## If either of these makes your pulse race,

## talk to us.

Having to get a real job isn't so bad. Not when there's a place where the people get as pumped up about technology as you do. A place where you work on real stuff right away. And red tape and bureaucracy are kept away. Of course, there is a catch. We only want software and hardware professionals who like to be on the leading edge of high technology. That's because our business is helping other high tech companies develop and produce tomorrow's products.

We're involved in electronic design automation, automatic test equipment, telecommunications test, and custom connections. All four of our businesses are market leaders.

Our work environment is, well, collegiate. And among other great benefits, we offer an educational assistance plan with 100% reimbursement—up front. So talk to us. Or settle for a job that may turn out to be just work.
