had to be made," Kiko Rendon, a senior civil engineering major, said.

Sam Noble, a senior psychology major, said the recent events combined with the Aggies' mediocre records in 1988 and 1989 combined to make the change inevitable.

"It was to be expected after Saturday," he said. "The Aggies' overall record was not exactly the best in the Southwest Conference the last few years."

Jim Howard, a freshman business major, said that although Metcalf was a good coach, the time had come to say goodbye.

"He has gained respect over the past 26 years, but he wasn't getting the job done, so it was time to let him go," he said.

Glenn Frost, a freshman business major, was more direct.

"It should have happened a long time ago," he said. "He's past his prime."

Jimmie Martin, a senior industrial distribution major, had an opinion that nicely summed up many opinions.

"Shelby has been around a long time and has done a good job," he said, "but I think he has lost touch with the times, and he's had trouble recruiting. I'm glad to see some young blood come in to get us to be the power we should be. We're a power in football, we're a power in baseball, we're a power in track, and we need to be a power in basketball, too."

Conference

(Continued from page 1)

several graduate schools Friday during the career fair.

Anderson, director of the Benjamin E. Mays Academy of Scholars in Pennsylvania, is scheduled to speak at noon Friday in 212 MSC and again at 2 p.m. Friday in 301 Rudder.

Taylor, who has been editor of Essence magazine since 1981, will speak at 12:30 p.m. Saturday in the ballroom of the College Station Hilton.

Akbar, a research assistant in the psychology department and black studies program at Florida State University, is scheduled to speak Saturday at 6 p.m. in the Hilton ballroom.

WOMEN IN COMMUNICATION: will have a general meeting at 8:30 p.m. in 305 AB Rudder. New members are welcome. Contact Sheri at 823-4150 for more information.

A higher form of engineering and science requires a higher form of calculator.

The further you go in engineering, math and other technical courses, the more you need a scientific calculator that speeds you through complex problems. With 254 powerful advanced scientific functions, the TI-68 from Texas Instruments is both a smart choice and an exceptional value.

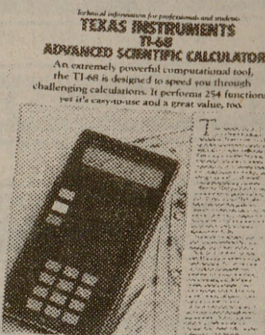

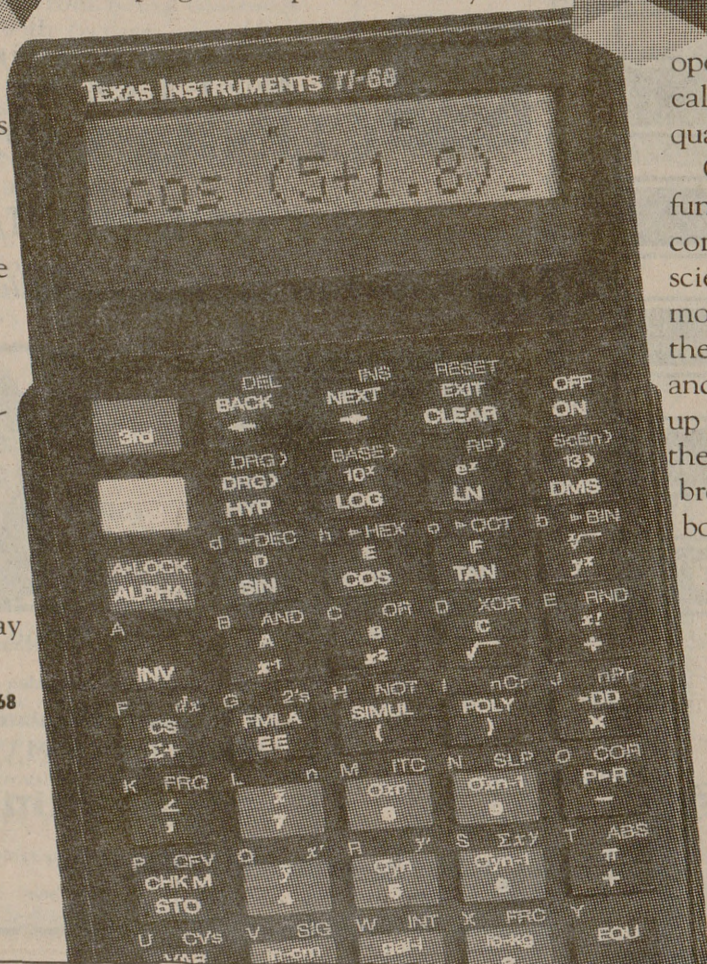

The TI-68 easily solves up to five simultaneous equations with real or complex coefficients... evaluates 40 complex number functions... and allows polar and rectangular forms for entries and results.

A convenient last equation replay feature lets you check your

answers without re-entering them. Formula programming provides up to 440 program steps for as many as 12

user-generated formulas. Perform operations in four number bases, one- and two-variable statistics, and Boolean logic operations. The polynomial root finder calculates real and complex roots of quadratic, cubic or quartic equations.

Only the TI-68 delivers so much functionality, value and ease in one compact, advanced scientific tool. For more information on the TI-68's features and functions, pick up a free copy of the TI-68 technical brochure at your bookstore.
