Texas A&M University Health Science Center
1994 Undergraduate Summer Research Fellowship

This program is designed for students in the advanced stages of their undergraduate training who are considering careers in biomedical research. It provides an opportunity for students to obtain experience in the research lab and to interact with graduate students and faculty within the medical Sciences Graduate Program. There are six disciplines within the biomedical sciences for students to choose from.

A stipend is provided to students accepted into the program. Fellowships are awarded on a competitive basis, and the deadline is **March 1, 1994**. Interested students should contact:

Dr. Gerald A. Meininger

WEATHER

Wednesday: sunny, warmer, highs in 50s, lows in 30s

Thursday: increasing clouds, highs in 50s, lows in 30s

Extended: cloudy, chance of rain, highs in 50s and 60s, lows in 30s

ATM

Continued from Page 1

ATM is needed in the Commons.

Enos said there was research done into this possibility several years ago, but it didn't seem necessary then.

"It's a service we would like to provide for the students, if we feel there's a need for it," she said. "But we do want to be mindful of the costs involved."

Schneider said installing an ATM costs about \$30,000, and there are monthly fees involved.

There are also security concerns that must be examined, Mizer said.

Enos said security will not be much of a problem because there is always someone at the Commons main desk.

Jean Sheffield, secretary of Student Government, said the machine is a good idea because of the congestion at the ATM in the MSC.

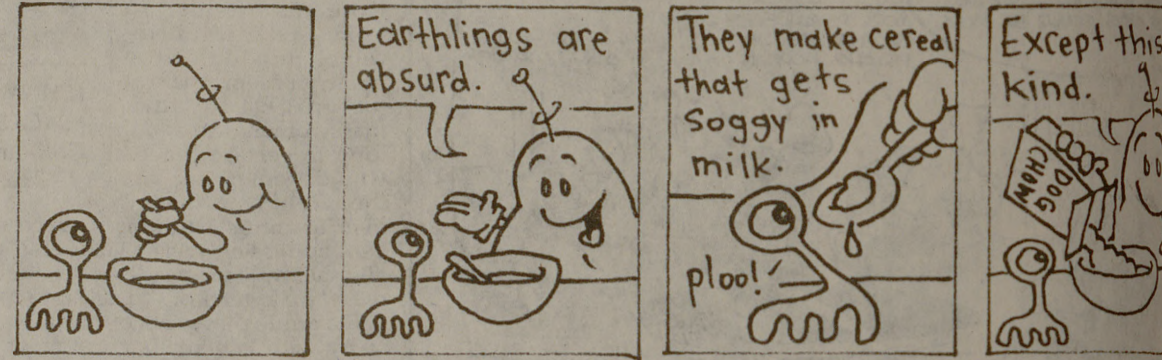

"There are always lines there, and I think this would solve that," she said. "It will also be better for the Commons residents."

Sheffield said the machine also will be an economic boost to the stores in the Commons.

the ongoing investigations and updates them periodically.

"Like every other Aggie, I'm concerned because it's negative press," Ogden said. "I'm watching this thing closely."

Ogden has dealt with A&M image problems before.

After a fraternity party with racist overtones inflamed the campus more than a year ago, some debated that A&M should be punished financially by cutting down the school's appropriations revenue from the state.

Even though A&M's appropriations were unaffected by this incident, Ogden said it took a great deal of legislative lobbying to clear the University's name.

"We had to do some hard work trying to convince people that A&M had exerted a tremendous effort in retention and recruitment of minority students and professors,"

Ogden said. "A&M was not harmed, but it took a lot of effort on a lot of people's part."

Ogden said he doesn't feel like this scenario will occur again when the legislature reconvenes in January, 1995.

"It's probably not," he said, "but there's always a risk that you can see repercussions in the budget. It's one thing you don't want to worry about."

Rene Henry, head of the Department of University Relations, said the negative stories about A&M have not had as much impact as other positive stories.

For example, Henry said the return of Reveille had far more impact than any other story last year.

"Our world-class image hasn't been tainted one bit," Henry said. "It's not been easy dealing with a lot of controversy. But a lot of positive stories have come out of it."

Henry points to the NCAA report, which credits A&M President E. Dean Gage and Chancellor William Mobley for their thorough efforts to compliance with the

makes it an ideal time of the year for studying and traveling in Europe. Come see why this A&M program provides an exceptional value.
