

## Some Of The Best Job Offers Haven't Been Offered—Yet!

Find Out What Motorola In Fort Worth Has To Offer By Attending Our Engineering Student Career Fair

Sunday, April 30th, Noon to 5 pm  
Dallas/Fort Worth Airport Marriott  
8440 Freepoint Parkway in Irving

If you haven't considered what Motorola in Fort Worth has to offer, it's not too late! Motorola has a reputation for cutting-edge technology. So the engineering challenges you want are here. In terms of a great place to live and work, Fort Worth is Texas at its best, and Motorola's new Fort Worth facility is state-of-the-art. Find out more by attending our Engineering Student Career Fair on Sunday, April 30th, from noon to 5pm at the D/FW Airport Marriott in Irving.

Hiring Managers from Motorola's Paging Products Group will be there to tell you how you can engineer the next generation of paging products and infrastructure in Fort Worth. Motorola is a world leader in paging. And, right now, we're hiring individuals with world-class talent who want to make an impact in this exciting technology:

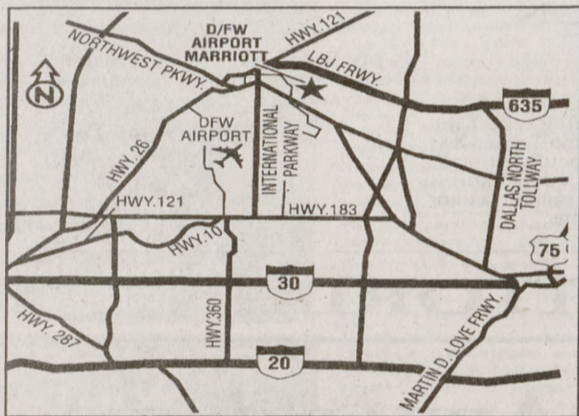

### Software Engineers

- Micro controllers
- Imbedded real-time
- C and Assembly language
- Digital Signal Processing
- Computer Science
- Systems Engineers

### Hardware and Mechanical Engineers

- RF design
- Digital Hardware
- Display housings and PCMCIA cards
- Switches

Paging is a high-growth industry expected to be serving over 150 million customers by the year 2000. With breakthroughs in high-speed signaling systems and two-way paging, Motorola is taking paging technology into the next century and beyond. Find out how you can be part of the excitement at the Engineering Student Career Fair. If unable to attend, send your resume to: Motorola Paging Products Group, College Relations Manager, 5555 N. Beach St., Fort Worth, TX 76137.

## Compaq Computer Corp. earns \$216 million during first quarter

With 11 percent of the PC market, Compaq has experienced fruitful returns.

HOUSTON (AP) — Compaq Computer Corp. said Thursday its first-quarter earnings were flat as expected, but the company and analysts expect the world's top PC maker to gain momentum as it shifts toward faster computer chips.

Compaq earned \$216 million during the three months ending March 31, up slightly from \$213 million during the same period last year. Profit amounted to 80 cents per share, the same as last year. Revenues were \$2.96 billion, up from \$2.3 billion a year ago. The results matched Compaq's prediction of flat earnings for this quarter compared to a year ago, when gross margin was higher than typical in the company's financial model. Compaq's stock rose \$2.12 1/2 to \$34.25 in early trading on the New York Stock Exchange.

"The bottom line is that we did what we said we were going to do," said chief financial officer Daryl White. "There were a lot of things we could have done better, but under the circumstances it was a very good quarter."

David Wu, analyst at S.G.

Warburg, called the results "good" and predicted increased earnings for Compaq through the rest of 1995.

"They addressed the issues of why they had the ... less-than-stellar first quarter," said Wu, who expects profits to be "up, sequentially and also year-to-year."

Compaq in March began a transition of its main line of PCs, outfitted with 486 computer chips, to models with faster Pentium 586 chips and more networking features.

Trade journals have reported

end of this quarter, which according to his figures would be the company ahead as demand shifts to higher-grade chips.

"What the press and others should not lose sight of is that there is still a very strong marketplace," White said. "I ignore that market would be ignore opportunity."

For the second quarter, White again predicted slowly growing but flat earnings as compared last year, when gross margins exceeded the company model by about 3 percent.

"We should begin to see some earnings momentum from this point forward," he said.

While its growth rate has slowed, the company's performance is still likely to set a pace in the personal computer industry.

President and chief executive officer Ed

hard Pfeiffer said he was optimistic about the rest of 1995.

"With a strong new product line-up in place and aggressive second-quarter plans to phase out our older products, we are in an excellent position to compete for additional market share," he said. Compaq overtook IBM Corp. and Apple Computer Inc. in 1994 to become the world's top maker with about 11 percent of the market. Sales last year were \$10.9 billion.

"The bottom line is that we did what we said we were going to do."

—Daryl White, chief financial officer

the company has a high inventory of older models that it may have to sell at sharply lower prices, something that could lower its second quarter results.

White said there would be price reductions on older 486 models as new models are introduced, but he disputed reports that Compaq's inventory is out of balance.

He added that production should be a 50-50 split between older and newer models by the

## Little time remains for winner to claim jackpot

The unknown lottery winner will forfeit \$12.3 million unless it is claimed by midnight on Monday.

AUSTIN (AP) — The winner of \$12.3 million from a Lotto Texas jackpot drawing last Oct. 26 has until midnight Monday to claim the prize or lose it.

The winning ticket was sold

in Flower Mound, northwest of Dallas. Texas Lottery Commission officials are telling lotto players to look everywhere for a ticket with the numbers 7, 17, 32, 36, 39 and 43.

Under state law, a person has 180 days following the drawing date to claim their winnings or the money is put into a fund for future lottery prize awards.

"I can't think of anything worse than this ticket expiring and someone finding out on the

181st day that they had the winning ticket," Elkins said. "That would be too late."

"We have had delays before," he said. "But we have certainly never had any tickets that have gone this long. We are doing everything we can to honor the jackpot."

If the prize goes unclaimed, the \$12.3 million would be the largest deposit into the Texas Lottery Commission's claimed prize fund.

# CHEAP.

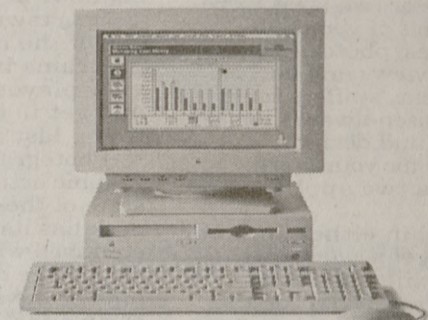

We're talking dirt.

# MAC.

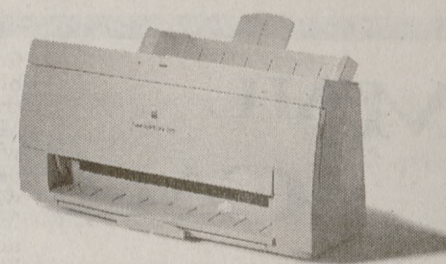

The awesome computer with all the bells and whistles.

# NOW.

Like, duh.

Macintosh Performa® 636 w/CD  
8 MB RAM/250 MB hard drive, CD-ROM drive, 14" color display, keyboard, mouse and all the software you're likely to need.

Color StyleWriter® 2400  
Ink cartridge and cable included.

**RIGHT NOW AT YOUR CAMPUS RESELLER.**  
Being a student is hard. So we've made buying a Macintosh® easy. So easy, in fact, that the prices on Macintosh personal computers are now even lower than their already low student prices.

Unfortunately, they won't stay this low forever. So you need to forget about how hard your life is for a minute and start thinking about how easy it will be with a Macintosh. The computer that gives you the power any student can use. The power to be your best. Apple
