

## Let Your Future Take Shape at Radian Corporation

*"I was attracted to Radian because of the unique opportunities in environmental work available to chemical engineers. What I like best here are the people. They are really friendly, and you get a real sense of cooperation - everyone is working for the same goal. And, because Radian is diverse and growing, there are plenty of opportunities for career advancement. At Radian, you don't have to go into management to advance. You can advance as a member of technical staff, if that's what you prefer."*

■ Terri Girvan Shires (B.S., Chemical Engineering, Texas A&M University, 1989)
