Computers **Continued from Page 1**

John Rauser, project director for operations for Computing and Information Services, said the lab will be equipped with state-ofthe-art computers.

"The equipment will be cycled out every three years so it should stay state-of-the-art," Rauser said.

The new computing and group study facility will be funded by the computer access fee. One dollar per credit hour of the computer access fee is dedicated to the project. The money generated pays for construction, equipment and

the ongoing costs of operat-ing the facility. Dinkel said this fee will make it possible to maintain advanced equipment.

Bevers said although she is graduating, she is pleased about the new facility and its equipment.

My brother is entering college before too long and I'd like him to have a facility like that," Bevers said.

The project is a result of student initiative, Dinkel said. Four or five years ago, a group of Student Government members wanted to improve access to computer resources. Those students planned the financing for the project.

Dinkel said the computing facility should be completed in late Fall 1996 or early Spring 1997.

Turner said the Energy Sys-

tems Lab monitors hourly en-

ergy consumption and the chill

water systems of university

buildings throughout Texas, not just at A&M, and deter-

mine how much money has

Energy

and the Eller O&M Building are being upgraded.

A loan from the Loan STAR (Safe Taxes and Resources) Program for about \$3.3 million has been approved to upgrade the HVAC systems in the Langford Architecture Building, the Reed McDonald Building, Heldenfels Hall, and part of Sterling C. Evans Library. The loan also in-cludes funds for efficiency improvements in the chill water control of approximately 70 buildings.

Texas A&M was the first agency involved in the Loan STAR program, which began in 1989.

Since 1992, the University has received \$2 million in five separate grants from the Insti-tutional Conservation Program, which is administered by the Department of Energy.

Darnell said loans are paid back with the money saved on energy costs.

been saved. Then the Lab sends the savings reports to the buildings being monitored and to Loan STAR. Turner said Loan STAR has saved Texas over \$32 million in almost 100 Texas buildings. Turner said the savings may not be apparent at first

because they are still in the process of upgrading several buildings on campus.

"Our efforts to date are extremely encouraging," Turner said. "I think there is a potential for saving \$2 million dollars in energy every year.

Gaston said it is important to get the faculty and students to think about the issue of en-

ergy conservation on campus. "It is very difficult in a large organization to get people working together to reduce energy," Gaston said. "Every dollar we save is a dollar we don't have to charge students.'

Research

Continued from Page 1

that digs on the moon is different than one that digs on Earth.

"Excavation on Earth is relatively easy," Boles said. Tractors are just built to be big and powerful, but it costs several thousand dollars per pound to carry equipment to the moon, so the machines we design need to be rather light. We're talking about having 10 or 12 horsepower motors running these machines."

Boles said because of the unknown force obstacle eral ways. could be cleared.

volvement in such projects benefits space exploration research. "The folks doing this re-

search are the only ones doing it in the world," he said. "We (NASA) like to have university involvement because there are many new and unique activities happening.

"By using student input, we're getting answers by using the cool ideas students have. I guess we're just a bunch of overeducated people who haven't let go of the feeling."

The experiments were ben-KC-135 experiments, the eficial to the students in sev-

Imelda Marcos to get treatment in Boston

MANILA, Philippines (AP) - Imelda Marcos is coming back to the United States with the approval of an antigraft court. She of the many shoes is being al-

lowed to go to Boston — and nowhere else — to receive treatment for glaucoma, the court ruled Tues-

day. Her stay is limited to 60 days. Marcos is free on bail pending an appeal of a 24-year sentence for

corruption. The trip was criticized by the antigraft court that convicted Marcos of looting the country's treasury, but the Philippines legislature felt it was the

right thing to do. Marcos has not been in America since 1991, the year she returned to Manila to face charges following the 1989 death of her husband, former Philippines President Ferdinand

Notorious B.I.G. gets busted with dope

TEANECK, N.J. (AP) — Rap star Notorious B.I.G. was arrested on mar-ijuana and gun possession charges af-ter police went to his house to ask nim to move a car.

The rapper, who is also known as Biggie Smalls and whose real name is Christopher Wallace, was arrested July 23, police said Tuesday

A police officer said he smelled marijuana and in a search of the townhouse found a Tec-9 pistol with a 30-round clip, two guns fitted with infrared, laser-targeting devices, a revolver and about two ounces of marijuana. The serial numbers had been

scratched off the guns, police said. Wallace and seven members of his

rap group, the Junior M.A.F.I.A., were charged with marijuana possession. Wallace was also charged with pos-

session of illegal weapons. Wallace has made much of his past as a former crack dealer from one of the toughest neighborhoods in Brooklyn, Bedford-Stuyvesant. In December, he was honored as

rap artist of the year at the Billboard Awards.

trustrated over ex-wife

LOS ANGELES (AP) - O.J. Simpson was "confused and frustrated" over his ex-wife's behavior in her final months, and appeared tired and quiet at a dance recital just hours before her murder, a Simpson friend testified in a deposition.

Dr. Ronald A. Fischman, an internist and Simpson neighbor, said Simpson "was not his normal effusive at the June 12, 1994, recital.

"I'd never seen him quite like that," said Fischman, testifying July 10 in a deposition for a wrongful death lawsuit against Simpson. The mood at the recital was un-

Simpson then asked Fischman to have dinner, but he said he declined because of other plans

The testimony is the latest to de scribe Simpson's increasing frustratio with his ex-wife, and his downcast demeanor at the recital.

That view was countered a Simpson's trial by a videotape taker at the recital showing him laugh Fischman said Simpson was laugh-

ing at a remark made by him. "He had asked me something about dinner, and I said, 'I'm go out to dinner with the wife.' And he said, 'Good luck,' because he knew we were having (marital) problems Fischman said.
