Full charge bookkeeper for a large restaurant corporation. Experience a must. Must have payroll experience, 300 + .

# **Population count in Texas** ranks third among states

WASHINGTON (AP) — Texas make the Texas projections, said ranks third in population among the forecasters in 1985 didn't know how 50 states and will still rank third in the year 2000, even though the state will have 1 million more people by then, the government estimated Monday.

The state saw population boom by 21 percent between 1979 and 1988, outpacing the growth of jobs. But economists at the Commerce Department expect total employment in Texas will grow faster than population in the next 10 years.

Texas' population, which was 16.8 million in 1988, is projected to reach 18.1 million by the year 2000, an increase of 7.3 percent.

California is expected to jump from 28.3 million in 1988 to 33.1 million by 2000 to stay No. 1. New York is forecast to increase from 17.9 million to 18.5 million for the No. 2 ranking. The new Texas estimate for the

year 2000 is down from the projection of 19.3 million the same forecasters made five years ago. George Downey, the Commerce

Department economist who helped

severely the oil bust would affect the

state. "We were just starting to see the problems then," Downey said. Total employment is forecast to increase 13.2 percent between 1988 and 2000.

Downey said the prediction that Texas employment will rise faster than its population is based on the state returning to a normal pattern

of growth. "We're not trying to project reces-sions or boom periods," Downey said. "We're just trying to project normal, long term growth." He said forecasters assume states that have had boom periods during recent years won't sustain them ei-ther. For instance, total employment

ther. For instance, total employment

gence toward national average be-cause that's what we expect in the long run," Downey said.

Total employment in all 50 states is forecast to grow 14.3 percent by 2000, the Commerce Department said. Total U.S. population is ex-pected to rise 9 percent to 267.7 mil-

Per capita personal income is forecast to increase from \$11,716 in 1988 to \$13,851 in 2000. Texas is ranked 34th in per capita personal income and will switch places with Iowa to 33rd by 2000, the depart

ment said. The department estimated total personal income in Texas, in 1982 dollars, will grow nearly 27 percent by 2000.

The projections were made by the department's Bureau of Economic Analysis. It began making them more than 20 years for the planning of long term government projects, such as dam construction.

Downey said the projections are now used as comparisons by busi-nesses, marketing services, the De-fense Department and other government agencies.

in Congress hailed the opening of free trade talks between the United States and Mexico Monday, saying an agreement would boost the trade stature of the state as well as the two countries.

"Those of us in the Western Hemisphere — Canada and the United States and Mexico first — should understand that we're not going to be able to compete with the European community, much less the Asian countries, unless we collectively get together," said Rep. Ron Coleman. "In economic terms, a free trade

agreement with Mexico would be much more significant than the higher profile trade agreement the president recently signed with the Soviet Union," said Sen. Lloyd Bentsen, chairman of the Senate Finance committee, which would have to rat-

ident Carlos Salinas de Gortari Monday told their trade advisers to begin preliminary talks with an eye toward

## **Mexican opposition party calls** for revote of special election

URUAPAN, Mexico (AP) — An opposition party has called for an-nulment of a special mayoral election after official returns showed the ruling party won, the government news agency Notimex reported.

The special election June 3 was a revote, after the center-left opposition party succeeded in getting re-sults of a December mayor's race annulled in Uruapan, the secondlargest city in the state of Michoacan. Official returns of the revote an-

nounced Sunday showed that ruling Institutional Revolutionary Party mayoral candidate Agustin Martinez Maldonado won the race with 13,581 votes, almost double the number received by his closest challenger from the center-left Demo-cratic Revolutionary Party, Notimex reported. Democratic Revolutionary Party

coordinator Cuauhtemoc Cardenas said his supporters will demand another revote because of vote-rigging that excluded many registered vot-ers from casting ballots, the news agency said.

Cardenas, a native of Michoacan, spoke Sunday in a rally in Uruapan, 200 miles west of Mexico City.

His party took over 21 city halls in Michoacan to protest election fraud in mayoral polling across the state on Dec. 3. Protesters were removed by the army and police four months later.

Energy department conducts second study Scientists examine impact of collider on environment

WASHINGTON (AP) — The Department of Energy has started a second study of the impact the superconducting super collider will have on the environ-ment, officials say.

The study will supplement one undertaken when seven potential sites were considered for the giant atom smasher, to be built in Ellis County, Texas, about 35 miles south of Dallas.

A draft of the supplemental study will be issued later this sum-

mer, DOE officials said Monda Hearings and public commer will then be collected and const ered in the preparation of the

and document. That final environmental in pact study will be complete by in fall, officials said.

The superconducting supe collider will be the world's large scientific instrument. It is a mile underground ring whe protons steered by superconducing magnets will be smashed gether.
