Protect pets from pranks, shelter advises

Continued from Page 1

Fulfer said.

Pranks may range from the less harmful, such as painting or scar-ing the cat, to the "unspeakable," Fulfer said.

Devil worshippers and those involved in the occult have a special identification with both black as well as white cats, going as far as animal sacrifices in their rituals,

"We just like to remove that opportunity this time of year," Fulfer

Halloween is the only time of year in which the shelter places restrictions on the adoption of its an-

Lt. Mike Matthews, information officer for the College Station Police Department, said he expects nothing out of the ordinary to come from this year's Hal-loween. Typically, the depart-ment receives calls concerning

pranks such as egg throwing, water balloons and the wrapping of houses with toilet paper, he said.
"I can't think of anything we've

had that has been a real big prob-lem in the past as far as Halloween goes," Matthews said.

The police do try to concentrate

its efforts more on the residential areas of the city during Halloween, especially during the early evening hours, Matthews said.
Although Matthews said he

knows of no occurrences of animal sacrifices within the city, he has heard reports of incidents occur-

ring in the county.

The number of trick-or-treaters has declined in the past few years. Instead, many parents take their children out to events at the mall or to school carnivals.

Those children who decide to trick-or-treat should take along an adult, Matthews said. The public should keep alert for small chilFulfer advises pet-owners to take their own steps to protect their animals around Halloween.

She recommends confining both cats and dogs to the house or to a locked and secure yard. This will keep them out of harms way at a time when traffic in residential areas increases, she said.

"There are teen groups, and others, who are looking for stuff to do," Fulfer said. "If an animal strays into their path, they could do all kinds of crazy things to it." Trick-or-treaters also might

frighten pets with their elaborate costumes and make-up. Before opening the door for trick-ortreaters, make sure pets are safely tucked away, so they can't run out

Fulfer advises against feeding candy to pets, especially chocolate. It contains a chemical which can be toxic to the animals.

Budget only affect schedulin of classes

Student workers need application to preregister

Continued from Page 1

do not work disagree with the system of preregistration for student

Jennifer Hartman, a senior po litical science major, said she disagrees with the system of workers who register before graduating seniors because some classes needed to fulfill degree requirements could be full.

The semester before the application process was implemented, a record number of students preregistered for classes. With use of the application, Ritchey said, the

number decreased by about one-

"The decrease in number of students who preregistered was very noticeable," he said.

Ritchey said that a majority of the students who register early for classes are in the University Hon-ors Program. About 2,900 stu-dents out of the average 4,500 students who preregister are honors students, he said.

Telephone registration for honors students began 8 a.m. to 5 p.m. on Wednesday and continues today during those same hours.

Every classification has three

Seniors begin registration by phone on Monday, Nov. 4, and juniors begin on Friday, Nov. 8. Sophomores can register beginning Thursday, Nov. 14, and freshmen start registration on Wednesday, Nov. 20.
