Lady Aggies spear Cardinals in volleyball

From Staff and Wire Reports

The Texas A&M Lady Aggie volleyball team beat the Lamar Cardinals three games out of four Wednesday night at McDonald Gym in Beaumont in front of 409 people.

The match was Lamar's season opener. After dropping the first game 15-17, the Aggies reeled off three straight victories by scores of 15-2, 15-11 and 15-12.

Senior outside hitter Sheila Morgan led the team with 28 kills followed by fellow senior Kim Mitchell

who had 14. Mitchell also had two service aces.

Senior middle blocker Amy Kisingling had a successful game as she shined both offensively and defensively. Although third in the number of kills, she had the team's best hitting percentage with .478. Mithcell was a close second with a .462 percentage.

Kisingling also led the team with three solo blocks and one block assist. Her eight digs were only second to senior Genny Wood, setter and outside hitter, who grabbed nine.

A&M upped its season record to 4-1 after coming out of their season debut at the Dan Gamel Invitational with a 3-1 record and a second-place trophy,

Winder

Continued from Page 7

Five minutes later
Bob: (Man, where is that airplane) "Just a second, honey, and I promise I'll get you some water."

EMS: "Sir, excuse me sir, do you know this woman next to you?"

Bob: "Yeah, she's my girlfriend, what do you want?"

EMS (loading Linda onto a stretcher): "Well sir, she's had a heat stroke and at this moment she's unconscious."

Airplane heard flying overhead

Bob: "Well wake her up then, man, can't you see I'm proposing to the woman I love."

The truth though is that most marriage proposals aided by planes do result in wedding bells. That's why this unique form of communication should be used more often in trying to get the message across. The sky could be the biggest bulletin board in all of Aggieland.

Just imagine being at a game

and looking up to see hundreds of messages and announcements.

Football Team:

"His knee was down before he fumbled."

"Attention defense: They are about to hand-off to the full-back."

"You defensive backs don't have to worry about a thing. We'll do a nose dive at all their receivers."

"Corey, if your reading this sign you're about to be sacked."

Dating:

"Jill, I'm really sorry I never knew you had a twin."

"All right Steve, I'll go out with you now will you release my family?"

"Excuse me, but did you know you have an hour glass figure with a paper bag face."

"Marry me Tina or I'll crash this plane right into the middle of the field."

Advertisements:

"Chemistry and history books to sell, 867-5309"

"Loft. Good condition. Little fire damage."

"Read David Winder's column weekly in the Battalion."

"12 kegs, my house, after game."

Parents:

"I'm flunking out of school

and I thought you might want to know."

"Mom and dad, I'm getting married to my English professor in June."

"You know how you always said you wanted grandchildren?"

"I'm legally changing my name from Anthony to Butt-Head."

Stupid People:

"Everybody looks like ants from up here."

"Them bats is smart, they use radar."

"Clinton/Gore '96"

"Dallas and Houston: Texas Super Bowl!"

Kyle Field Populace:

"Your attention please: A bomb will explode on the first deck in three minutes."

"Got a little story for you Ags: I'm not wearing any pants."

"I am the walrus. Cu-cu-ca-chu. Cu-cu-ca-chu."

"Hi, my name is Mike, and I'm an alcoholic."

Miscellaneous

"Nothing really to say, just thought I would waste some money."

"I hate you, you hate me, let's hang Barney from a tree."

"I am the Lizard King."

"Informers, A licky boom-boom down."

Mickens

continued from page 7

When it comes to guidance and companionship, Mickens only has to glance to the other side of the field to see teammate and fellow cornerback Aaron Glenn. For Mickens, Glenn is a teacher as well as a friend.

"I look at him for help and to lead me because he's been there before," Mickens said. "I look to

him to help me in bad situations, but on the field, of course, we definitely have a competition among ourselves."

The tandem of Glenn and Mickens has been talked about as being one of the premier cornerback combinations in the conference, but Mickens is keeping a level head and admits he's still got a long way to go.

"I've got to work more on my technique and I've got to focus in on it more," Mickens said. "I just want to have a solid season and I'd like to try and perfect my style

and make necessary corrections. I want to play my best all the time, but I've still got a lot to work on."

During the next three seasons, Mickens hopes to add his own flavor to the A&M defense, but his ultimate goal is to emulate those who have come before him.

"I want to contribute my own style to the defense," Mickens said. "But obviously I want to contribute like Kevin Smith and Derrick Frazier did."

"I'd like to follow in their footsteps and maybe even take it up a notch."

WORK SMARTER. NOT HARDER.

Engineering student? Smart.
Math or science major? Also smart.

On tests, you probably run equations over again to make sure they're right. So you're working harder.

You don't have to do that anymore. Not when you use the TI-68 Advanced Scientific or TI-85 Graphics Calculator, with their last equation replay feature — and many other smart functions.

We've spent years with students like you

and educators like your professors to develop the TI-68 and the TI-85. That's why they're so highly recommended.

For engineering students, the TI-68 solves up to five simultaneous equations, has complex number functions and offers formula programming.

The TI-85 builds on the power of the TI-68 by adding a wide range of graphing capabilities. Math students can handle calculus problems more easily. And technical students can see the functions for a better understanding of problems. The TI-85 also handles

complex numbers. Matrices. Vectors. Lists. Strings. Plus, it offers a powerful one-equation SOLVER.

Try a TI-68 or TI-85 at your local TI retailer today. And start working smarter. Instead of harder.
