British try to stabilize weakened pound

THE ASSOCIATED PRESS

LONDON — Britain frantically tried to stabilize the weakening pound Wednesday by hiking interest rates, buying large amounts of the currency and suspending its foreign-exchange links to other European countries. Britain's actions intensified a sense that cooperation among the powerful nations of Western Europe is splintering even as they are seeking to forge closer unity. That added to the monetary turmoil gripping Europe and spread economic anxiety elsewhere, including the United States. Capping off one of the most convulsive and frenetic trading days ever, the Treasury announced late Wednesday it would suspend the pound from the European exchange rate mechanism, which sets maximum fluctuation rates for major European currencies.

This means Britain no longer is obligated to use interest rate adjustments to keep the pound within limits specified by agreement.
