NEW Summer '95 Classes in Houston BICH 410/411

BICH 410 and 411 will be taught concurrently during the 1995 10-week summer session at the Institute of Biosciences and Technology (in the Texas Medical Center) in Houston.

For more information, call the Department of Biochemistry & Biophysics at 845-1142.

Ranger Challenge Team to compete

Corps members to travel to Washington for regional contest

By Amy Lee
THE BATTALION

The Texas A&M Ranger Challenge Team will be trekking through the woods this weekend in Washington state raiding and destroying enemy camps as part of the Ranger Challenge competition.

The competition will be Nov. 18 through 20. This year's competition is among the 10 best ROTC teams from 22 states making up the Fourth Region.

"This is the regional championship for the ROTC units west of the Mississippi," Maj. Jim Davis, adviser for the Ranger Challenge Team, said. "It's the best of the best. For us it is the highest they can go."

"I think they're going to do well," Davis said. "They'll at least be in the top three. I think they have a good chance to win."

Steve Zynda, Ranger Challenge Commander, said that he is confident the A&M cadets will perform well this weekend.

"I think we'll be able to go up there and take first place," he said.

Michael Christensen, a sophomore parks and recreation major, agreed.

"I'm pretty confident that we're going to get there and take first," Christensen said.

Andy Lambert, a sophomore business major, said that he is focused for the competition.

"There is not much you can think about," he said. "You have to fine tune what you have."

One of the eight events that make up the competition is the physical fitness test. It consists of push ups, sit ups, and a two-mile run.

"Most everyone on the team excels in that event," Zynda, a senior parks and recreation major, said. "They do the maximum."

The cadets will also compete in a marksmanship event where they shoot M-16s at pop-up targets. There is also a weapons assembly event. The Rangers must assemble an M-16 and an M-60 machine gun.

Other events include the rope bridge

Kevin Jackson/Special to The Battalion

Steve Zynda, a senior recreation and parks major (standing), along with Raymond Vasquez, a junior industrial distribution

major, and Chris Brook, a sophomore biology major, compete for the shortest time in a recent Ranger Challenge competition.

event, the orienteering event and the grenade assault event.

The all-night patrol event consists of a two-mile trek through the woods, while the cadets have to try to raid an enemy camp and destroy it.

Immediately following the patrol event is a timed 6.2 mile run where the cadets are in full uniform.

"Basically all the teams are racing each other," Davis said. "However the team members can be no farther apart than 25 meters. They must finish as a team."

Lambert said there will be some challenges for the team, however, at Ft. Lewis.

"The cold weather will be a challenge," Lambert said. "And the competition will be a challenge. Basically, knowing you have to do well will be a challenge."

The team is considered one of the most important parts of being a member of

Ranger Challenge.

"Team work plays a big part in Ranger Challenge," Lambert said. "Nobody comes across the finish line first. We all come across as a team."

"Ranger Challenge is an elite unit for nine people," Christensen said. "It's one of the tightest units in the Corps. You're dependent on them, and they depend on you."

The Ranger Challenge Team works four days of the week from 5 a.m. to 11 p.m. Five days a week they train from p.m. to 6:30 p.m. Every weekend they do field training.

"I think we train harder than any other unit or any other organization on campus," Christensen said.

The team members also follow a strict diet. "No coke, desserts, or tobacco products any kind," Zynda said. "No drinking, no partying, it's a strict diet."

Nutrition, Health and Culture Among the Indian Tribes of Mexico

Earn 6 units of TAMU Credit for:

- assessing the nutritional status of children in Mestizo and Indian Villages.
- determining weight, height and mid-upper arm circumference, carrying out clinical examinations and asking age, dietary and health information.
- estimating nutrient intakes and stages of malnutrition.
- designing improved nutrition and health strategies.
- studying with outstanding Mexican and TAMU faculty and physicians.

This Study Abroad Program is especially recommended for undergraduate health profession majors.

For Additional Information come to one of the following informational meetings:

- Mon. Nov. 7 at 11:00 in 154 Bizzell Hall West
- Thur. Nov. 10 at 2:30 in 154 Bizzell Hall West
- Mon. Nov. 14 at 2:30 in 251 Bizzell Hall West
- Thur. Nov. 17 at 9:30 in 251 Bizzell Hall West
- Mon. Nov. 21 at 10:00 in 251 Bizzell Hall West
