TEAC focuses on action

By Amy Protas
THE BATTALION

The nation jumped on the environmental bandwagon in 1990 with the 20th anniversary of Earth Day.

The Texas Environmental Action Coalition was formed amidst the excitement and has endured as a campus organization whose goal is to make the world a cleaner and better place to live.

Preserving the state of the environment may seem like a lofty goal, but members of the coalition embrace the challenge.

Carrie Thompson, a senior geography major and club president, said TEAC stays focused on its mission.

"We want to sustain clean living in the world," Thompson said. "I can't just stand by and watch people get sick and species die off. I wish people could just see the errors of their ways and that something can be done."

The group was plagued with problems last year when officers resigned and membership dropped. Thompson said she hopes this will be the year the club can revive itself.

"In the past, we had over 200 members," Thompson said. "Membership has waned, and one of our main goals of the year is to get people as interested as they were in the past. We can do so much more with a lot of members."

As the name implies, the group is rooted in action. It takes a hands-on approach to tackling environmental issues.

The group took part last year in Free the Planet, a nationwide petition drive, which included 25 different requests, ranging from preservation of the wilderness to anti-nuclear pleas. The petition, which collected 2,000 signatures on the A&M campus, was sent to Speaker of the House Newt Gingrich.

Thompson said Texas senators were surprised at reactions to the drive created.

"I think we could have obtained a lot more signatures," Thompson said. "The anti-nuclear stance, however, drove a lot of students away."

Although political action was the focus of last year, the coalition hopes to get back to its original focus of a hands-on approach.

The group is planning its annual trip to clean up Matagorda Beach, and it also plans to visit Fossil Rim Wildlife Refuge in Glenrose, which is west of Dallas.

Kip Asbury, a junior geology major and club member, said the trip to Fossil Rim has always been his favorite part of TEAC.

"Fossil Rim is such an interesting experience," Asbury said. "We got to camp out and got a behind-the-scenes tour of the park."

"We actually got to see and feed endangered species," he said. "We saw the last prairie chicken alive. I always look forward to this trip the most."

Working closer to home, TEAC attacks environmental and ecological problems in the Bryan-College Station area, including sponsorship of a two-mile stretch of Highway 6

where members pick up trash

Teaming up with other environmental groups, including Environmental Issues Committee, the student government environmental committee, the coalition sponsors informational tables at Big Event, the nation's largest day-long community service project.

Terra Price, a senior wildlife economics major, said she joined the club because of her love of the environment and the camaraderie she feels with the club members.

"I have always loved animals and been concerned about the environment my children will live in," Price said. "I also know I could meet people that I care about. We have many of the same concerns."

Thompson said she wants students to know that anyone can make a difference.

"A lot of times people think they can't help the environment on an individual basis," Thompson said. "If students would just spend a few hours a week thinking and discussing issues, they could come up with the actions that could change the world."

Americans throw away enough aluminum every three months to rebuild our entire commercial air fleet.

INNOVATIVE

ATTITUDE

GLOBAL

VISION

After all the time and effort you've invested in education, you have a lot to offer.

But what has a company got to offer you?

At Hoechst Celanese the answer is opportunity — real work, right away, with one of the largest, most diverse and dynamic companies in the world.

Ours is a value-oriented, technology-driven environment that encourages innovation in the development and manufacturing of chemicals, fibers, films, advanced materials and pharmaceuticals.

We're looking for graduates in engineering, science, chemistry and related disciplines to share our global vision.

To explore the opportunities, register with the placement center, and visit the CEO Fair. Permanent, co-op, and internship interviews held October 4 and 5.
