Continued from Page 1
 money Clinton put into the White House issued a new material after a newsweek magazine story suggested Clinton did not invest any her own money.
 Newsweek has since backed off report.
 In October 1979, Clinton decided to branch out and she opened a second account with

\$5,000 she had made in the initial investment, the documents suggested.
 She opened it through her stockbroker Stephens Inc. in Little Rock, which the White House documents said traded commodity futures in cattle, soybeans, sugar, hogs, copper and lumber.
 Before she closed out this account in March 1980, she lost \$560 in 1979 and \$449 in 1980, the White House documents show.
 That showed her total loss on

the second account to be \$1009, roughly the same amount that she had invested initially. The White House statement characterized this as "small net losses."
 The \$560 loss in 1979 was subtracted from the \$72,996 gain in the main account that year to produce a net gain in commodities trading in 1979 of \$72,436.
 It has been previously reported that Clinton started trading cattle futures at the suggestion of James Blair, general counsel for the Arkansas-based Tyson Foods Inc.
