Internet Awareness Week
Schedule of Events for Monday and
Tuesday, November 6-7

Internet Awareness Week is a collection of short seminars designed to teach you how to use the vast resources of the Internet for work, study, and fun. All courses are free and open to the public, so come on down to Rudder Tower and let us show you the wonders of the Net! Copies of the schedules for Internet Awareness Week may be found at any CIS Help Desk, at 301 Rudder Tower, or on the Internet Awareness Week homepage at http://www.tamu.edu/cis/internet_awareness/

Getting Started with the Internet:

Introduction to Computing Resources at Texas A&M University - Basic introduction to Computing and Information Services (CIS) and campus computers, labs and help areas, the Internet, and electronic mail. Basic discussion of available resources and CIS services provided for people who know little about computing, Texas A&M University generally-accessible labs or what computing resources are available to them. *Mike Edwards, Computing and Information Services.*
Thursday, November 9 8:00 am - 9:00 am Room 302 Rudder

The Internet Show - This video is a great guide to the wonderful world of the Internet for beginners. It explains in basic terms what the Internet is and what you can do with it - such as electronic mail, the WWW, Gopher, Internet Relay Chat, and games! About 1.5 hours long. *Chris Barnes, Computing and Information Services.*
Wednesday, November 8 2:00 pm - 4:00 pm Room 301 Rudder
Thursday, November 9 2:00 pm - 4:00 pm Room 301 Rudder

Using the Internet at Texas A&M University - Need a basic introduction to Internet access at Texas A&M University? This presentation will educate you about the network facilities available at Texas A&M University and the types of communication possible on networks available at Texas A&M. *Dr. Samia Masoud, Computing and Information Services.*
Wednesday, November 8 8:00 am - 9:00 am Room 302 Rudder
Thursday, November 9 11:00 am - 12:00 pm Room 302 Rudder

Using the Internet:

Getting Connected to the Internet - Interested in learning to "get connected" to the Internet? This presentation will discuss getting Texas A&M University accounts, as well as the hardware, software, and modems you'll need to get your personal computer connected to the Internet. *Sean Geoghegan, Computing and Information Services.*
Wednesday, November 8 4:00 pm - 5:00 pm Room 302 Rudder
Thursday, November 9 2:00 pm - 3:00 pm Room 302 Rudder

How to Use Electronic Mail - Interested in getting "online" so that you can instantly and effectively communicate with more than 80 million people around the world? Use electronic mail! This presentation will cover how to get an electronic mail account, learning how to use electronic mail, how to use Listserv lists and Usenet Newsgroups, as well as a variety of interesting uses for electronic mail. *Dr. Samia Masoud, Computing and Information Services.*
Wednesday, November 8 3:00 pm - 4:00 pm Room 302 Rudder
Thursday, November 9 3:00 pm - 4:00 pm Room 302 Rudder

Introduction to Listserv - Listserv is a network application that enables you to join electronic discussion groups on just about everything under the sun. Whether you're interested in Labrador Retrievers, Shakespeare, in-line skating, or post-modernism, there's something for you. Learn how to use Listserv lists, to subscribe to them, and even how to manage your own Listserv list on a particular topic! *Chris Barnes, Computing and Information Services.*
Thursday, November 9 1:00 pm - 2:00 pm Room 302 Rudder

Introduction to Usenet News - Usenet News can be thought of as the "bulletin board" of the Internet. Like other bulletin boards, you can write a message/article and electronically "post" it to a topic area for other people to read. This presentation will explain the basics of Usenet News as well as how to use it to enhance information gathering and discussion in an online format. *Chris Barnes, Computing and Information Services.*
Thursday, November 9 11:00 am - 12:00 pm Room 301 Rudder

Academic Assistance on the Internet - The Texas A&M University Academic Assistance Clearinghouse provides a directory on the Internet of academic assistance programs and services which are available at no cost to students. Students are able to access the Clearinghouse at any time to obtain current information regarding academic assistance from campus departments. Schedules of help desks, departmental tutoring, review sessions and Supplemental Instruction sessions are available, in addition to lecture notes, study guides and practice exam questions made available by Texas A&M professors. Come to this presentation to see a demonstration of this enriching resource!
Wednesday, November 8 1:00 pm - 2:00 pm Room 301 Rudder

World Wide Web Basics:

Le Tour de Web - With Infoman - This tour will take participants through a cyberspace journey with the KAMU-FM program *Gig-A-Bytes* Infoman, Orlando Castillo. This trip will include stops at search engines, educational sites, entertainment areas, art, sports, trivia, how-to and many other fascinating sites.
Wednesday, November 8 12:00 pm - 1:00 pm Room 301 Rudder
Thursday, November 9 12:00 pm - 1:00 pm Room 301 Rudder

Redefining and Rethinking Teaching as We Know It: Pedagogy and the Internet - This panel discussion will discuss how WWW technology is revolutionizing the field of pedagogy as it enhances the traditional learning process. Come see how traditional courses have been designed to effectively adapt to all electronic medium, learn about developing courseware for the WWW, putting information that is supplemental to courses on WWW homepages, as well as the benefits and challenges of distance education. *Elizabeth Tebeaux and Anthony Aristar, Department of English, Harvey Tucker, Department of Political Science, Paul Sittler, Department of Agriculture, Karen Murphy, Department of Education.*
Wednesday, November 8 9:00 am - 10:00 am Room 302 Rudder

Using the World Wide Web to Find Out: Money! Schools! Careers! - A demonstration of "Adventures in Education," a WWW site sponsored by Texas Guaranteed Student Loan Corporation in cooperation with schools and lenders. Learn to mine the riches of the WWW to find information about career planning, college selection and funding your education. Students, financial aid officers and counselors, administrative staff, and others interested in seeing a really cool Web site are encouraged to attend - and get a free flying disk.
Wednesday, November 8 2:00 pm - 3:00 pm Room 302 Rudder

Technical Aspects of the Web:

Good Graphic Design on the WWW pages - Graphics are becoming more and more prevalent on WWW homepages. As the number of electronic documents available from the WWW increases, competition for attracting WWW surfers through visual appeal is now a requirement. This session will discuss problems associated with graphic design, including images and image maps in WWW documents, as well as the capability of different browsers to present graphics and how to optimize the use of graphics. Some tools available for creating graphics will be presented in a live demonstration. *Bill Ambrose, Computing and Information Services.*
Wednesday, November 8 8:00 am - 9:00 am Room 301 Rudder
Thursday, November 9 8:00 am - 9:00 am Room 301 Rudder

How to Create a WWW Page - Would you like to create your own personal WWW homepage? Using tam2000 as our WWW server, we'll create a homepage and register it at Texas A&M University so that the world can see it! You will also learn how to link files and images to your homepage. *Sherri Marx and Jane Carpenter, Computing and Information Services.*
Wednesday, November 8 4:00 pm - 5:00 pm Room 301 Rudder
Thursday, November 9 9:00 am - 10:00 am Room 301 Rudder

How to Establish a MacHTTP Server on a Macintosh Desktop - "The establishment of WWW server software on my Macintosh desktop has enabled me to write and try out material quickly for our departmental homepage. The finished hypertext material is then easily transferred to the department server and added to the official Texas A&M Landscape and Pavements Maintenance homepage. This presentation will show you how I did it!" *Edward W. Hill, Landscape Maintenance Foreman, Texas A&M University Physical Plant.*
Thursday, November 9 4:00 pm - 5:00 pm Room 302 Rudder

WWW Server Installation on UNIX - With the explosion of the use of the Internet and WWW services on the Internet, more system administrators are finding it valuable to install a WWW server on their UNIX systems. This seminar will discuss how to obtain the latest WWW server software free from the Internet and how to install it on a UNIX system. Prerequisites: knowledge of compiling programs on UNIX, UNIX startup procedures (ets/rc2), and inet configuration. *Victor Hazlewood, Computing and Information Services.*
Thursday, November 9 10:00 am - 11:00 am Room 302 Rudder

Configuration/Management Solutions for a PC-based WWW Server in a Multi-Authoring Environment - This presentation will discuss a few ways to manage and install a PC-based WWW server and integrate it into an existing LAN environment. Through these methods, multi-authoring environments can be easily managed and maintained. LAN administrators for PC-based LAN environments at Texas A&M University are encouraged to attend. *Alan Kirk, Engineering Technology.*
Thursday, November 9 1:00 pm - 2:00 pm Room 301 Rudder

Using Adobe Acrobat on the WWW - Demonstrates the Texas A&M University Department of Agricultural Communications' system for putting Adobe Acrobat documents (both in English and Spanish) up on the WWW. *Bill Watson, Department of Agricultural Communications.*
Wednesday, November 8 11:00 am - 12:00 pm Room 302 Rudder

General Internet Topics:

Knowledge Gateways - Highlights the Internet-based international technology, market, knowledge, and information-transfer system that helps the agribusiness industry become highly competitive by forming mutually beneficial alliances with member countries of NAFTA. People wanting to learn how we use the Internet to develop international projects and as dynamic data acquisition tool are encouraged to attend. *Jose Marcos Quintana, Texas A&M University Research Park.*
Wednesday, November 8 10:00 am - 11:00 am Room 301 Rudder

Media Relations and the Internet - Come see how the Texas A&M University Department of Agricultural Communications is distributing news releases and cultivating media relationships through the use of Listservs, WWW, and media training courses. *Kathleen Davis, Department of Agricultural Communications.*
Wednesday, November 8 10:00 am - 11:00 am Room 302 Rudder

Benefits of Electronic Publishing - Some organizations are reluctant to get into electronic publishing either because they believe in WWW is just the latest fad or because they cannot afford the additional costs. This session will discuss the cost of not using electronic mediums and some of the benefits realized by those using the WWW to advertise and communicate with their customers or students. It will also examine what is needed to publish on the Internet. *Bill Ambrose, Computing and Information Services.*
Wednesday, November 8 11:00 am - 12:00 pm Room 301 Rudder

Tae Kwon Do team silent but deadly

Stew Milne, THE BATTALION

Black belt Camilla Sullivan kicks black belt Stephen Moon during a Tae Kwon Do practice. Moon finished second in the Ft. Worth Invitational.

□ The team is currently ranked third in the nation.

By Lisa Nance
THE BATTALION

Though the Texas A&M Tae Kwon Do team may not have the recognition that it wants, it certainly has the ranking.

The team is currently ranked No.3 in the nation after placing third at the Collegiate National Championships in New York. The team took 12 competitors to the meet in New York and brought back one gold medal, four silver medals and five bronze medals.

Anne Harper, a first-degree black belt on the team who has been practicing the sport for four years, said competition is the focus for the A&M team.

"Our team focuses on competition, which is the Olympic-style Tae Kwon Do," Harper said. "The competition is 95 percent kicks and about 5 percent punches. We train solely to go to competitions throughout the state and the nation."

The Tae Kwon Do team is made up of about 40 members at all levels of skill.

"We teach beginners, and we also take people who have had Tae Kwon Do experience in the

past," Harper said.

The team is open to new members interested in learning more about the sport. Interested individuals can contact the team's president, Camilla Sullivan, for more information.

The team is through with tournament action for this season but looks forward to the big tournament season in the spring.

"In the Spring we have three major tournaments, two in Colorado and one in Dallas," Harper said. "In the tournaments, there are two events. There are forms competition and fighting. The forms is like a choreographed set of movements, without music, that show power and grace.

"In the fighting, you are against an opponent. You go into the ring and the rules are nothing below the belt and no punches to the face. You can kick to the head, you can kick to the body and you can punch to the body."

The Tae Kwon Do team practices four times a week and encourages interested people to come watch practice. On Mondays and Thursdays, they practice in room 255 at G. Rollie from 8-10 p.m. On Tuesdays they are at Room 267 of the Reed building from 5-7 p.m. On Wednesdays, they practice with Head Coach - Master Michael Pejo - at his karate school in the Martial Arts Center in Bryan.
