LIFE SCIENCE MAJORS

Put your career on
The Leading Edge Of
Pharmaceutical Research

Pharmaceutical Research ranks as one of the top
25 career fields for the 90's

INTERN POSITIONS

VIP Research is currently seeking applications from senior and graduate level students for this challenging position.

VIP Inc. provides a flexible schedule and a dynamic environment that allows you to develop your maximum potential.

100% of the previous interns have taken positions with VIP Research, are attending professional school or secured positions in industry.

To find out more about VIP Research and the intern program call or send resume for immediate consideration.

Volunteers in Pharmaceutical Research, Inc.
2901 East 29th Street, Suite 117
Bryan, Texas 77802
(409) 776-1417

Needs 30 drivers to
deliver fresh, hot
pizzas to the Aggies!
Earn \$5-8 per hour.
Must be 18, have
own car w/insurance,
T.D.L. and good
driving record. Call
or stop by:

4407 S. Texas
(260-9020)

TENSION HEADACHE STUDY

Subjects with a history of
tension headaches needed to
participate in a short research
study with a single dose of a
marketed medication.

NO BLOOD WORK.

Eligible volunteers will
be compensated.

G & S Studies, Inc.
(close to campus)
846-5933

Now hiring delivery personnel.
All deliveries will be on
bicycle only. A reliable
bicycle is required.
Evening shifts needed.
\$4.25 plus commissions
and tips. Flexible hours.
Apply at 330 George Bush Dr.

HOUSTON CHRONICLE NEEDS ROUTE CARRIERS

Earn \$450 to \$700 per month
as a route carrier for the
Houston Chronicle.
Job requires working
early morning hours.
If interested call Julian
at 693-2323 or James at
693-7815 for appointment.

EARN CASH! \$110/Mth AND UP
Be a plasma donor! Safe and easy
procedure provides guaranteed
income. Join thousands of A&M
students as regular donors.
WESTGATE PLASMA CENTER
4223 Welborn Rd.
846-8855

Wanted part-time or full-time tire
changers and mechanics.
Experienced, mature and able to
work with the public. Apply in person

House of Tires
1401 S. Texas Ave.
779-2458

Immediate Employment

Telephone Fundraising for
national charities part-time &
full-time, evenings & weekends.
Call Mary 776-4246.

Healthy males wanted as semen donors. Help infertile
couples. Confidentiality ensured. Ethnic diversity desirable.
Ages 18-35, excellent compensation. Contact
Fairfax Cryobank, 1121 Briarcrest Suite 101, 776-4453

GET PAID TO CUT YOUR HAIR! SEBASTIAN INT'L, the
renowned hair care company, is currently recruiting people
for its upcoming show in Houston. If you are 5'7" or taller,
and between the ages of 15 and 27, and are looking for a
new style, then please come to our casting: Monday
September 14, 1992 1:00 p.m., Style line 757 Memorial
City Mall Houston, Texas. Men and women welcome;
models will be paid! For more information 1-800-829-
7322 ext. 711.

EARN UP TO \$1500 WEEKLY! Receive info on high
income business opportunities. Send \$5.00 check or
money order to Venture Enterprises 1352 South 12th
Street Waco, Texas 76706. LIMITED TIME OFFER.
Hair color models needed for Monday Sept. 14th 776-
5008.

Now hiring delivery drivers. Paid CASH every night. Call

Science foundation renews Aggie Ocean Drilling Program until 2003

By BRANDI JORDAN
Reporter of THE BATTALION

The Ocean Drilling Program, a \$40-million-a-year program in earth sciences at Texas A&M University, has been renewed through October 2003.

The director of ODP, Dr. Philip D. Rabinowitz, announced the program's renewal at an employee brunch on Tuesday.

Texas A&M is the science operator for the program, which investigates the origin and evolution of the earth's crust, changes in global climate, ocean currents, worldwide sea levels and the earth's magnetic field.

The National Science Foundation funds the ODP with contributions from 19 member coun-

tries including many European entities, Canada, Australia, Japan and the former Soviet Union.

The National Science Board, made up of a panel of scientists, will review the program in 1998 to determine if it should continue scientific ocean drilling using the drill ship 'JOIDES Resolution' or if it should explore other options.

"Alternative methods could include platform drilling, a second ship or a number of other models that we haven't even thought of yet," Rabinowitz said.

Committee members noted in their preliminary review that the ODP is "widely acclaimed as one of the best (if not the best) programs that has ever been attempted."

The ODP, which began its operations in 1984, has drilled in all of the world's oceans and seven

of its seas. During that time, it covered more than 60 miles of sediment and rock that enables researchers from around the world to study the earth's origin and evolution.

Scientific accomplishments over the past nine years include revising the history of continents and oceans, and advancing knowledge regarding climatology and biological evolution.

Scientists from around the world now have opportunities to better understand the interaction between the air, ocean and lithosphere as well as geochemical cycles and energy exchanges.

During its nine years of drilling, more than 1,000 scientists from 30 countries have sailed aboard 'JOIDES Resolution', which is currently on its 45th cruise.

A&M, UT receive joint endowment

By JULI PHILLIPS
Reporter of THE BATTALION

A \$4 million transportation research center has brought rival schools, Texas A&M University and the University of Texas, together again.

The facility, named the Center for Aggregate Research, was opened last week by the two universities through an endowment from the Aggregate Foundation for Technology. A combined Texas A&M-University of Texas proposal for the endowment beat out 11 other proposals from 26 other universities across the country.

According to Texas A&M's University Relations, Aggregate Foundation officials cited the high national rankings of the engineering programs, state-of-the-art facilities and on-going research programs at both schools as reasons for choosing the joint proposal.

The center holds offices in both College Station and Austin allowing the two universities to share the research.

Dr. Dallas Little, the Herbert Kelleher Professor of Transportation at Texas A&M, will direct activities at the A&M center and UT civil engineer, Dr. David Fowler will be the coordinator of the Austin-located center. The main focus of the center, as a whole, is to conduct research to lead to more effective and efficient use of the components of road pavements.

Although the pavement components, also referred to as aggregate materials, are not contemplated by the average driver, Little said the research will affect a lot of business and, therefore, a lot of money.

"Aggregate manufacturers and suppliers represent the largest industry in the highway industry, an industry that itself represents nearly 18 percent of the United States gross national product," he said.

"When you look at the highway industry as a whole, the great significance of this effort is most evident."

Dr. Charley Wootan, the director of Texas Transportation Institute, said the joint research between the schools is not the first combined effort.

"There are many research programs going on between the regional universities," he said. Wootan explained that the base center's Austin location does not diminish the importance of A&M in the effort.

"The universities in the effort normally decide who will take the lead, but the research is always evenly split," he said.

Little said the concentration of the A&M center will be on asphalt aggregates and the concentration of the Austin center will be on Portland concrete; the white concrete.

"We have overlapping expertise in these areas, so even though these are our focuses, we will not be bound by these lines by any means," Little said.

According to University Relations, the Texas Department of Transportation played an important factor in getting the center located in Texas.

"(The department of transportation) was very supportive in enticing the center to locate here. Little said in a press release. "The department clearly has a strong commitment to research and that was more evident in their support of this (Texas A&M-UT) propos-

al."

"Aggregate manufacturers and suppliers represent the largest industry in the highway industry, an industry that itself represents nearly 18 percent of the United States gross national product," he said.

"When you look at the highway industry as a whole, the great significance of this effort is most evident."

Dr. Charley Wootan, the director of Texas Transportation Institute, said the joint research between the schools is not the first combined effort.

"There are many research programs going on between the regional universities," he said. Wootan explained that the base center's Austin location does not diminish the importance of A&M in the effort.
